### CONDITION OF OMAHA'S TRADE

Spring Business with Jobbers and Manufacturers New Well Under Way.

PRICES FIRM WITH UPWARD TENDENCY

Groceries in Particular Are Strong, Sugar, Canned Goods, Dried Fruits and Several Other Lines Being Quoted Higher.

Omaha jobbers and manufacturers in practically all lines enjoyed a yery nice trade last week. Attention is now centered in spring business and wholesalers are shipping out an immense amount of spring goods that were bought earlier in the year. In some lines jobbers are looking as far ahead as next fall and have their men on the road taking orders for August and September shipment. There is, of course, some immediate business, but still orders of that kind are rather small, as the season is now so far advanced that retailers do not care to get much stock on hand. According to the reports received from traveling men, dealers, as a general thing, have cleaned out their winter stocks in good shape and for that reason will start into the spring trade with plenty of ready money with which to discount their bills. In view of the mild weather that has been experienced up to this time jobbers consider it a good indication that merchants have been able to dispose of their stocks and it is the general impression that if February should prove to be a cold month there would still be considerable mail order business. It would also help out merchants who bought heavily last fail and who spill have large stocks on hand. Taking the situation as a whole, however, wholesalers and retailers are well satisfied with the trade they have had and are full of condidence for the future.

The market on nearly all lines is in a good, healthy condition and the tendency of prices is upward rather than downward. There have been a few fluctuations in groceries the past week and most of those have been advances, but outside of groceries there have been no important changes in ruling quotations. tobbers and manufacturers in

The grocery market as a whole was very strong and active all last week and jobbers report a very satisfactory trade for this season of the year. One of the most important fluctuations was the advance in sugar, which amounted to 10 cents per 100 pounds. This advance applies to all lines of refined sugars and raws were affected even more than the refined grades, the former having been marked up a full 1/2 cent. It is stated that holders are not at all anxious to sell at present prices and the feeling is very firm, with indications favorable, for still higher prices in the near future.

Sugar Advanced Ten Cents.

In dried fruits there has been little or no In dried fruits there has been little or no change so far as this market is concerned. On the coast, however, higher prices are being asked for nearly all lines and particularly for peaches. The Raisin Growers' association has withdrawn from the market entirely and it is reported that when prices are again offered they will be from 1/2 to 1 cent per pound higher than those that have been in force up to this time. This advance is based on the fact that stocks are lighter than they have been for several years at this season and it is thought there is not enough left to last until the new crop appears.

In coffee there is nothing particularly new to be said, as the market is holding just about steady. Trading, however, is more active than it has been for some little time past. The tea market is also in just about the same position it was a week ago.

The canned goods market is very firm, but the only change of importance since last report is a still further advance in tomatoes.

Beans and oatmeal are being quoted a do pfd...

Beans and oatmeal are being quoted a riffe lower than they were a week ago, but other lines of farinaceous goods are unchanged.

Sisal rope is firmer and higher prices are looked for in the near future. This is owing to the high prices being asked for the raw material and also to the fact that manufacturers are now getting ready to manufacturers are now getting ready to commence the manufacture of binder

twine.

The cheese market firmed up a little last week and those who are well informed predict higher prices owing to the fact that but very few factories are running because of the high price of feed.

Corn syrups advanced sharply last week and clear startly week also replaces. gloss starch was also marked up cent per pound.

Other shaple lines handled by Omaha job-bers are selling in just about the same notches they were a week ago.

#### Early Buyers Now Arriving.

Spring trade with Omaha dry goods jobbers has now opened up in earnest. Quite a few large buyers came on the market last week and as a result house trade assumed a more lively aspect than has been noticed in some time past. More buyers are expected next week and a stendy increase is looked for from now until the height of the season is reached. Stocks in Omaha are larger and more complete than they ever have been before and it is very evident that while the new houses have increased the volume of business transacted in the city that the old houses are also doing a largely increased business. Earlier in the year it was predicted that there would be more buyers on the Omaha market this year than ever before, but the way things look now jobbers say there will be more than anticipated. It is also the general impression that retailers will buy very freely, as trade out through the country ought to be in good shape this spring and summer. Spring trade with Omaha dry goods job-

try ought to be in good shape this spring and summer.

