

THE OMAHA DAILY BEE

E. ROSEWATER, EDITOR. PUBLISHED EVERY MORNING.

TERMS OF SUBSCRIPTION. Daily Bee (without Sunday), One Year, \$2.00...

DELIVERED BY CARRIER. Daily Bee (without Sunday), per copy, 12c...

OFFICES. Omaha—The Bee Building, South Omaha—City Hall Building, Twenty-ninth and M Streets...

COMMUNICATIONS. Communications relating to news and editorial matter should be addressed to The Bee Publishing Company, Omaha.

BUSINESS LETTERS. Business letters and remittances should be addressed to The Bee Publishing Company, Omaha.

REMITTANCES. Remit by draft, express or postal order, payable to The Bee Publishing Company.

STATEMENT OF CIRCULATION. For the week ending December 31, 1901, as follows: Total, 30,400...

Net total sales, 933,157. Net daily average, 30,101.

Subscribed in this city, 120,000. Subscribed in other parts of the country, 180,000.

Moral for ubiquitous constables: Don't brandish empty revolvers just for the fun of making a bluff.

All great bodies move slowly, but the United States senate moves more slowly than any other great body in the world.

If the street railway company has not furnished 1902 pasteboards to every lawyer in town it has made a serious mistake.

A surplus in the national treasury seems to be attended with almost as much danger as a deficit in the national treasury.

If it is true that General Miles proposes to be a candidate for president in 1904 just to be vindicated, what will Admiral Schley do?

The legislative wheels are again going around at Des Moines, and Iowa may prepare for the usual biennial enlargement of its statute books.

Jury bribing may flourish in Omaha, but if so a bar committee will hardly be expected to ferret it out.

Judge Baker reads his title clear now and the governor will soon be in position to comply with the request of the Bar association by issuing a judicial commission to the man of its choice.

The president of France is to return the recent visit of the czar of Russia. It would never do for France to allow its neighbor, Germany, to believe that the calling acquaintance with Russia had been broken off.

To get full benefit out of her western tour Helen Gould should realize better that the west furnishes the substantial foundation of her fortune and in all equity should have a larger share in distribution of her favor.

When Joseph Chamberlain hears that Webster Davis is after him he will cease to worry about what the German chancellor may say about him.

We read that President MacLean of the Iowa State university has expressed himself as favoring the practice of congregations applauding the sermons that they like.

The republican press of Nebraska is talking loud enough to make itself heard in the woods of Louisiana.

The Park Commissioner Cornish has put himself outside the pale by refusing to join in acclaim to the consolidation scheme of the five eminent lawyers who propose to relieve the people of Omaha of the necessity of governing themselves.

The Taxpayers' league of South Omaha has done some effective work in calling a halt on school board crookedness and extravagance.

A fire coroner might furnish a soft berth for somebody, but where is another city of Omaha's size that enjoys this luxury?

The parents of more than 2,000 children now attending the parish schools are not only compelled to pay for their textbooks, but also for their tuition.

ARE PRESIDENTS OVERTASKED.

Up to this time President Roosevelt has not intimated what he thinks of the suggestion of ex-Senator Chandler for a reform in the method of conducting executive business at the White House.

Senator Chandler insists that "the time has come when access to the president, except at public receptions, should be limited to cabinet ministers, senators, representatives and ambassadors."

President Roosevelt is the most democratic of American presidents. He believes that a president should be accessible to every citizen of the republic.

Senator Chandler's assertion that President Arthur's premature death was chiefly due to the nervous strain to which he was subjected by contact with an irrepresible and continuous stream of importunate office seekers and promiscuous callers is scarcely borne out by the historical facts.

The strain upon our presidents is not much greater than it has been upon other men in public life, notably the governors of states and the mayors of great cities and the heads of large industrial establishments.

A robust man in the prime of life like our present chief executive, endowed with an abnormal capacity for work, is not likely to become a victim to the dismal forecast portrayed by Senator Chandler.

Supervision and control. According to Washington dispatches to the St. Louis Globe-Democrat the visit of Attorney General Douglas of Minnesota to President Roosevelt and Attorney General Knox in regard to the Northern Securities company merger, has developed the fact that both the president and the attorney general are in favor of legislation which will place the railroads of this country under government control.

Attorney General Knox, who is supposed to be the friend, advocate and defender of the trusts, talks openly on the subject and boldly expresses the opinion that unless there is some legislative action in this line the railroads will continue to combine and make financial deals which will prove disastrous to the business and financial interests of the country.

If this forecast proves to be correct national regulation of public carriers will become the paramount issue at no distant day. That publicity and the supervision of corporations engaged in interstate commerce has become imperative for the protection of the financial and commercial interests of the country is conceded by all thoughtful men.

As the main arteries of commerce the railroads come under consideration at the outset. The only question is how far shall the government control and supervision be carried, or, rather, how far can congress be induced to go with government supervision and control of public carriers, even with the backing of the president and his cabinet?

National regulation and supervision that would be limited to mere publicity of railroad statistics would hardly prove satisfactory. Besides publicity there must be restriction that will prevent overcapitalization either by stock-watering, the conversion of stock into bonds, or fraudulent debenture issues on the old Credit Mobilier plan.

Before the railroads consent to such regulation and restriction there will be a lively struggle.

NO GREAT HARDSHIP. The Board of Education has been admonished by the self-styled anti-machine organs that it must reconsider the rule recently adopted under which High school pupils will be compelled to pay for textbooks.

