

the same manner, regarding both the determination of the strike leaders to wage a peaceful contest and the action of the Union Pacific at Cheyenne. He reiterated his statement that the boiler-makers would rather see the "right go by default" than to win it by forcible or violent means.

General Manager Dickinson and Superintendent McKean of motive power are still at Cheyenne or other points on the western division. An effort was made to obtain some official information from President Burt's office yesterday as to the progress of the company's side of affairs at Cheyenne, as well as here and other places, but no such information was given out.

It was stated, however, at headquarters that the company had no reason to feel any apprehensive over results that a few days ago and that no reports of violence had been received. And it is positively known that both President Burt's office and General Manager Dickinson are in closest communication with the entire field.

The officials still persist in saying that no new plan has been adopted for filling the strikers' positions, and securing a resumption of normal conditions. They have no complaint to offer of the reports that 100 men had been secured ready for work at Cheyenne Monday and more were in prospect, except to make the indefinite statement that it is not yet apparent whether there is any possibility of carrying on its affairs.

The entire shop force at Evanston is still at work. This is an element of strength for the company. Officials are sure that they will lose no more men either, despite the claim of the strikers that they will ultimately induce them all to leave work and join the idle army.

Such are the views of the contending factions. W. Webster, president of district lodge No. 2 of the International Association of Machinists, who is one of the foremost leaders of the strike and who as a member of the executive committee participated in the final conference with Union Pacific officials, has gone back to his home, Evanston, to command affairs there and also look after things at Cheyenne. His official headquarters. The object of the union in keeping Webster at the center of the action in the east is to endeavor to close in on the company and make the trip complete if possible.

Webster's efforts at present are directed almost wholly toward lining up the Evanston men. Dickinson and McKean at Cheyenne. CHEYENNE, Wyo., July 2.—(Special Telegram.)—General Manager Dickinson and Superintendent of Motive Power and Machinery McKean arrived from the east this morning and spent the day in investigating the local situation.

The shops in Cheyenne were not closed as a result of the feeling against Cheyenne, but owing to strike conditions, the same as the Omaha and Armstrong shops were closed. The citizens can rest assured that the shops will be rebuilt, how soon depends upon conditions. The plan to rebuild the plant will not be abandoned. The company has decided to inaugurate piecework on the entire system, even if it takes years to accomplish it, and will not recede from this decision. It will establish a system of pay which will enable men to earn more by conscientious work than by the time system.

The officials will leave tonight for the west to visit other shops along the line. The last doubt as to whether the Union Pacific intends to fight its boiler-makers and machinists to the last were removed this morning, when additional bunk and supplies were sent to the shops. The company is preparing for a long strike and sending every man to the shops to protect his union men. The strikers and locked-out men are confident that their places cannot be filled by competent men for some months to come and say that in the meantime they will strike at the company in unexpected quarters. The strikers assert that a large number of locomotives are already in need of repairs.

Mr. Dickinson stated that there is no truth in the report from Omaha to the effect that Cheyenne is to be made the center of the fight against the strikers and that an effort will be made to establish piecework here before the plan is inaugurated at other shops. Efforts are being made to man the shops here, as elsewhere, and with gratifying success. "There is no real basis for the report that the strikers are being waged against union men," Superintendent McKean spoke in the same strain. Four boiler-makers returned to work at Evanston today. The situation remains unchanged at Cheyenne, Rawlins and Green River.

B. W. Grove. The same must appear on every box of the genuine Lassative Bromo-Quinine Tablets, the remedy that cures a cold in one day. 25 cents.

MEN CAUGHT IN A TUNNEL
Without Warning an Entire Hill Settles Down on Railroad Track.
MINNEVA, O., July 2.—With a rumbling and rattling sound the great hill near the tunnel on the Lake Erie, Alliance & Wheeling railroad, near here, collapsed in its entire length early today.

Work was commenced some time ago to uncover and make a cut of the hill and the sections on the road will be stopped for quite a while as a result of the disaster. Later it developed that only four men were caught in the cavern. Their injuries are not serious.

Forest Fires Spreading.
DENVER, July 2.—State Timber Inspector Wells, who returned today from Durango, reports that the forest fire near the city has burned over twenty-five square miles and is still spreading. The fire near the town of Pagosa, on a branch of the Santa Fe, has burned over five square miles and is still unchecked. The fire near the town of Durango, on the headwaters of the Huerfano river, is also spreading.

