SENATOR MILLARD PRINCIPAL SPEAKER

teting Mayor Karr, T. J. Mahoney and Alfred Millard Also Express Sentiments on the Public Enterprise of Omaha,

Amid the applause of the multitude, oraory, music, flowers and the rattle of traffic, the cornerstone of the Omaha Au-ditorium was laid Saturday afternoon, and now, with a copper box full of "exhibits" in its core, rests securely in its bed of mortar. There is no possible doubt that it was an epoch-marking event in the his-tory of Omaha, since each of the five orators so declared it, and each denies that the declaration was the result of a preconcerted agreement. It was also gathered from the speeches that the building of the Auditorium indicated a transition from sordid commercialism to a more exalted intellectual plane, and that it was a monument to the civic pride of everyone who had contributed toward its construction.

Alfred Millard acted as master of ceremonies, and delivered the first address. He was followed by Acting Mayor Karr, who spoke briefly in behalf of the city Then T. J. Mahoney presented the matter from the standpoint of the Auditorium company and the Commercial club. Senator Millard who made the principal address, took an optimistic view of Omaha's future, and spoke in glowing terms of the enterprise which had made such a structure as the Omaha Auditorium a possibility. J. R. Lehmer read off a list of the articles which had been placed in the hermetically sealed copper box, to be consigned to the heart of the cornerstone. F. E. Sanborn, who had arisen from a sick bed to be present, made the closing address, and afterward, figuratively laid the

Thousand People Attend.

It was estimated that there were about people present, and of these the greater number stood in the street, in the coiling sun, throughout the somewhat lengthly program.

Among those who occupied seats on the platform were the following: Senator Millard, Judge W. W. Slabaugh, John C. Barnard, Emil Cermak, J. E. Sunderland, J. Frank Carpenter, L. N. Gonden, H. F. Mc-Intosh, Fred Stubbendorf, E. M. Andreesen, George F. Lee, H. K. Burket, H. N. Wood, Peter E. Her, M. C. Peters, J. J. Donahue, C. F. Wheeler, C. S. Elgutter, C. G. Pearse, John Steel, James Walsh, James Dinning, J. E. Utt, T. J. Mahoney, Alfred Millard, Issac Hascall, M. D. Karr and Frank Hamilton.

The cornerstone, which was a great block of Bedford (Ind.) stone, of steel gray color, weighing 4,000 pounds, was suspended from a derrick leaning against the northeast corner of the building, and by means of block and tackle was held about eighteen inches above the bed of Omaha-made brick, upon which it was destined to rest. In response to a signal, John Latenser, architect, and F. E. Sanborn stepped down from the platform to the top course of brick, and Abbott's band struck up "The Dance of the White Rats," a selection, by the way, which will be played at the formal opening of the Auditorium. It is the Auditorium tune. Then came bricklayers in white duck overalls, bearing trowels. They were: John S. Ferris, John Kline, Theodore Barg, August Jranewski and Ed Linosky, in charge of W. P. Deverell, foreman. Mr. Ferris spread a layer of mortar under the block; Mr. Sanborn put the copper box in place; the band struck up "America," and the signal was given to lower away. A roar of applause went up as the stone sank into its moist bed. Then the handsome young woman, Miss Nellie Rubin, threw garlands

of smilax and roses upon the block.

It was announced that \$250 had been realized from the recent policeman's ball game, a check for which had been presented to the building committee.

Alfred Millard Speaks. Alfred Millard spoke in part as follows:

This is one of the victories of peace—
a constructive, not a destructive victory—
the reward of honest, earnest endeavor,
and we who have labored so long, come
here today satisfied with our work, to
congratulate you who have so generously
aided us to this end. For it is an end, as
well as a beginning—an end of doubt as to
the building of an Auditorium and the begirning of a noble structure. In this day
of commercialism, in this rush of eager
competition for wealth, when men measure
dollars and dollars measure men, it is well
that we should find an hour like this from
time to time, or if necessary make an
occasion like this for the contemplation of
an important fact, namely, that it is not
enough to build a city, to work and die in,
but one to live in, and that city and those
people who best appreciate this truth are
in the long run the most successful. While
our business interests are uncommonly
prosperous, it is most wise for us to consider an enterprise which makes for the
happiness and contentment of the people,
and it is my prophecy that one day our
parks and boulevards, our Auditorium and
other features of like character which conduce to the holiday spirit among us, will
be found to be our most important and
valuable possessions.

We shall have a building here which will Alfred Millard spoke in part as follows:

be found to be our most important and valuable possessions.