Besides attending to the buyers that are coming on the market jobbers are rushing out their advance orders, of which they have more than ever before. Traveling men are meeting with good success on the road, so that jobbers feel greatly encouraged with the condition of trade in all departments. partments.

So far as the market is concerned there have been no changes worthy of mention in either cotton or woolen goods. The cotton market may be said to be strong and at this early period there is no grounds for predicting lower prices. On the contrary advances are being talked of on some desirable lines.

#### Active Leather Goods Trade.

Active Leather Goods Trade.

Leather goods jobbers also report a very satisfactory trade. They are getting quite a few sizing up orders and it now looks as though retaliers would be able to clean up their stocks in good shape. At the present time jobbers are shipping out their advance orders and find it a bigger job than usual, as they took more advance orders this year than ever before. Traveling men are making their usual rounds and speak very encouragingly of the prospects for the future. The most noticeable feature of the future. The most noticeable feature of the future. MOVEMENTS OF STOCKS AND BONDS

Slight Weakness Brought About by Professional Profit-Taking.

NEW YORK, Jan. 25.—The weakness of today's stock market was about as narrow as the recent show of strength and seemed equally due to professional operators who took their profits in specialties that have advanced recently. Sugar, Metropolitan Street Railway, Cleveland, Cincinnati, Chicago & St. Louis and Amalgamated Copper were all thur affected, the last showing good power of absorption. New York Central was depressed by the coroner's verdict holding its officials responsible for the Park avenue tunnel disaster. There were shafp advances in Rutland preferred, St. Lawrence & Adirondack, Peoria & Eastern, Chicago & Eastern Illinois and the National Lead stocks, the last on the announced advance in the price of lead. The decline on the bank statement was probably due to its failure to attract any buying to absorb the profit-taking. The gain in cash was fully up to expectations. The market closed active and easy at about the low point.

The business in the bond market has

low point.
The business in the bond market has The business in the bond market has been larger in proportion than stocks, and many long dormant issues have become active at advancing prices. United States refunding 2s, the 3s, registered, and the new 4s advanced ½ and the old 4s ½ per cent. The 5s, registered, declined ½ and 5s, coupon, ½ from the closing call of last week. unless there was a little weakness on the extreme close.

Receipts for the week were heavy, a gain having been made both over the previous week and also over the corresponding week of last year. The tendency of the market was downward until Wednesday, which was the low day, and since that time prices have improved, but still the week closed with the average cost right around a dime lower than it was at the close of last week. Representative sales:

COMMERCIAL AND FINANCIAL

about steady with yesterday. The supply for the week has been liberal, both as compared with last week and also with the corresponding week of last year. That fact gave buyers some excuse for pounding the market and they were not slow about making use of the opportunity. The decline seems to have been rather, uneven and applies to all kinds. In some cases sales were made toward the close of the week that were not more than logible lower, while others were 15g25c lower than the same kinds sold for at the close of last week. Packers, however, seemed to be anxious for supplies, but they did not like the idea of paying more than Chicago prices for what they got, which, they claim, they have been doing a good share, of the time.

Very few feeders arrived on the market this week and the demand was sufficient to take what did come in at good, steady to strong prices.

Quotations: Choice lightweight yearlings. All Cereals Close Lower, but Previsions Rule Steady.

DECIDED SLUMP IN GRAIN PRICES

Improved Conditions in Winter Wheat Belt and Volume of Long Corn Poured Into Market the Leading Features.

CHICAGO, Jan. 25.—Reported improved conditions in the winter wheat belt, together with the decided slump in corn, caused an unmerciful hammering of the wheat market today and May wheat closed with a loss of 1½61½c at 75½c. Corn was in a worse dilemma than wheat and closed 1½c lower for May. Liquidation by the built clique, apparently to secure profits, caused the break. Oats closed ½c lower, in sympathy with the other grains. Provisions ruled steady throughout the session.