General Debility
Day in and out there is that feeling of weakness that makes a burden of itself. Food does not strengthen. Sleep does not refresh. It is hard to do, hard to bear, what should be easy.—vitality is on the ebb, and the whole system suffers. This condition takes Hood's Sarsaparilla.

Hood's Sarsaparilla
It vitalizes the blood, gives vigor and tone to all the organs and functions, and is positively indispensable for all run-down and debilitated conditions. Hood's Sarsaparilla cures constipation, 25 cents.

WILL MAKE TRANSFER SOON

Philippine Government Act Will Be Put in Operation at Once.

TO REDUCE THE FORCE OF SOLDIERS

When This Is Done the Census Will Be Taken as Provided for in the Bill and Independence is to Follow.

WASHINGTON, July 2.—Chairman Cooper of the house committee on insular affairs says steps will be taken at once to put the Philippine government act in operation. "The first step," said Mr. Cooper today, "will be the complete transfer of authority from the military to the civil officials, except in the Moro country, where there is some lingering disorder. The transfer will be accomplished by a proclamation from the president, which it is understood will be issued July 4. Besides turning over the authority to the civil officials, the change will permit a considerable reduction of the military force in the islands, although a few are retained to guard the coast and to protect the islands. In 1904 we had 70,000 men in the Philippines, so that we soon will have reduced the force by 50,000 officers and men, and the transfer of authority and the act doubtless will lead to a further reduction before long.

The next step will be to take the census, as provided by the act. Governor Taft told me this work would begin as soon as he reached Manila. His plan is to have the work done as far as possible by Philippine officials, but to get up his own census system instead of having it done by the census office at Washington, although they are empowered to get census experts from here by making application to the president. The purpose, however, is to make the work thoroughly a local one, so that it will serve the Philippines as an object lesson. The census will take about a year.

"As to the general effect of the act we have just enacted," added Mr. Cooper, "I share the view of Governor Taft, who said that if this bill becomes a law we would hear no more of the Philippines than we do of Porto Rico, and that the Philippine problem would gradually disappear." Mr. Cooper has received the following telegram from President L. G. Schurman of Cornell, who was head of the first Philippine commission: "Cordial congratulations on your splendid victory in securing a legislative assembly for the Philippines. Our commission recommended it. Your bill shows constructive statesmanship of the highest order. Philippines will bless you forever."

OFFICERS FOR RIVER WORK

General Gillespie Completes the Organization of Boards for Various Places.

WASHINGTON, July 2.—General Gillespie, chief engineer, has completed the organization of boards of engineer officers for the execution of certain river and harbor works specially provided for in the river and harbor acts. The boards are as follows: For improving the waterway at Norfolk, Colonel P. C. Gaines, Lieutenant Colonel Charles J. Allen and Major James B. Quinn. Sandy bay, Cape Ann, Massachusetts, Colonel C. R. Suter, Lieutenant Colonel W. S. Stanton and Major S. W. Rossier. Upper Hudson river, New York, Colonel S. H. Mansfield, Major W. C. Langfit and Lieutenant A. H. Schulz. Waterway at Lockport, Ill., Lieutenant Colonel O. H. Ernaest, Lieutenant Colonel C. J. Allen and Major Thomas L. Casey. Columbia river, between the foot of the Dalles Rapids and the foot of the Gellio falls, Lieutenant Colonel W. H. Heuer, Major W. L. Marshall and Captain Edward Burr, C. E. Gillette and C. H. McKinley. Waterway at Puget sound, Lieutenant Colonel W. H. Marshall, Captain W. C. Langfit and First Lieutenant R. P. Johnston. Canals and locks at Willamette falls, Major John Mills, Captain W. C. Langfit and Lieutenant R. P. Johnston. Improvements at the mouth of the Columbia river, Major W. L. Marshall, Captain C. E. Gillette and C. H. McKinley. At Galveston and improvement of Trinity river, Texas, Lieutenant Colonel F. M. Adams, Major G. McC. Derby and Captain W. V. Judson.

TAKE CENSUS OF BUFFALO

Eleven Hundred and Forty-Three Full and Mixed Bloods in United States.

WASHINGTON, July 2.—The total number of buffalo, both full and mixed blood, in the United States is 1,443, according to a report submitted to congress by the interior department, based on correspondence with various states. Of this number seventy-two are running wild, of which fifty are in Colorado and the remainder in the Yellowstone National Park. The total number of buffalo or bison domesticated or in captivity, including full and mixed bloods, is 1,371. The total number of the pure-blood buffalo in the United States is 268, and the mixed bloods 1,103. The total number of buffalo or bison in Canada is 999. Of these 400 are pure blood, running wild in the countries outside North America. The interior department estimates that there are 128 buffalo or bison, all of which are believed to be in captivity. In the United States the domesticated buffalo appears to be increasing.

