BULLISH CROP REPORTS GIVE FIRM TONE

Vheat and Corn, However, Close Only Slightly Higher-Oats Fall a Fraction and Provisions Rule Lower.

CHICAGO, March 5.—Speculation on the Board of Trade was again dull today. Fluctuations were over a narrow range, and though the tone ruled firm the greater and though the tone ruled first the greater part of the day on builtsh crop reports the close showed May wheat and May corn only 1654c higher and May oats 1464c lower. Provisions closed 74620c lower. Wheat builts had fair encouragement close showed May wheat and May corn only 16% to liver. Provisions closed 71600 clower.

Wheat buils had fair encouragement soon after the opening. Cables only slightly higher, but northwestern receipts were much reduced. Added to this was the builish factor of dry weather reports from the southwest. The effect of the early builish surroundings was not felt with full force until nearly an hour after the opening. Trade in general was slack, but the crop conditions finally awakened buyers from the country. The southwestern markets were active, St. Louis advancing May prices Ic May here opened a shade lower to unchanged at 75% to 75% 75%, and gradually advanced to 75%. Shorts had covered to some extent, though many speculators paid little attention to the damage reports. The small receipts in the northwest started the story that the crop yield had been over-estimated. Elevator stocks there were decreasing and new estimates were made that the crop would be nearer 185,000,000 to 175,000,000 bunhels than 200,000.000. There was no prospect of moisture in the southwestern states, but the prices that had been built on this basis did not hold when Ilguidation began near the close. May cased barely firm at 75%. Receipts, 37 cars, 3 contract. Minneapoins and Duluh reported 213 cars, a total for the three points of 250 cars, against 607,000 last year. Seaboard clearances equaled \$1,000 bushels.

Corn was given some support by the local builts and prices ruled strong for a time. Duliness. however, characterized the trade in general. St. Louis did some buying here and helped early and even increased receipts had little effect, as traders were confidently expecting a failing off farmers' offerings. May opened a shade lower to a shade higher at 65% to 05%c. Foreign markets were rather indifferent to our advances, cables being about steady. The southwest was still builts, the cash demand improved a little and the same people who bought yesterday renewed business. But the steam biew off the market on duliness and late liquidation

Trading is Worried Somewhat Over the Money Outlook.

Trading is Werried Semental Over the Memory Outlook and the acute weakness with which the trading ended last night was overcome after a time. It was in evidence during the morning, but the market gradually settled back into its recent condition of duliness and spottiness, the specialties again coming to the front. There were some fairly sensational gains here, were some degree, most of the supplies which was dreaded yesterday as a result of the unexpectedly heavy demands converged upon the New York market. The calling of subscriptions to the San Francisco traction merger proved a relieving force to some degree, instead of agray and their remittances to New York in resigners are subscribers to the syndicate, and their remittances to New York in resignary demand for gold. No further actual engagements of gold were made today and not all the gold that was expected was packed for tomorrow's steamer. It is not a forced supposition also that the subtreasury for telegraphic transfer to San Francisco. The movement to San Francisco has some puzzling features about it, and the applications to the Washington of the subtreasury for telegraphic transfer to San Francisco are surmised to other possible demands. Money in London was appreciably easier today, and sterling at Parls rose a fraction. Both of these movements are an index of relaxed pressure for gold upon New York. The question of further exports this week beyond the shipment of \$1,500,000 by tomorrow's steamer and the surface and the fourth week of Pebruary and by confident assurance

LONDON, March 5.—The indications to-day pointed to easier money. The money was paying off loans to the Bank of England; supplies were more plentiful and discounts were sympathetically easier. Business on the Stock exchange began quiet, with prices fairly steady. The money indications favored high-class securities. Home rails started with a slight improvement and then reacted. Americans opened weak and below parity, and owing to lack of support remained idle and closed quiet, Spanish 4s and Rio tintos declined. Copper was steady at 54%. Grand Trunks were one of the first sections, though they eased on realizations. Kaffirs were depressed during the early part of the day, but were more strong later. Gold premiums are quoted as follows: Buenos Ayres, 141.90; Madrid, 37. Lisbon, 20; Rome, 2.37.

PARIS, March 5.—Prices on the bourse today opened firm. Banks, Suez canal and Metropolitans were favored. There was very little change today in the prices paid for bulls, veal calves and stags. The better grades sold freely, but common kinds were not in particularly good demand.

Stockers and feeders showing quality and fiesh were picked up in good season today at fully steady prices. Common stuff, however, was not in very good demand, owing to the fact that there have not been very many country buyers on the market so far this week, and speculators were a little cautious about getting loaded up too heavily with cattle, and particularly with common kinds.
