decisions arrived at will shape the future for the grocer and general merchant of the state for years. We hope to have with us men of long experience and national reputation who will advise us in matters affecting the business and will bring into cooperation with us the wholesale houses and commission men. At this time these people do not seem to be taking the interest in the association that they should. It is to the interest of the wholesale house that the retail merchant secures a living profit upon his commodities, for otherwise the wholesale dealer will find himself loaded up with worthless accounts.

#### Legislative Questions Uppermost.

"At the coming meeting legislative questions will be considered and it is possible that a strong committee will be appointed to represent the association before the next session of the legislature. Among the most diar. At the present time large eastern plices, his proportion of them, and therefore has has nothing to pay except the cost of the goods, the price of transportation and the commission or salary of the salesman. We will ask that a tax be placed upon these peddlars.

"The garnishment and exemption laws will receive sime attention at the hands of the committee. The time is past when the state of Nebraska can afford to assist a man to be dishonest, or to escape the payment of his honest debts. We want nothing unreasonable on this score, but a law which will give the merchant an opportunity to collect bills from those abundantly able, but unwilling to pay.

"The child labor law will also receive attention at our hands. We want a strong law well enforced upon this subject. It is not right to permit corporations or individuals to employ children to do the work which should be performed by men and women. Just what we will ask on this subject has not been determined."