We shall have a building here which will be an artistic triumph for the man who conceived it. Its graceful lines and aplendid proportions will appeal to all who visit our city and be a constant source of pleasure and inspiration to us who live here. So today let us consecrate ourselves anew to its completion, because it is the work which lies nearest us, because the dignity of our city and the voice of the people demand it. And we will build a temple in the spirit of unselfishness, whose noble front shall bear the seal of our civic pride and the purity of its purpose will be a legacy to our children.

Acting Mayor Karr spoke briefly of the progress made by Omaha in the last few

Senator Millard's Remarks.

Senator Millard began his address by callwhich the city, county and state have reached their present commercial importance. He resumed:

Today the state of Nebraska has a population in the neighborhood of 1,200,000 and within a radius of five miles from where we are now standing it is reasonable to say we have a population close to 200,000, including Council Bluffs, which is to a certain extent tributary to the husiness in say we have a population close to 200,000, including Council Bluffs, which is to a certain extent tributary to the business interests of this state, as is also a large portion of western lowa. The trade of Omaha at the present time reaches westward as far as the Pacific slope and it will not be very long until we effect trade relations with our new possessions in the far east. We have some of the most enterprising merchants to be found anywhere; our banking institutions are of the best and I think the deposits of the several banks amount to very nearly \$30,000,000, which shows that there is a large amount of business doing and to be done in this metropolis. From one end of the state to the other our people are more prosperous than ever before.

I find from the census report of 1900 that we had in Nebraska 5,414 manufacturing establishments, with a capital of about \$72,000,000; the value of the material used was \$102,000,000, while the value of the finished products amounted to \$144,000,000. Douglas count; had 1,013 factories and mills, with a capital of \$51,500,000, with a finished product valued at \$13,500,000. Thus it will be seen that very close to 80 per cent of the value of the entire manufactured output of the state of Nebraska in 1900 was produced in Douglas county, and 1 take it that a showing of conditions as they exist today would be very much more encouraging for the county than the figures here given.

Optimistic View of Future

Optimistic View of Future.

With the western portion of the state of Iowa, together with our state and the country west of us naturally tributary to this city, it is reasonable to predict that our growth in material wealth, culture, intelligence and the comforts of life is certain to continue with greater rapidity than in the past and there is no reason to doubt that ten years hence Omaha will have at least 200,000 people and that the state of Nebraska can then boast of a population of nearly 2,000,000.

We are building for the future. This great structure you have undertaken to erect will be none too large to accommodate the various conventions, assemblies, convocations, concerts and other entertainments requiring a commodious meeting place in the state and city, yet its massive proportions will stand for years as a monument to the public spirit and pluck of the men and women of Omaha.

We have reached an epoch in our municipal history when the aspirations of our best citizenship strive for higher objects than the accumulation of property for the mere satisfaction of possessing it. We have done well so far in providing the material things of life; we must now devote more of our energies and talents to the promotion and encouragement of the arts. A deep-seated desire to do this found splendid expression in our exposition of 1995 and the public tastes thus cultivated gave rise to the agitation for an auditorium which when finished will facilitate a long-cherished plan in the minds of our educators, artists and musicians, who are doing most valuable work in ministering to the artistic sense of this fortunate community.

I wish to congratulate you and the citizens of Omaha senerally upon the citizens of Omaha senerally upon the citizens.

munity. I wish to congratulate you and the citizens of Omaha generally upon the evidences of progress made in the work of promotion of this great enterprise and am sure we all entertain the hope that after its completion, which I trust may not be far in the future, your highest expectations of its sucess, artistically and financially, may fled abundant realization.

Now that the end of the Boer war is in sight, England will proceed to count up the cost, and will find it to have reached an enormous figure. There is also a large sum of money spent annually by those in search of health, much of which, however, could be saved if the right medicine was used. The best health-restorer known to science is Hostetter's Stomach Bitters. It cures indigestion, dyspepsia, constituation, lousness and liver and kidney troubles. Try

AFFAIRS AT SOUTH OMAHA

Water Company's Franchise is an Issue Monday Night.

COUNCIL TO CHOOSE BETWEEN TWO WAYS

Members Seem Inclined to Favor the Ten-Year Extension Because of Concessions Made by the Company.

On Monday night the city council will be up against two propositions. One will be a monstrance against the passage of the ordinance introduced by Adkins granting to the Omaha Water company an extension of its franchise for ten years from October, 1904. The other petition to be considered is one from the people living in the districts where it is proposed to extend the mains and locate forty-eight additional hy-In talking about this matter last night

one of the members of the council said "A committee waited upon the officers of the water company to learn what could be done in regard to the extending of mains and the locating of a number of hydrants. The matter was talked over thoroughly and the question of royalty came up, when it was suggested by someone that the term of the present franchise be extended. Officers of the company declared positively that no royalty would be paid. However, they agreed to make concessions which, in the opinion of the committee, will amount to a great deal more than the proposed royalty. By the placing of forty-eight additional hydrants at this time many small property owners will be provided with city water as well as with fire protection. The growth of the city demands that there should be an extension of the mains. These hydrapts are to be free to the city for two years and paid for at the rate of \$50 a year after 1904. Then again the company agrees to furnish water free to the school houses and city buildings and for flushing sewers and the streets. Another concession offered was the placing of meters at the expense of the company. Heretofore the property owner has been compelled to deposit a certain sum for the cost of the

Another city official said that in his opinion the concessions offered the city offset the payment of a royalty by a large amount. It is understood that the council ls in favor of the proposed ordinance.