STATES TO GET THEIR MONEY

Warrants Issued to Several on Old War Claims, Iowa Being in the List.

WASHINGTON, July 2.—The Treasury department today issued warrants in favor of the states of Illinois, Indiana, Iowa, Michigan, Vermont and Ohio, aggregating \$2,219,584. These warrants cover the claims of soldiers incident to the raising and equipping of troops during the civil war, recently allowed by the comptroller of the treasury and for which congress made the necessary appropriation yesterday. The amounts which are being paid the several states are as follows: Illinois, \$1,000,129; Indiana, \$455,850; Iowa, \$65,417; Michigan, \$281,157; Vermont, \$200,658; Ohio, \$48,589.

It is anticipated that several other states which have claims similar to those already paid are to follow. The comptroller, asking for favorable action.

FILIPINO WANTS THE PEN

Senior Buencamino to Preserve One Used by President to Sign Bill.

WASHINGTON, July 2.—Senior Buencamino, who has been sojourning in the country, today called upon President Roosevelt and requested the pen with which he signed the Philippine government bill, as he desired to preserve it and eventually place it in some public library in the Philippines. The pen already had been given to Senator Lodge, chairman of the Philippine

WOULD MODIFY NAVAL RULE

William Blacklock, Vice-Consul in Samoa Here to Suggest Change.

REFRESHMENTS NEEDED FOR VISITORS

Fiscal Agent Says Many Tourists Are Not Stopping at Apia Because of New Order Prohibited.

WASHINGTON, July 2.—William Blacklock, United States vice consul and fiscal agent at Apia and Tutuila, Samoa, has arrived in the city today. Before the proper officials a statement of the conditions in Tutuila and a series of suggested amendments to the present scheme of government of the island, which experience has demonstrated to be necessary. It is thought to be desirable that the present system of absolute naval control over the entire island be modified so as to limit the naval commandant in the exercise of his purely naval functions to the naval station proper, leaving him to exercise the functions of a civil governor in the remainder of the island. It also is deemed well to afford the white natives and the few white civilians some sort of representation in the conduct of local affairs through the creation of an advisory council to the governor. A water discretionary power is also asked for the governor. By a singular omission the natives never have received any acknowledgment from the United States government of their voluntary submission to our sovereignty, and Mr. Blacklock believes it to retain their good will, this should be remedied. The crying need of Tutuila, according to Mr. Blacklock, is a modification of the present naval order touching the supply of refreshments to visitors of the island. The Oceanic line of steamers has been dropped at Apia in favor of Tutuila as a point of call, many tourists and business agents were coming to the latter place and the trade of the islands was rapidly developing, in some measure at the expense of German Samoa. Mr. Blacklock believes it to be in the interest of the United States to prohibit absolutely the supply of wine or other liquid refreshments at the hotels. The immediate effect was to close up the hotels, and Mr. Blacklock is here to urge the State and Navy officials to revert to the old order.

SETTLEMENT SEEMS CERTAIN
State Department Encouraged by China Advances Relative to Indemnity.

WASHINGTON, July 2.—The State department is somewhat encouraged by advice just received from China in its hope that the powers will consent to adopt less rigorous measures in the treatment of China. It has been informed that England has consented to indemnity in silver, or on the silver basis, which is in line with the contention of the United States, and now it is thought Japan will do likewise. These three powers, ranged in a row, may influence the remaining signatories to the Peking agreement toward a more liberal construction of the clause relating to the rate of exchange at which the indemnity payments are to be calculated. The situation at Tien Tsin is also improving and it is now said that Russia, England and Japan have taken sides with the United States, holding that the restrictions imposed upon the town are far too severe and should be relaxed. It is confidently expected that this view will prevail and that the powers will soon be able to effect a complete withdrawal from China, save for the legation guards.

VESSELS BUILT DURING YEAR

Report of Bureau of Navigation Shows Increase as Compared with Previous Twelve Months.

