

TALK ON TRADE RELATIONS

Commercial Club Members Listen to Osborne Howes of Boston.

RECIPROcity HIS GENERAL THEME

Canada Especially Favored as a Market and Consequently to Be Given the Benefit of Tariff Reductions.

The monthly meeting of the Commercial club last night brought out about sixty members, who after dinner, listened to speeches by Osborne Howes of the Chamber of Commerce of Boston, John S. Knox and Rev. John Williams of St. Barnabas' church.

Mr. Frank Carpenter acted as toastmaster. Devising the fact that other engagements detained many members from the meeting.

Mr. Osborne Howes took up the question of reciprocity generally and with Canada in particular, saying:

"The industrial condition of the United States has undergone a change. This was shown by the last address of Mr. McKinley at Buffalo, where, reading between the lines, we find that he realized that we have come to the parting of the ways; that we have outgrown the self-contained conditions of the past and that the well-being of our industries depends upon foreign patronage.

In 1893 the trade treaties between European countries expired and in the present tariff plans the object seems to be the exclusion of American wares."

Reciprocity with Canada.

The speaker then came directly to the question of reciprocity with Canada, saying: "At the present time the Canadians are justly dissatisfied with our manner of treating them. They have increased their purchases of our goods within the last twenty years, while, barring gold, silver and copper ores, we buy from them but little more than we did in 1880. They have put upon their free list about half of what they import from the United States and tax the remainder at 45 per cent."

Danger as He Sees It.

"The danger which we have to fear on the side of Canada is this: Unless we can within a reasonable time come to some trade understanding with her, either the Canadian tariff will be made, so far as our products are concerned, in most respects similar to that which we now have in force. In which event our annual sales of \$110,000,000 would drop to half that amount, or through a customs federation established between England and her colonies, English goods will be admitted into Canada almost duty free, while England will impose duties on American products without entering into any competition with the agricultural products of Canada and other English colonies. In that event you in the west would find your great and hitherto constant market in England seriously curtailed. This is the real danger which we should be faced in the future by a friendly trade agreement between Canada and the United States."

About a Greater Omaha.

John R. Knox spoke of "Greater Omaha." He opened his remarks by extending an invitation to those present to attend the meeting called by the Real Estate exchange Thursday evening. In giving a history of the events leading up to the coming meeting he said that the movement originated in a committee appointed by the exchange which investigated the question of taxes in Omaha. This committee found that because of fixed charges no material reduction in taxes can be made without a revolution in the form of government. He read the report of that committee and touched upon the recommendations of John L. Webster. The exchange has endorsed no plan, but desired to bring the matter to the attention of every citizen of the city. He read letters from several cities, showing the result of changes made in the last few years, particularly in Memphis and St. Louis, where the citizens vote upon charter amendments and manage their own affairs. He declared the municipal politics in municipal affairs, but said he desired to see the greatest amount of scientific investigation made by the people before policies are adopted.

Rev. John Williams of St. Barnabas' church, taking as his theme "The Problem of Municipal Government," declared that partisan politics should not be allowed to determine the destinies of the city. Men who own property and who have their business in the city ought to take a deeper interest in its affairs and see to it that its government is given "no capable hands, regardless of politics, creed, race or color."

SUGAR TRUST RAISES PRICE

Gives Local Jobbers Notice of an Advance of Forty Cents Per Hundred.

Another turn has been taken in the sugar war. Last evening the Omaha jobbers were notified of an advance in price of cane sugar of 40 cents per hundredweight. This advance moves the price up to \$4.65.

TO KILL THE DANDRUFF GERM

Is the Only Possible Way of Having a Permanent Cure.

FOR THEFT OF DIAMOND RING

Irvin Barr, Bellboy at the Windsor Hotel, Value of Booty is Disputed.

Irvin Barr, bellboy at the Windsor hotel, was arrested Monday night by Detectives Heelan, Johnson and Plinke on a charge of stealing a diamond ring from Captain P. B. Colville, traveling manager of the Royal Italian band.

Captain Colville sent the boy to his room Monday afternoon to get his grip, as he intended to leave for Denver that night. Shortly after he remembered he had left a diamond ring on the mantel in his room. The landlady went to search for the ring, but it could not be found. Late that evening the police were notified. Captain Colville informed the officers that owing to pressing business he would be compelled to continue his journey to Denver and that if an arrest were made he would not be able to prosecute. "The ring," he said, "is of gold with two diamonds and a ruby. The diamonds are one and one-fourth karat each. It was given to me by the members of the band and I have refused \$250 for it."

