

COTTON TELLS OF COALING

Former Commander of Cruiser Harvard Gives Testimony in Schley Case.

REYNER TO BE JUDGE WILSON'S SUCCESSOR

Schley Announces That He Has Made His Selection of Additional Aids.

WASHINGTON, Sept. 25.—Two new witnesses were introduced in the Schley case today. They were Admiral Cotton, who commanded the auxiliary cruiser Harvard, and Captain W. H. C. Clegg, who commanded the auxiliary cruiser Yale during the Spanish war.

Admiral Cotton testified that he had seen the Spanish flag on the deck of the Harvard at Santiago. He said that he had seen it on the deck of the Harvard on May 27, 1898, at Santiago. He said that he had seen it on the deck of the Harvard on May 27, 1898, at Santiago.

Mr. Clegg testified that he had seen the Spanish flag on the deck of the Harvard at Santiago. He said that he had seen it on the deck of the Harvard on May 27, 1898, at Santiago. He said that he had seen it on the deck of the Harvard on May 27, 1898, at Santiago.

DANIEL WEBSTER CENTENARY

Great American's Graduation at Dartmouth One Hundred Years Ago.

HOW THE EVENT WILL BE OBSERVED

Cornerstone of a Memorial Hall to Be Laid—Epochs in the Life of the Eminent Statesman.

Dartmouth college celebrates today the centennial of the graduation of Daniel Webster from that institution. This afternoon the cornerstone of Webster hall, the new administration and memorial building, will be laid by Samuel Appleton, the only living grandchild of Webster.

The event to be commemorated naturally brings to mind the career of one of the greatest of American statesmen: Born in Salisbury (now Franklin), New Hampshire, on the 18th day of January, 1782, Daniel Webster gave little promise of developing into the splendid physical and intellectual vigor that were so prominent in his later years.

When the war with England began Ebenezer Webster's patriotic spirit ran high and he raised a company of 200 men and marched to Boston with them to join the army. He was one of the bravest of the most splendid looking men of his day—tall, dark and of noble figure.

Mr. Webster was admitted to the bar in 1805 and he returned to New Hampshire and opened an office at Portsmouth. His income did not exceed \$500 or \$600 a year, but that was regarded as a very creditable sum for a young lawyer to earn in those days.

In 1808 Webster was married in Salisbury to Miss Grace Piercer, the daughter of a minister, and he took his bride to Portsmouth to live. Mrs. Webster was a beautiful and refined woman and the home life of Mr. Webster was a very happy one.

Mr. Webster moved from Portsmouth to Boston in the year 1816 and he remained in the city until his death in 1852. He was a man of great energy and his public life was a most successful one.

DO YOU WEAR A FROWNER?

New Woman Has a New Wrinkle to Cure Wrinkles.

In the halcyon days of the south, when there was no object with slaves and fair ladies scorned even to pick up their own handkerchiefs, there was a lady who had a habit of wrinkles—those inevitable markings of Father Time.

The slight points of difference in these racing machines—points, apparently so slight that even those fairly familiar with the construction of the motor which is the subject of the article in this issue from the New York Herald are tickled by it.

At the fashionable shops of large cities frowners are now as regularly on sale as almost any other accessories of the toilet. Many, however, prefer to make them at home, a process simple and inexpensive.

TIPS FOR LANDLUBBERS

General belief that challenger and defender are more evenly matched than any other two that ever fought out the battle for the trophy.

Suppose then that at the time the first race is called the outer mark is placed east of the starting line, and that the wind is straight from the southward.

Suppose then that at the time the first race is called the outer mark is placed east of the starting line, and that the wind is straight from the southward. This first part of the contest would naturally be a heat to the outer mark, in which case the contestants would have no opportunity of showing their respective merits in the matter of pointing.

Schley and Lemly Together in the Rescue of Greely.

It is not generally remembered that Captain Samuel C. Lemly, junior, advocated getting out of the navy (who will represent the government before the court of inquiry created to look into the great sea fight at Santiago), was a lieutenant on the Thetis under Schley when that distinguished officer commanded the Greely Relief Expedition in 1884.

Lemly was the most studious member of our expedition," comments one of the brave men who went on that perilous undertaking in the Saturday Evening Post.

Lemly was the most studious member of our expedition," comments one of the brave men who went on that perilous undertaking in the Saturday Evening Post. "There were days when we had to move at the cautious rate of about two knots an hour. At such times some of the officers and men begged the tedium by shooting at walrus or at innumerable flocks of little ducks. Elder ducks, brant geese and ptarmigan tempted our sportsmen whenever we were stationary."

RAILROADS' OBLIGATION.

Significant Rulings of the Kentucky Court of Appeals.

A drunken man, in a helpless condition, boarded a freight train on a dark, rainy night, while it was standing in a deep cut, and was immediately ejected from the train and left in the cut by the train crew.

A drunken man, in a helpless condition, boarded a freight train on a dark, rainy night, while it was standing in a deep cut, and was immediately ejected from the train and left in the cut by the train crew. The court held that the railroad company was liable for his death.