WASHINGTON, July 2.—During the fiscal year ending June 30, 1902, the bureau of navigation reports that 478,781 gross tons were built in the United States and officially numbered, compared with 1,079 vessels of 489,655 tons for the previous fiscal year. The decrease, compared with last year, is in all vessels and canal boats, barges, etc. New steel steamers aggregate 278,478 tons, compared with 263,265 tons last year. Included in the total new tonnage are ninety-four vessels, each over 1,000 tons, aggregating 316,082 tons, or two-thirds of the output. Of this large construction forty-one steel steamers of 158,621 tons were built on the great lakes. The output of completed steel steamers on the seaboard has been below the indications of last July. The launching of nearly every large steamer has been delayed from three to eight months and some are still on the ways which by this time they had been expected to be in operation. The delay is due to the fact that the steel strike last summer and to the great demand for structural steel in all directions; to low ocean freights and the lack of new shipbuilding orders, which has led to a decrease in the output of the yards. Last July 355,000 tons of ocean steel steamers were under construction or under contract, while at present only about 160,000 tons are under construction and so new large seaboard contracts are reported.

DICKEY IS VINDICATED

Investigation Shows Consent at Callao Did Not Pad His Expense Accounts.

WASHINGTON, July 2.—United States Consul William B. Dickey has been completely vindicated by the investigation against him by Richard R. Neill, secretary of legation at Lima, and as a result of which he was removed from his post at Callao. Consul Dickey came to this country a few months ago on a leave of absence. When he arrived here he found that he had been removed from his post as a result of Mr. Neill's charges and that Charles V. Herdlicka, formerly secretary of legation at Vienna, had been nominated as his successor. The charges made by Mr. Neill included padding of expense accounts. Senator Frye, of whom Consul Dickey is a constituent, interested himself in the case and Dr. Hill, then acting secretary of state, instituted the investigation, assisted by Chief Clerk Michael, which resulted in entire exoneration for Mr. Dickey. As a result of his vindication Mr. Dickey is to be reinstated in the consular service and it is believed that an arrangement will be made with his successor at Callao allowing Mr. Dickey to regain his old position. Mr. Herdlicka being provided for otherwise.

HAY TALKS WITH SENATORS

Secretary Confer with Hanna, Lodge and Spooner About Canal Matters.

WASHINGTON, July 2.—Secretary Hay today, by appointment, had a conference with Senators Lodge, Hanna and Spooner, the object being the Isthmian canal act. The discussion centered on the steps to be taken to give effect to that important measure. As the senators named were largely instrumental in creating the legislation under which the canal is to be built, Secretary Hay desired to see the opportunity afforded them to thoroughly acquaint themselves with their views as to the proper procedure, in order that the executive branch might be in thorough accord with the legislative in carrying forward the great work of canal construction.

The secretary acquainted the senators with the substance of what had been outlined in the cabinet sessions and it is believed that this has their full approval. Editor Fined for Contempt. ELDORADO, Kan., July 2.—N. R. Cady, auditor of the county, was fined \$25 for contempt of court for having criticized Judge Akman for a contempt order in the trial for the murder of Mrs. Castle.

GOT TO GO.

Men of Family Must Work, Sick or Well.

Good food and the right kind will carry a man through almost anything. Commenting on the power of Grape-Nuts, an Oakland wife writes of the experience of her husband. "Two years ago my husband had the pneumonia which left him in a sad condition, unable to work for several months. The doctor said he would have to be very careful or it would turn into consumption. We have a large family and he must work sick or well. I heard of Grape-Nuts and the strongest nourishing food we could find he began on the food with one egg, which would be all he would eat for breakfast. He left home at four-thirty every morning seven days in the week, and after two years' continued use of the food he is a well man. Even the cough has left him that troubled him so long after his sickness. Our youngest child, a boy of four and a half, was a very delicate baby. As soon as he could eat anything we started him on Grape-Nuts and he has grown to be a large child, taking a suit for a boy six years old. He is a very bright, intelligent boy. I heard of Grape-Nuts and the strongest nourishing food we could find he began on the food with one egg, which would be all he would eat for breakfast. He left home at four-thirty every morning seven days in the week, and after two years' continued use of the food he is a well man. As soon as he could eat anything we started him on Grape-Nuts and he has grown to be a large child, taking a suit for a boy six years old. He is a very bright, intelligent boy. I heard of Grape-Nuts and the strongest nourishing food we could find he began on the food with one egg, which would be all he would eat for breakfast. He left home at four-thirty every morning seven days in the week, and after two years' continued use of the food he is a well man. Even the cough has left him that troubled him so long after his sickness. Our youngest child, a boy of four and a half, was a very delicate baby. As soon as he could eat anything we started him on Grape-Nuts and he has grown to be a large child, taking a suit for a boy six years old. He is a very bright, intelligent boy.