CITY COUNCIL PROCEEDINGS

(Continued from First Page.)

1 o'clock a. m. and from the occupation and use of the same by the Burlington for general depot and station purposes.

The ordinance was read and approved by the council and the city clerk was directed to issue the same.

W. G. HOLDREGE, Mayor.

Sheehan Complacently Sarcastical.

Thus the old fight is on again. Attorney Sheehan of the Northwestern is complacent. He said:

"Of course I knew we would not get in on that street so easy as all that, but I did think they would probably wait until the ordinance was passed and then enjoin us. However, we are not worrying. We have them on the hip."

"The scheme of the Burlington is plain, as it is but a repetition of former methods. In the first place, the Thomas Davis Real Estate company is simply the Burlington. I know that to be a fact. Now this company enjoins the council from passing this ordinance and will also enjoin it from passing the new one introduced tonight favoring the Burlington. Thus we will be in the same old place as formerly."

When he learned of the restraining order Mr. Sheehan went to the councilmen who were to be enjoined and promised to see them through if they went ahead and passed it regardless. He said that he did not believe the court could fine them for contempt, anyway, as it was a case of the judicial factor of government assuming authority over the legislative. However, if the councilmen get in trouble over it he would pay their fines.

Some of the members were ready to do this, but others balked at the idea of getting mixed up with the court and then when Whitehorn refused to report on the ordinance, the council adjourned without any effort was used.

Market House Resolution.

Further progress was made in the market house and site proposition by the unanimous passage of a resolution by Mr. Mount asking for proposals, as follows:

Resolved, by the city council, the mayor concurring, that the city clerk be and he is directed to call for proposals for a market house upon 10 o'clock a. m. December 10, 1901, no proposals to be considered with less than 34,888 square feet, or 125,000 cubic feet, and to be located in the city of Omaha to reserve right to reject any and all proposals.

In this connection the judiciary committee, to which was referred the matter of the Jackson street site, asked for thirty days more in which to consider it. This was granted.

Inspector Carter reported that he could see no necessity of painting the tower of the city hall, but recommended painting the iron work and repairing the leaks in the roof.

L. F. A. Gavin announced himself as claiming a fee of \$100 for the city for personal injuries resulting from stepping into a hole in a sidewalk on the south side of Hamilton street between Forty-fifth and Forty-sixth streets.

Mayor Moores vetoed the proposition to build a bridge across Iard street near Forty-third street and was sustained.

Claim of an Automobile.

Mrs. F. J. Cellman asked the city to pay the bill for repairs for her automobile for injuries said to have been sustained in running into a deep hole in the asphalt pavement on Sixteenth street near Chicago on July 1. She stated that the rear sprocket was wrenched from the frame, costing her \$25 to have the damage repaired. The matter was referred to the finance and claims committee.

Mayor Moores approved the contracts and bonds for curbing and paving Lafayette avenue between Fortieth and Forty-second streets and Twenty-first from Binney to Wirt, also the resolution ordering the pavement of the intersection of Dodge and Twenty-fourth streets, the reconstruction of the Thirtieth street viaduct and confining judgment in favor of Redick Bros. for \$480.35 in a sewer tax suit.

NO FREE GUNS FOR CADETS

Omaha Does Not Comply with the Regulations of the United States Army.

AFFAIRS AT SOUTH OMAHA

Ordinance Providing for Board of Health Ready to Be Signed.

WILL CONTROL CITY SANITARY AFFAIRS

New Body to Have Charge of the Enforcement of Ordinances and Regulations for the Control of Disease.

Within a few days South Omaha will have a regularly constituted Board of Health. An ordinance providing for such a board was passed Monday night by the council and will become a law soon after it is signed by the mayor and published according to law. This board is to consist of the mayor, president of the council, city physician, sanitary inspector and two resident freeholders. The resident freeholder members shall be appointed by the mayor and hold office during the term of the appointive power. These members may, however, be removed at the pleasure of the mayor. The two appointive members will receive \$1 for each regular or called meeting. Regular meetings of the board will be held once each month, but adjournment from time to time may be made. Under this ordinance the Board of Health and the sanitary inspector are charged with enforcing the sanitary laws of the city. Power is given the board to procure or erect suitable buildings for the purpose of isolating patients.

Mayor Kelly has not intimated as yet who he will name as the two appointive members of the board. He expects to secure the services of well known business men.

