At High Rate of Speed.

The ill-fated train left San Antonio at noon Thursday and at the time the acci-Sent occurred was running at a high rate of speed in order to make up time. The road at the point where the wreck occurred is in a rough country, the curves being sharp and the grades heavy. It was when ing a curve that the train left the gound track, it is said, on account of a broken

The hour was 3 a. m. fifteen hours afte the train had left San Antonio, showing that it was still behind time. All the pas sengers were asleep and the shock that followed was the first intimation they had of the danger. The train was going at such a rate of speed that the tender and engine landed seventy-five feat from where they left the tracks. The cars behind piled against the engine, caught fire and all mere consumed except the sleepers.

A private car owned by Thomas Ryan of New York City, with his family aboard, was attached to the rear of the train, but It was pulled away before the fire reached it and no one in it was injured.

Many Passengers Cremated.

All the injured in the conches just behind the express and baggage cars were aremated. The people in the sleepers were saved with the assistance of the uninjured passengers.

The wrecked train was the Galveston. Harriaburg & San Antonio westbound pas-menger No. 9, and consisted of an engine, mail car, baggage car, one coach, one chai car, three tourist sleepers, one Pullman aleeper and one private car. The mail car, baggage car and coaches were piled to sether against the engine and were ablase in a few seconds. It was impossible to move any of the coaches or the tourist cars. they were all off the ralls, and were on consumed by the fiames.

So soon as it was possible to get in communication with the division headquarters relief trains, with surgeons and physicians re started from El Paso and Del Rio picking up along the line all the surgeons that could be found. All of the injured who were in a condition to be moved were sont to El Paso, where they are receiving careful attention

fer gold to San Franscisco, he said: Application for such transfer of gold has been made to the Treasury department, but so far it has not been made. In my opin-ton the application was made more as a precaution against any developments which might arise. I do not, however, believe that £20,000,000 will be transferred and it is doubtful in my mind if more than \$5,000,000 will be transferred. Of course, the trans-fer of gold by that method from New York to San Francisco is of advantage to the government because gold accumulates in San Francisco and the surplus has to be shipped east at considerable expense. If the application should have been made for transfer from San Francisco to New York we could not have granted it. officials of the United States from receiving any benefit from the enactment of the proposed law. The amendment requires that the names of all members of firms or of incorporators or stockholders of all corporations, whether owners of subsidized ships or contractors to build the same, shall be made public. It then proceeds as fol-

lows: No senator or representative or president of the United States or judge of any court of the United States shall be directly or indirectly interested in any contract under this contract or any corporation having a contract under this act or directly or in-directly receive any money or thing of value or worth under the provisions of this act, or be directly or indirectly interested in any corporation or vessel which is a beneficiary under this act.
