GREATEST NOISE EVER HEARD

Sir Robert Ball's Description of the Apalling Eruption of Krakatoa. NOTHING LIKE IT IN THE EARTH'S ANNALS. A Demonstration of Volcanic Energy Corresponding in Many Particulars with the Recent Events in Martinique.

The following is an extract from Sir Robert Stannell Ball's latest work, "The Earth's Beginning," just published by D. Appleton & Co., New York.

There has been much difference of opinion as to the immediate cause of volcanic action, but there can be little doubt that the energy which is manifested in a volcanic eruption has been originally derived in some way from the contraction of the primitive nebula.

On the night of Sunday, August 26, 1883, the blackness of dark clouds, now much thicker than ever in the straits of Sunda and adjacent parts of Sumatra and Java, was only occasionally illumined by lurid flashes from the volcano.

The eruption of Krakatoa was not a new phenomenon, but it was marked on his charts as one of the perils of the intricate navigation in those waters.

In 1883 Krakatoa suddenly sprang into notoriety. Insignificant though it had hitherto seemed, the little island was soon to compel by its tones of thunder the whole world to pay it its attention.