With the Board of Health ordinance comes the ordinance creating the office of city physician. It is understood that the mayor will name Dr. C. E. Sapp for this place. The compensation is \$600 per annum and a bond of \$5,000 must be given. This bond is to be in full security and the city will pay the premium. The city physician is to attend all calls from police headquarters and attend those injured in accidents. He shall, according to the ordinance, be at all times subject to the orders of the Board of Health.

"The appointment of a city physician is really a public necessity," said Mayor Kelly yesterday. "Last year the city was forced to spend a considerable amount of money in caring for smallpox patients and now we think that we can do better by having a city physician a stated salary and have him look after all contagious and infectious diseases."

One of the first duties of the Board of Health after it organizes will be the securing of suitable quarters for a pesthouse. Mayor Kelly favors erecting a galvanized iron structure in some locality where there will be no interference and still be accessible to the city physician and the sanitary inspector. A site on the bluffs near the river has been suggested and this is being favorably considered by the mayor and the sanitary inspector.

As soon as the ordinance mentioned have been published the mayor will make his appointments and by the first of next week the board will be organized.

Committee Wants Advice

Some time ago an ordinance was introduced in the council providing for the parking of Twenty-second and Twenty-third streets. The ordinance was to be parked from F street on the north to L street on the south, while the parking on Twenty-third street was to extend from the northern city limits to J street.

Mr. Martin of the council in holding back this ordinance until he can obtain an expression of the property owners. As to the parking of Twenty-third street, he has no objection, as he considers that it will improve the looks of the street and tend to beautify the most desirable residence districts in the city.

This ordinance declares that the curb lines of the streets in question shall be placed twenty-four feet from the lot lines. While Twenty-third street is eighty feet in width, Twenty-second street is only thirty-six feet wide, and Chairman Martin thinks that to set the curb line on twenty-four feet would make the street look like an alley. Mr. Martin asks for an expression from the property owners on Twenty-second street before he reports on the ordinance.

Stopping Grading Operations.

Yesterday Winston Bros. of Minneapolis ceased grading operations on the Elkhorn work in the northwestern part of the city. Local grading contractors will continue work as long as the good weather lasts. It was stated yesterday that the city had done this winter to remove the 30,000 yards of dirt, which caved in the big fill near Forty-fourth street until spring. Stone-masons have completed the construction of the two big piers at the boulevard crossing and now a force is at the north approach of the Thirty-sixth viaduct. The south approach has already been graded and with good weather the north approach will soon be completed. Some of the steel spans for this Thirty-sixth street viaduct on the ground and as soon as the balance of the material arrives the work of setting the spans will commence.

Confusion About Cars.

Since the Missouri avenue car line has been opened and the cars run on the tracks used by the Sherman avenue line there has been some confusion, especially at night. It has been suggested that the street car company provide the Missouri avenue and Albright lines with either blue or green headlights to distinguish them from regular Omaha trains. The service on the new line is giving entire satisfaction to the residents in the eastern part of the city.

Councilman Miller Indignant.

Councilman August Miller is wearing a worried look again. This time it is because he says too many of the city officials spend nearly all of their time hunting. Mr. Miller said: "The street commissioner is never to be found and there is plenty of work for him to do just now. The papers say that Chief Mitchell is away on another hunting expedition. At the next meeting of the council I shall certainly make a recommendation that the hunting business be cut out and that the officials attend to their duties or else deductions be made from their pay at the end of the month."

Want Police Protection.

Residents in the vicinity of Twentieth and Missouri avenue desire the services of a policeman at nights to protect property in the neighborhood. It is asserted that a crowd of boys break into the schoolhouse, jump on and off cars and annoy other people in that vicinity. Mayor Kelly said that he has not a sufficient number of policemen just now to warrant the sending of an officer over there every night. He will, however, do the best he can to abate the nuisance.

Magie City Gossip.

D. J. Campbell, who was seriously injured a few days ago, was resting easily yesterday. Nebraska lodge of the Workmen will initiate a large number of candidates tonight. Warrants were drawn by the city clerk yesterday for the pay of the members of the election board.

City Attorney Lumber Spent Yesterday.

In Lincoln, appearing before the supreme court with a writ in certain cases. Members of the finance committee of the council expect to file the refunding bonds at an early date, as several buyers are

MORE TRACKS FOR JOBBERS

Explanation Given of the Outcome of the Eighth Street Fight.

NORTHWESTERN PEOPLE ARE SATISFIED

Say They Have Wrung from the Burlington Control of the Entrance to the Wholesaler District of Omaha.