The cost of the first year \$8.55, for the second year \$6.72, for the third year \$8.42 and \$10.40 for the fourth year. In the English course the cost will be \$8.55 for the first year \$4.32 for the second year, \$8.50 for the third year and \$8.65 for the fourth year.

In other words, each graduate from the High school will have to expend for books for the four-year Latin-English term \$32.09 and \$27.51 for the English course.

If these figures hold good for the next four years we apprehend it will work no great hardship upon the patrons of the High school.

As a matter of fact, the classes now in the High school and those on next year's enrollment will have an opportunity to procure their books at a reduction of from 30 to 50 per cent on the price of new books by purchasing from the stock which the board now has on hand.

The furnishing of free textbooks in the High school was not contemplated by the Board of Education when the plan of free textbooks was originally adopted.

It was then the intention to confine the free distribution to grades below the High school, where the majority of children are compelled to terminate their schooling and enter the race for a livelihood.

The parents of more than 2,000 children now attending the parish schools are not only compelled to pay for their textbooks, but also for their tuition, and the parents of the children attending the parish schools belong largely to the poorer classes, and yet no complaint is heard from them and they have not made any effort to secure free textbooks.

It certainly is a much greater hardship upon the poor parents of High school boys to compel them to buy \$10 cadet uniforms than it is to require them to pay from \$5 to \$8 a year for school books.

The taxpayers of Omaha will sustain the board in its effort to bring the expenditures of the board somewhere near its income.

HONEST SILVER DOLLARS. The recent capture by secret service agents of the Treasury department of parties engaged in counterfeiting silver dollars directs public attention to the enormities perpetrated by the United States mints of dishonest silver dollars.

The market value of the metal contained in our silver dollar is now about 45 cents, and the coinage of a full-weight counterfeit silver dollar leaves over 100 per cent profit, including the labor cost of coinage.

The genuine silver dollar contains 900 parts of pure silver and 100 parts of alloy; most of the spurious silver dollars contain 910 parts of silver and 90 parts of alloy.

It goes without saying that millions of counterfeit silver dollars are now in circulation and many millions more are sure to be added unless the coinage laws are changed and a dollar's worth of silver put into each dollar.

The coinage of honest dollars would eventually have to be followed by the recoining of the overvalued silver dollars now in circulation and their exchange for full-weight dollars.

How suddenly President Barnard of the school board has become a bold, bad man in the eyes of the local Peace organs that a little while ago were lauding him to the skies for backing up Reformer Funkhouser in his demand for a grand jury.

CHICAGO'S SCHOOL PROBLEM

The local school revenues are sufficient to pay the expense of the common school system economically administered. The state constitution says: "The general assembly shall provide a thorough and efficient system of free schools whereby all children of this state may receive a good common school education."

There is no authority for the taxation of the people to pay the expense of schools which provide for tuition in branches of science not included in a "good common school education," as it was understood by the men who framed our state constitution.

The Chileans assert that only the efforts of the delegates from that country and the United States to the Pan-American congress prevented the meeting from being a failure.

The democratic members in the Iowa legislature are so few in numbers they have despaired of being able to make any trouble for the republicans.

And now the old Liberty Bell occupies a place of honor on the Charleston exposition grounds. Had the Liberty Bell, with its historic inscription proclaiming liberty throughout the land to all the inhabitants thereof, been exhibited in Charleston forty years ago it would have taken a very strong guard to have kept it from being ground to atoms.

Some idea of the vast sums of money paid out in wages to the steel workers can be gained from the fact that the donation by the workmen at Homestead of half a day's pay to the McKinley Memorial association, amounted to \$10,000.

How suddenly President Barnard of the school board has become a bold, bad man in the eyes of the local Peace organs that a little while ago were lauding him to the skies for backing up Reformer Funkhouser in his demand for a grand jury.

A Melancholy Conundrum. Indianapolis News. If Secretary Shaw eats pie three times a day, what chance will there be for office seekers at his "pie counter"?

"Why Won't He Stay Dead?" Springfield (Mass.) Republican. Mr. Bryan's trip east falls on a deadly dull time in democratic politics, and is causing much talk.

Sinking Up the Situation. Minneapolis Journal. Grover Cleveland, with his usual fondness for the ponderous phrase, writes touchingly to thirty faithful young democrats of Philadelphia regarding "afflictive visitations" that have overtaken the party.

Philippine Idleness and Evil. Minneapolis Journal. Secretary Root's opinion that Satan has his hands full assigning evil tasks to the idle Filipinos. If laws are passed that will open the islands to American capital and business men the Filipino will be kept so busy that he will not have time to plot disorder and rebellion.

Philanthropy of Combines. Baltimore American. James J. Hill is sure that great railroad systems mean nothing but good to the regions through which they pass.

Profits of the Steel Trust. Chicago Chronicle. The profits of the billion-dollar steel trust for the last nine months were \$85,000,000.

Chicago News. Since the announcement of the verdict in the Schley court of inquiry there have been persistent rumors that the friends of Admiral Schley and General Miles are planning to make those gentlemen candidates for the presidency.

IRELAND STILL SHRINKING.

The figures given out by the registrar general show that the decline in Ireland's population continues. By the census of 1901, taken last April, its population was put at 4,456,546, which probably does not vary greatly from the total, say, about 4,450,000.

Between those two years, or in 1846, the number of the population was 8,175,124. That was the culminating point of any census year, for the count of 1851 showed a drop to 6,552,385, and the decline has continued ever since.

When Parrell was making his great fight in favor of home rule for Ireland he declared that in England, Wales and Scotland in 1850 there were at least 750,000 persons of Irish birth, with about 1,500,000 descendants.
