the period of ten years, as well as during various offices in the public buildings now used by the city. This will include the city hall, the jail, police court, public library, fire engine houses and the public schools. Water also will be provided for the flushing of sewers for sanitary purposes, provided the work is superintended by the proper city authorities.

The rate to be charged to private concumers is to be the same as that charged in Omaha, which is the same as the present contract.

One new feature of the proposed contract is that the water company shall be required to furnish and set meters at its own expense on all new domestic services. Meters are to be generally used and these are to be set as soon as practical after the passage and acceptance of the ordinance.

In addition, the company agrees to lo cate forty-eight additional hydrants, to be located where the council may direct. These hydrants will not be charged for until the expiration of the present contract, then all the 250 hydrants will be charged for at the rate of \$50 a year, except the intermediate hydrants, which rent at the rate of \$10 a year.

The company, however, desires some feeway in the matter of laying mains and setting the forty-eight hydrants, as the officers of the company state that material is scarce. The company is not to be held responsible in case it cannot promptly obtain the material for laying the mains and the setting of hydrants.

With the exception of the intermediates, all hydrants are to be located not more than 400 feet apart.

Payment for hydrant rental, under the proposed contract, must be made on Janu-

ary 1 and July 1 of each year. As the terms suggested appear to be much more favorable than those in the present

contract it is presumed that the council will pass the ordinance.

Printed Charter Delayed.

Some time ago it was announced that the copies of the charter and the revised city ordinance ordered a couple of months ago would come from the printers on July 1 and be ready for distribution. Owing to delays of various kinds the printers stated yesterday that it would be fully another month before the books would be ready. In this connection a city official said yesterday that unless the books were completed soon the charter would be practically useless. It is the intention of the city officials to request the next legislature to make a number of amendments in the charter in order to provide funds for the growth of the city. When the charter is revised it will then he necessary to have printed copies of the changes made and this means additional expense.