"The settlement of the Eighth street trackage fight between the Minneapolis & Omaha tracks and the Burlington in favor of the former," says a Northwestern traffic official, "means that the Burlington will lose a practical monopoly of the freight traffic of the wholesale district, which it has enjoyed so long, especially in carload shipments. Heretofore the Burlington has been the only carrier directly serving the Minneapolis & Omaha tracks. It means that there will be competition. Instead of being compelled to use the Burlington exclusively or haul freight in wagons for long distances in order to reach other roads, the wholesalers and jobbers of the section tributary to Eighth street now have the choice of two roads, both of which offer the same service and facilities. The object of the Northwestern in getting into this territory was primarily to benefit itself, but a great benefit will come to the wholesalers and jobbers as well, and a portion of the district will be built up to a far greater extent than if one road enjoyed a monopoly of the trackage rights."

Burlington freight officials refused to discuss the matter, claiming to know nothing about the settlement of the matter at issue. Traffic Arrangement Denied.

All knowledge of a traffic arrangement, existing or to be made, between the Elkhorn and the Union Pacific whereby the latter will use the former's tracks between South Omaha and Irvington in making up Omaha freights and saving eleven miles, is disclaimed by the officials of both roads. Stories to this effect have been printed several times since the Elkhorn commenced to build its Union Pacific connecting track near the northern limits of South Omaha. At President Burr's office it was said that nothing was known there of a traffic agreement other than the present one providing for an interchange of South Omaha traffic. A similar statement was made at the Elkhorn headquarters.

Facilitating Switching.

The work of installing the telephone system in the union station passenger yards in connection with the interlocking switch signal system is under way. Telephones will be placed in the east and west end operating towers and also in the new office of the yard foreman, which will be located opposite the station. The work of switching and getting trains in and out of the yards will be greatly facilitated by the installation of the telephones.

STARVED TO DEATH.

Help That Came Too Late.

Various diseases of heart, liver, lungs, kidneys, blood, etc., cured by "Golden Medical Discovery," are diseases which had their origin in the disease of the stomach and other organs of digestion and nutrition. When the cause of disease was cured in the stomach, the effects of the disease were cured in the other organs.

When a medicine is offered as "blood-making" or "strength-giving," ask yourself: Out of what is blood made and what is the source of physical strength? Blood may properly be said to be only digested food. Food is the source of all strength when, by the digestive processes, it is converted into blood, which is the life of the body. No medicine can make a drop of blood. No medicine can give an ounce of strength. Blood and strength must come from food, and the only sense in which Dr. Pierce's Golden Medical Discovery is called a blood-making and strength-giving medicine is in that it

It takes time to ask you to allow me to thank you for the good your medicine has done me," writes Mrs. Francis Johnson, of Dresden, Pettis Co., Mo. "I am more than glad to tell you I have better health now than ever before. After using three bottles of Doctor Pierce's Golden Medical Discovery, one of 'Fowler's Prescription' and one vial of Dr. Pierce's Pleasant Pellets, I am strong and hearty. I have no more bad spells; no more weakness. I feel like a new woman altogether. I have lived much longer in the condition I was in if I had not seen that advertisement just in time to save my life. Thanks to you, and I thank God for letting my eyes look on your advertisement. I am continually telling my friends I would not have been living if I had not been for Dr. Pierce's medicines."

What "Golden Medical Discovery" does for the diseased stomach in advanced life, it does for youth and for men and women at every stage of life's progress. It makes the "weak" stomach strong. It enables the perfect digestion and assimilation of food, so that the body is made strong in the one possible way—by food properly digested and perfectly assimilated.

Acting through the stomach and blood, Dr. Pierce's Golden Medical Discovery reaches every organ of the body. It strengthens the "weak" heart—acts up the sluggish liver, heals the inflamed lung tissues, stimulates the kidneys, and brings all the physical organs into harmonious action. It cures biliousness, and the headache and lassitude which are common to bilious people. It builds up the body with sound flesh and solid muscle.

Sick people are invited to consult Dr. Pierce, by letter, free. All correspondence is held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

Sometimes the dealer tempted by the little more profit paid by the sale of less meritorious medicines, will endeavor to sell the customer some improved remedy as being "just as good" as Dr. Pierce's Golden Medical Discovery. Judged by its cures there is no medicine as good for disease of the stomach as "Golden Medical Discovery."

IT IS SENT FREE. Dr. Pierce's Common Sense Medical Adviser is sent free on receipt of stamps to cover expense of mailing only. Send 21 one-cent stamps for the book in paper covers; or 31 stamps for the cloth-bound edition. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Golden Medical Discovery is not offered as a "cure-all." It does cure a great many different diseases, but a study of these cures shows that the
