RESELDING OF THE RANCES

Railroads to Take Up a Work of Vast Impertance to the West.

GOVERNMENT CO-OPERATION REQUIRED

Plans Outlined Which Will Be Taken Up in the Early Spring-Large Tracts of Land Set Aside for the Purpose.

It has fust leaked out from railroad sources in this city that a plan is now on and \$3.50. foot which contemplates the ultimate resceding of all the western ranges. The preliminary portion of the scheme, itself a knee pants suits, sizes 8 to 16, at \$1.50 and work of great magnitude, involves exten- \$2.95. sive experimenting with the cultivation of different range grass seeds, with a view to determining those best suited to the pur-

sance and many ramifications. Should it is the assortment of superior values for the be carried to a successful issue, the ranges | holiday buying. of Nebraska, Wyoming, Montana, Utah, Nevada and Idaho will be vastly affected. If found, the different railroads most interested in these territories will go to any Peasonable extent in furthering the plant. However, a condition necessary to any extensive promotion of the scheme by the railroads has been plainly stated by them to be the hearty co-operation of the government, to be given as soon as the possibuity of success has been demonstrated by the experimenting of the rallways inter-

rigation, in the opinion of the ratiroad on each warrant. Mr. Burgess has written men, is this scheme for reaccding, because principals a letter stating that warrants it will, if carried out, be far more extensive may be secured Friday afternoon and that In its scope and in the benefits resulting brokers will be at the city hall at that from its adoption. The territory available | lime who will pay face value for the warfor the application of irrigation methods rants. is limited, because of the existence of a definite limit to the supply of water ob. that Omaha school warrants are being tainable either by tapping streams or by shaved," said Mr. Burgess. "Our warrants accumulation in reservoirs. The territory are worth their face and no broker should for reseeding is limited only by the extent attempt to secure a commission on them. of the ranges of the west.

Work Begins to Spring

The entire plan, though still in embryo as to execution, is said to be now so fully planned in all its particulars that the actual working out of the first step will Mr. Robson's production of this piece is one begin with early spring. This is the ex- of the most elaborate, scenically, that has perimental part and it is believed that R. ever visited Omaha. Mr. Robson's clever C. Judson, industrial agent of the Oregon | work as Clarence, the actor, in "The Royal Railroad & Navigation company, will con- Box" two seasons ago commends him to duct this feature. Mr. Judson was in Omaha last Saturday visiting the managerial and vehicle, he has been having phenominal freight traffic departments of the different railroad headquarters, and had this matter under discussion at the time. He is in charge of an experimental farm of this pature for the Oregon Railroad & Navigais already making a careful preliminary investigation along the line suggested.

Inquiry at the same traffic and managerial offices which Mr. Judson visited, however, any knowledge of the matter. However, it ern ranges have in the last few years been pear in a four-round boxing contest with measurably impoverished and injured by overcrowding with herds. Sheep especially have been the cause of the trouble, as they not dig out with their sharp teeth they punch in with their equally keen hoofs, and if they are bunched to certain extent beyond stroy all growth save the sage brush.

As a result of this deterioration of the and up. ranges, in many places it now requires double as many acres a year to provide fodder for one sheep as formerly. The fondest dream of the railroads concerning the realization of this project are that the per ore of the Rambler mine on Douglas ranges will be so improved that even a creek and Rambier stock has been advanced less number than originally will provide to four thousand dollars a share. for a sheep a whole year or twelve for one

Outline of the Plan.

following plan has been determined upon: can still be purchased. A spot in some centrally located section of The Laramie, Hahns Peak & Pacific railthe range country will be isolated by fenc- way is building toward these great propering. Some 2,000 or 3,000 acres will thus ties, the outputs from which will alone pay be separated, and this will be divided into dividends on its common stock, now selling twenty or thirty plots for the trying out at two dollars a share. Investigate at once.

M. J. Greevy, representing Isaac Van Horn

that will be to the ranges of the west ation, 414 Bee building. what blue grass is to the south, something permanent, luxuriant and hardy. To this end tropic grasses will be largely tested. and many classes of seeds from Africa and other torrid lands have already been received. There is almost no limit to the varieties of grasses growing last summer.

flourishing of the grass will be considered. Though the first essential will be to discover a plant that will prosper with the limited moisture contained in the slight rain and snowfall of the mountain and plain regions, will next be necessary to have a grass that bears sufficient nutrition for the stock and that is not too expensive. All three elements will be weighed in the final choice. Once found the work will then be to seed the whole range.

In all this the co-operation of the govern ment will be demanded at every step. First the government must give permission for the fencing off of two or three sections of land. Of all the grant lands which comprise so much of the ranges everywhere the government owns alternate sections. Next, for the holidays. when come grass or series of grasses has been proved a success by the experiments of the railroads the government will be asked to make an extensive appropriation for the purchase and sowing of the seed throughout the range country.

This will mean an enormous work, but each passing year renders it more imperative. The experiment station may be started the coming spring, though in what state has not yet been decided. That part of the work completed, however, the greatest difficulty to be encountered will be the securing of protection of the ranges to be seeded. This is a vast problem, as it in-Volves such a great extent of land. It is anticipated that Uncle Sam will bring his 3 authority to bear in this matter also and i put a stop to the overcrowding by sheep that is so disastrous.

Along this line the government, through the Agricultural department, has already done a large amount of work and grasses from all parts of the world have been tried in the effort to find the one which is particularly adapted to each particular section. and for this reason no doubt is expressed that active co-operation with the railroads will be secured.

Everybody who has seen our stock of toys says it is the best and largest in the

The Holiday Display!!!

The holiday display here is a vision of beauty. One beholds it in bewilderment, and to resist its witchery is to obstinately close one's eyes to irresistible delight that will remain a pleasant memory of days to come. The exhibit is so diversified by creations of a practical and an artistic nature that the most divergent fancies will be captivated by it. Thus the problem of choosing appropriate gifts for both men and women is very much simplified.
