Provisions Join in Ascension March and All Pits Close with Prices Higher, Though Oats Crowd is Nervous.

CHICAGO, May 77.—Corn prices went climbing today and aided other grains in a sympathetic upturn. Many conditions favored better prices in all the pits, but it was largely through the fear of the corn shorts that the long predicted squeeze was coming that brought the advances. July wheat closed \$627\$c higher, July corn 1%0 115c up and July onts \$625\$c higher, July corn 1%0 115c up and July onts \$625\$c to lice higher.

After making zood gains yesterday corn easily took the lead again today. The tone throughout the session was particularly strong and the buying that put prices up was of the very best character. Cold weather started the upturn, but decreased stocks, small receipts, with smaller to come, higher cables and a good cash demand were the added influences that frightened the shorts into thinking their day of reckoning had come. Reports of liberal country acceptances—about 800.000 bushels—and last night's bids had no effect on the demand. Late in the day came the greatest activity, when the big buil house began to augment the demand of the commission houses by bidding freely and at higher prices. This started a sharp flurry and shorts covered at rather heavy sacrifices. July corn opened \$62\$c to \$c up at 63\$c to \$63\$6055c, jumped to \$64\$c and closed strong. Passible, lumped to \$64\$c and closed strong. Passible and lose the condition houses are getting a little more business from the country and the pit consequently showed a more fairly active condition. Cables were slightly higher. Crop prospects were still very good and cash demand and the premium for cash over the nearer options, together with the decreased in stocks, were the principal builden factors. Bradstreet's visible supply showed a decrease of 2,779,000 bushels and influenced some advances. July opened a shade lower to a shade higher at 785673c, soid to 744c and closed firm, \$62500 bushels last week. The seaboard

24.24 c higher, at 37% gas \(\) c. Receipts, 289 cars.

Provisions were very strong early on the higher prices for hogs and on the very small offerings. The sentiment was very bullish for a time and there was a good packers' support. Commission houses did some fair buying. The selling was mainly scattered for the outside account in the way of liquidation. Toward the close the profit-taking caused a loss of some of the advance, but the tone was still strong. July pork closed fice up at \$10.17\(\) and July ribs 714.610c up at \$8.624.

Estimated receipts tomorrow: Wheat, 20 cars; corn, 90 cars; oats, 145 cars; hogs, 25.000 head.

NEW YORK STOCKS AND BONDS. General Drift Lower and Conspicuous Activity in Canadian Pacific.

NEW YORK, May 27.—Today's stock market was an irregular drift over a fractional range, below yesterday's closing level. There were a few exceptions among minor stocks. The recent demand for Wisconsin Central stocks continues, accompanied by rumors of buying for control. rol. There was an upward movement in Sugar

There was an upward movement in Sugar when the report reached Wall street of a conference of senators to attempt an agreement upon Cuban reciprocity, but the stock dropped back when the conference adjourned without action.

A rise of nearly 2 points in American Locomotive seemed a supplement to that of yesterday in the car stocks. Pressed Steel Car reacted sharply over 3 points on the emphatic denial of yesterday's rumors of a merger with the American Car company.

Canadian Pacific continued by far the most active stock in the list. It dropped 8% in the first few minutes of trading, but was railied by arbitrage trading from Canadian centers, where the stock continued at figures above the New York level.

The small effect produced here in contrast with the zpeculative activity abroad by the current rumors of peace awakened conjecture here. An awakening of speculative and indus-trial activity abroad would be likely to lead to the withdrawal of large amounts of foreign capital now placed in New York in bankers' loans. The effect could hardly be saiutary upon American financial af-fairs.

LONDON, May 27.—The rates for money were firm today. There was a strong undertone, although the ultra sceptics construed the cabinet meeting as evidence that a hitch had occurred in the South African peace negotiations and the likelihood of an advance was arrested. Dealings were moderate. The spurt in home rails was maintained. Americans opened weak, the dominatine factor being the coal strike and fears of its expansion. Prices afterward improved and business closed quiet. Canadian Pacifics and Grand Trunks wavered. ers took advantage of the opportunity to force prices up a little. Packers evidently had to have the cattle, as they were active buyers at the higher prices ruling on steers.

Receipts included about the usual proportion of beef steers this morning and under the influence of a good demand the highest prices of the season were paid. Steers sold as high as \$7.35 and, as will be seen from the sales below, there were a good many bunches that were good enough to bring from \$7.90 up. As compared with yesterday anything at all desirable sold right around a dime higher and as packers were all anxious for supplies the market ruled active at the advance and everything was disposed of in good season.

The cow market, on the other hand, was hardly as good as yesterday. The better grades of fed stuff sold in just about yesterday's notches, but buyers did not seem to take hold with much life. The commoner kinds and especially those showing grass, were neglected and sellers in most cases were calling that class of stock a shade lower than yesterday and in some cases sales were made that looked 5@10c lower.

Bulls, veal calves and stags all sold at right around steady prices, where the quality was at all good, but the common stuff was of course neglected more or less, the same as usual.

There was a limited supply of stockers and feeders on sale this morning and as the demand on the part of speculators was in fairly good shape sellers had no difficulty in disposing of what they had at steady prices. The better grades in a good many cases commanded stronger prices, but aside from those it was no more than about a steady market. Representative sales:

BEEF STEERS.

BULLS.

HOGS—There was a liberal run of hogs here today, which makes the supply for the two days a little in excess of the same days of last week, but hardly as large as the same days of last week, but hardly as large as the same days of last year. The table of receipts above will show the exact figures. The market opened rather slow this morning and about 5c lower. Packers, however, seemed to have quite liberal orders and it soon became evident that there were none too many to meet the local demand. As a result sellers held their droves for more money and the market closed about steady with yesterday, so that the loss of the early morning was fully regained. Trading was active after buyers and sellers got together, so that the yards were cleared in good season. The bulk of the good weight hogs sold from \$7.00 to \$7.10 and the medium weights went largely from \$6.50 down. Representative sales:

SHEEP—There was another very light run of sheep and lambs here today, and, the same as has been the case for some time past, there was scarcely enough offered to make a test of the market. In fact there make a test of the market. In fact there was nothing offered with which to test the market on choice stuff, as everything on sale was no better than of fair quality, while most of it was common stuff. About all that can be said of the market is that the few bunches on sale brought is tabout steady prices. It was the general opinion, though, that choice sheep or lambs would have commanded strong prices and would have commanded strong prices and would have met with ready saie.
