The last few days there has been an unusual fall of rain in Iowa. The local weather station reports the fall of rain last night to amount to 1.02 inch. which brought the total fall for the month of May to 4.77 inches, which is above the normal. The rain continued falling during the day and reports indicate that the rainfall is general over Iowa. In the northwestern part of the state heavy rains have been reported all week and the farmers say that the ground is entirely too wet either for planting corn or cultivating it and that the weeds are getting a big start on the crops. Iowa Mineral Output.

Prof. S. W. Beyer, assistant to the state geologist, in his annual report on the min eral statistics of lowa says:

eral statistics of lowa says:

The year 1901 shows a splendid increase in mineral production for lowa over preceding years, both in quantity and price. This increase is not confined to any one department, but every department, save for lead and zinc, shared in the prosperity. Coai alone shows an advance in total value of over \$1.00,000, or a net increase of about 15 per cent. Clay shows almost the same percentage of increase, while the value of stone advanced 30 per cent and the iron ore production more than double. The statistics for gypsum were not complete for 1900, and comparisons cannot be made in detail. The output for 1901, however, shows a fair increase over 1900. The total number of producers increased about 5 per cent, chiefly due to the more complete returns from the stone producers. The value of the coal output is placed at \$12.204,610, that of the clay products \$2.774,200, limestone \$5.50, blast furnace flux \$250, sandstone \$13,006 and other items \$5.325. The zinc industry has declined and the value of the product last year was \$16.500.

May Heaven Help Despondent and Hopeless Sufferers from Kidney Disease to Accept the New Life Offered by Paine's Celery Compound

The Great Medicine Cures Bright's Disease, Diabetes, Nephritis, and Albuminuria.

Thousands of people suffer through a living death from some form of kidney disease. In the majority of cases, the poor sufferers have been informed by physicians that there

is no hope. If you are a victim of kidney disease, take courage, dear sufferer! There is a mighty saving agent that you have not yet called to your aid. This grand medical prescription has conquered as desperate cases as yours; it has power to pluck you as a brand from the burning, if you have but the faith to give it a trial.

You may perchance ask, "What will Paine's Celery Compound do for me, that other medicines have failed to accomplish?" Paine's Celery Compound will accomplish vastly more for you in your distress than you can imagine. Its first great vital undertaking is the purifying of the life stream from waste matter, the result of decomposition of the tissues. It will remove all morbid materials, saving you from uraemic poisoning, which so often proves fatal in kidney disease.

In addition to all this, Paine's Celery Compound will establish nerve force and new nerve fibre; it will nourish the weakened system and restore the full vital functions of the kidneys.

If you value life, delay not the use of Paine's Celery Compound a single hour-Your present critical condition demands the immediate use of this great life saver.

Emma Doty, of Red Buttes, Wyo., saved by Paine's Celery Compound from fatal kidney disease, writes as follows: "I had a terrible pain in my side owing to kidney troubles. I could hardly lie down; but that trouble has all left me through the use of Paine's Celery Compound. Last spring I had mountain fever and was sick a long time; since taking Paine's Celery Compound I am strong. I feel very grateful for your medicine. I am glad to say anything that would encourage people to use
