Astual Cause of Indian Famine Disc'ssed by a Missionary.

SAYS AMERICANS ARE BADLY DECEIVED

Declares It is Rapacity of Money Lenders that Causes the Suffering of the Poor Cianaca.

OAKLAND, Cal., Feb. 8 .- Dr. Maud Allen, formerly of Portland, Cre., a medical missionary from India, who arrived today on the steamer Doric after an absence o exalted ruler of the order. Whatever is seven years, says that it is foolish for the American people to send ships full of wheat for the succor of the famine sufferers, because there never is any real dearth of cereals in that empire. It is the rapacity of the money lenders that starves the suffering natives, at the same time that India is actually exporting wheat to other countries

"There is a class of men there called "banyas," said Dr. Allen, "who are the owners of the money and have no compute tion about charging the highest price for the use of their money. Hundreds may be starving around them, but they are unmoved. They get a 'corner' on the product of the farmers just as is done in America. If there is a failure of crops in one province, the price of wheat goes to a price that makes it prohibitive to the people of the stricken district.

Wages on Starving Standard.

"The wages are so small that it is impossible for the natives to save anything and they are always at the mercy of the banyas. tients and they escaped. It was formerly The banyas control the farmers of the prosperous district, too, to such an extent that they can fix the price at which the product of the fields must be sold. The

farmer is always in debt to these men. "It is the want of money and not the want of wheat that brings so much suffering. There have been two famines during my stay in India, but they have been con fined to certain districts. The rest of India could supply these districts with wheat, for the warehouses are full, if the people had the money to buy it.

"We have often wondered why the American people did not know this condition existed. We have been amused at it ourselves. Of course the wheat is distributed,

but where does a shipload of wheat go with a hundred thousand starving people?" Why does not the government interfere

when it sees thousands starving and dying of hunger?" Dr. Allen was asked. "Because the government is afraid of an

other Indian mutiny. To interfere with the banyas would mean an uprising that would cost thousands of English lives, for they are the all-powerful class. The government cannot force them to give away their wheat. It tried awhile ago to clean out a village that was infected with the plague,

An Ideal Medicine

A New Discovery Which Cures All Forms of Catarrh.

The tablet is the ideal form in which to administer medicine, but until recently no successful catarrh tablet had ever been ttempted. There is now, however, an ex-

cellent and palatable remedy for catarrh in tablet form, known as Stuart's Catarrh Tablets and sold by druggists, composed of the most recent discoveries in medicine for cure of catarrh and results from their

use have been nighly gratifying. The old time treatment of catarrh was in the form of inhalers, washes, douches, sprays, etc. Later on internal remedies were used with greater success, but being in liquid or powder form were inconvenient to use and like all medicines in liquid or powder form, lose their medicinal properties when opened or exposed to the air.

Stuart's Catarrh Tablets contain highly concentrated antiseptics, Red Gum, Blood Root, etc., which kill the catarrh germs in the blood and mucous membrane, and in this respect are strictly scientific and modern, because all authorities are now agreed

case, and local applications can have only a transitory effect

The use of inhalers, douches and sprays is a nuisance and inconvenience and can tim no wise compare favorably with the same antiseptics given in tablet form internally, where they can reach the stomach and

blood and kill catarrh germs right where A prominent lawyer and public speaker

Were these persons who so dominated and dictated high office holders with the public service corporations?"

City Attorney Connell objected to this. but before his objection could be stated the witness answered, "Yes, sir."

"Was any question put to the council that morning on which Hascall, Karr, Treatler, Whitehorn and Mount did not vote on the same side ?" resumed Attorney McIntosh.

"No, air." "They rushed the thing right through, did they not, so as to close the matter up and get it into the records as soon as pos
