## COMMERCIAL AND FINANCIAL

Listless Interest in Closing Session of Week on Board of Trade.

PRICES OF CEREALS SHOVED BY BEARS

Weak Spots Prevail in Wheat, Corn Shows Late Unsteadiness, Onts Dull and Provisions Haggle idly and Break Even.

CHICAGO, May 17.—Grain traders found little of interest in the closing session of the week on the Board of Trade today. The influencing factors were not sufficiently marked to induce good speculation, save some weakness in corn late in the day, that started a short lived spurt of activity. The pits closed with July wheat he lower July corn holes in the day, that started a short lived spurt of activity. The pits closed with July wheat he lower to a shade higher.

There was both weak and strong spots in wheat during the morning, but the advantage favored the former. The local crowd was inclined to sell. Weather was ideal for crops save in the northwest, where continued rains were still retarding spring seeding. Advices from Manicoba crops stated that seeding had been done and that there was still 20,000,000 bushels of wheat on hand. Prices went was to higher Liverpool sent no cables. London was weaker. A little better export demand was reported and strengthened the pit for a time. Early in the session the spread between July and September widened to 2½c, but the crowd became uneasy over the possibilities of an oversold September market, and covered some accounts. Fluctuations were narrow. July opened ½½½c down to unchanged at 14½c to 14½6%c and sold to 75½c. Corn weakness depressed it to 74½c, but the close was only easy, ½c under at 14½6 14½c. to 14½6%c and sold to 75½c. Corn weakness depressed it to 74½c, but the close was only easy, ½c under at 14½6 14½c. to 14½6%c lower at 14½6%c lower at 14½6 lower at 14½6%c lower at 14½6c lower at 15½6c lower at 1 The leading futures ranged as follows:

NEW YORK STOCKS AND BONDS. Early Recession Followed by Recovery Due to Bank Statement.

ery Due to, Bank Statement.

NEW YORK, May 17.—Prices made a decided recession in the first hour of today's short session because of the apprehension over the reports to make the anthracite miners' strike a national strike, but practically recovered after the bank statement appeared.

A fall of nearly 2 points in Colorado Fuel and heavy selling of United States Steel to below 40 unsettled the close and made it irregular at declines from the raily. The selling of United States Steel may have been due to fears of special damage to that industry from a possible interruption to bituminous coal mining, or it may have been connected with the meeting of stockholders on Monday to ratify the conversion of preferred stock and the issue of bonds.

The bank statement showed a decrease in cash of over a million where a gain of that much was expected, but this was ignored on the heavy reduction of deposit liabilities, affected by loan contraction by which the surplus reserves were recuperated to the extent of nearly five millions. The week's reduction of \$22,908,100 in the loan account has only once been equaled. In the week ending May 18, 1901, the banks reduced their loans \$24,204,800. This was the week following the panic week in the stock market, when loans had been made practically without limit to check the panic, and when the buying to support the market was followed by quick liquidation after confidence was restored.

The past week's events make it clear that no such liquidation has occurred as this loan contraction would measure. The local trust companies have been large lenders all the week. Banking authorities estimate loans placed by the trust companies as high as \$20,000,000. There has been lending also on account of interior money centers.

This is without taking any account of the large borrowing abroad, reflected in

been lending also on account of interior money centers.

This is without taking any account of the large borrowing abroad, reflected in the foreign exchange market. It is reported that there have been large sales this week by American holders of British consol subscriptions which have risen in London to a premium of 2 3-16. The proceeds of these sales would represent, of course, actual replenishment of local money resources, but the bank's figures must represent for the most part a shifting of accommodations rather than a loan reduction.

The market for bonds has grown dull

reduction.

The market for bonds has grown dull and has moved in sympathy with stocks. United States 3s declined ½ and all other issues ½ per cent below the closing call of last week.
