The New Woman.

Made Over by Quitting Coffee. Coffee probably wrocks a greater percentage of Southern than Northern people, for Southerners use it more freely.

The work it does is distressing enough in some instances; as an illustration, Miss Sue W. Fairall, 517 N. 4th St., Richmond, Va., writes: "I was a coffee drinker for years and for about six years my health was completely shattered. I suffered fearfully with headaches and nervousness, also palpitation of the heart and loss of appetite."

"My sight gradually began to fail and finally I lost the sight of one eye altogether. The eye was operated upon and the sight partially restored, then I became completely blind in the other eye."

"My doctor used to urge me to give up coffee but I was unable to continue to drink it until I had a last case of severe illness the doctor insisted that I must give up the coffee, so I began using the Postum Food Coffee, and in a month I felt like a new creature."

"I steadily gained in health and strength. About a month ago I began using Grape-Nuts Breakfast Food and the effect has been wonderful. I really feel like a new woman and have gained about 25 pounds."

"I am quite an elderly lady and before using Postum and Grape-Nuts I could not walk a square without exceeding fatigue. Now I walk ten or twelve without feeling it. Formerly in reading I could remember but little, but now my memory holds fast what I read."

"Several friends who have seen the remarkable effects of Postum and Grape-Nuts on me have urged that I give the facts to the public for the sake of suffering humanity, so, although I dislike publicity, you can publish this letter and my name if you like."