Wheat started fairly steady, mainly on the sharp railly at Liverpool, which was quoted ¾d higher. Light domestic receipts, coupled with the closing irmness of yesterday, induced considerable buying, under which May opened unchanged to ½c higher at 75½675½c to 75½c. There was not enough buying to carry the market up to any great extent and after May had touched 75½c reports of a generous snowfall throughout the southwest, where the winter wheat has been threatened with damage, developed a decided bearish sentiment and the slight advance was soon lost. A rumor that the advance at Liverpool was due to the fact that a 3c duty-was likely to be imposed on the other side, coupled with a decided slump in the price of corn, started a selling movement that forced the price of May down to 78c. The execution of stoploss orders also helped the decline. There was little demand during the break, except from shorts, who bought sparingly to secure profits. A few minutes at the end of the session a fairly good demand from the country brought about a slight upturn, but the improvement was short lived and the market closed weak, within ½c of the bottom price of the day, at 73½c for May. Chicago received 32 cars, two of contract grade. Minneapolis and Duiuth received 41 cars, compared with 245 for the same day last year. Total receips at western primary-markets were 43,000 bu, against 40,000 a year ago. Seaboard clearances of wheat and flour were equal to 24,000 bu. Small western offerings and an advance of ¾d at Liverpool gave country in the price of the sellin to take what did come in at good, steady to strong prices.

sistent selling. Trade was mainly in July, one northwestern broker buying at least 7,000,000 bu. May opened 14624c higher at 4564514c and declined to 44c at the close. Receipts were light, 107 cars, with 14 contract.

Provisions were comparatively steady while the grain markets were going through their liquidating experience. Business was dull and a reduction in the hog receipts put a check on the desire to sell. May pork closed loc lower at \$16.3745, May lard practically unchanged at \$9.50 and May ribs 21/5c lower at \$8.55.

Estimated receipts for Monday: Wheat, 30 cars; corn, 65 cars; oats, 115 cars; hogs, 41,000 head.

## A CHANCE TO WIN A FORTUNE.

The Oil Fields of Texas and California Yielding Great Returns to Investors-An Opportunity of a Lifetime.

NORTH AMERICAN CRUDE OIL COMPANY, COMPOSED OF MEN OF NATIONAL REPUTATION, MAKING GREAT PROGRESS.

great oil fields gives promise of enormous returns.

This company's well on its California land is down 300 feet, so close to producing wells that oil in quantities is aimost a certainty. It is drilling also on its Spindle Top, Tex., property, where a gusher is guaranteed. The moment either one of these wells "comes in" North American Crude Oil company's stock will go up with a rush. To get it pow at 60c per share is the chance of a lifetime.

Recently the North American Crude Oil company formed an alliance with the Fuel

A great financier once said: "Vigilance in watching opportunity; tact and doing in seizing opportunity: force and persistence in crowding opportunity to its utmost of possible achievement—these are the martial virtues which must command success." No greater opportunity was ever presented to the American people than the wonderful of fields of Texas and California. Just think of gushers spouting forth \$0,000 barrels of oil per day being a common thing on Spindle Top Heights. An opportunity is the offer of the treasury stock of the North most large of it. This great opportunity is the offer of the treasury stock of the North American Crude oll company at 60° cents per share. There is no other oil company at 60° cents per share. There is no investment in the United States today which is more certain to bring results than an investment in this company. There is no other oil company in this country, with the strength and prospects of the North American Crude oll company in this country, with the strength and prospects of the North American Crude oll company in this country, with the strength and prospects of the North American Crude oll company in this country, with the strength and positively monastessable. The company in this country, with the strength and positively non-assessable. The company is fully paid and positively non-assessable. The company has acquired the oil rights of 5,000 acres of land upon twenty-year leases in the oil belt in Sonoma, Santa Clara and Santa Chara and