More Help Authorised.

On September 1 two additional mail cariers and one collector of mail will be put o work here. Captain Etter, the postmaser, received instructions from Washington vesterday to make arrangements for this increase in help. Twelve carriers are now employed and the increase in the force will necessitate the redistricting of the city and the remodeling of the routes. The addition of a collector to the force will relieve to a great extent the work now imposed upon carriers and will result in the handling of mail much more rapidly than formerly.

The Hammond Plant. More than a dozen men were employed yesterday in cleaning the Hammond plant here and it looks as if the plant would be reopened shortly. No one here appears to know what is going on other than that orders were received yesterday morning to ders were received yesterday morning to clean the plant at once. All of the property of the old Hammond company is being loaded into cars preparatory to its being shipped away. At the present time the clean the plant at once. All of the prop-erty of the old Hammond company is being shipped away. At the present time the Hammond boilers are being used by Swift, but the lease on these will cease, it is ing attention to some of the landmarks by stated, as soon as the new boilers are in-

Sale Consummated.

The sale of the triangular piece of property just east of the Union Pacific depot and owned by school district No. 3 was consummated yesterday. The purchaser, John J. Ryan, paid the price of his bid, \$2,100, to the school treasurer and received in return a deed to the piece of ground. When the Board of Education decided to dispose of this property, which is practically valueless for school purposes on account of it being located so near the railroad yards, bids were advertised for and Ryan was the high man. While the sale was practically made at the meeting of the board last Monday night the money and deeds were not ex-

changed until yesterday afternoon. Patriotic Services.

Patriotic services will be held at the First Methodist Episcopal church this evening. Rev. M. A. Head, pastor of the songs will be of a patriotic nature. For the occasion the church will be decorated with flags and flowers. Rev. Head invites old soldiers, young soldiers and members this service. One of the features of the service will be the singing of a patriotic solo by Mrs. G. H. Strong.

Church Repairs. The Ladies' Aid society of the Methodist church met one day last week at the home of Mrs. Anna Beavers to make arrangements for some improvements. A committee, composed of Mrs. D. Banner, Mrs. Robertson and Mrs. T. G. Smith, was appointed to purchase a new carpet for the church. Mesdames Beavers, Stryker, Sugart and Cressey were selected to enter into a contract for the frescoing of the

interior of the church: Inspector Waters Here.

Inspector Waters, representing the Postal department, is here, having arrived from Washington yesterday. He is here to in vestigate the request of the packers, officials of the Union Stockyards company and the commission men doing business at the yards that a subpostal station be established at the Livestock exchange. spector Waters was accompanied on his tour of inspection by Postmaster Etter and others interested in improving the postal service at the yards. It is understood that the inspector will remain here several days for the purpose of ascertaining just what is needed and also the volume of mail handled at the exchange and by the packers. He will not make a report until he returns to Washington.

If You Want the Best

In looking at offices in different buildings, the greatest praise the owner or rental agent can give an office is to say that it is "as good as an office in The Pee

Building." It may be in some respects, but it can not be in every respect. The Bee Building is one of the only two absolutely fireproof office buildings in Omaha. The Bec Building is the only building having all night and all day Sunday elevator service. The Bes Building furnishes electric light and water without additional cost. The Bee Building is kept clean, not some of the time, but all of the

Keep these points in mind when looking for an office, and you will take one those listed below, if you are wise.

List of vacant rooms in

The Bee Building

Ground Floor.

First Floor. WITE 101: There is no finer critics suits in Omaha than this one. It is located just on the right hand of the great marble stairway, and has unusually large windows looking upon the front entrance way of the building. It fronts on Farnam street. One room is lixis and the other sxis. It has a burguar-proof vault, marble mantet-piece, hardwood floors, and will be freecoed to suit tenant. Price \$75.00 and \$1.51. This room is just at the head of the main stairway on the first floor, it would be a very desirable office for some real estate man or contractor. The floor space is lixis feet.

Third Floor.

ROOM 308: This room is 2ix8 feet and is very conveniently located near the elevator. A sign on the door can be readily seen in stepping off the elevator.

Price 216.00

Fourth Floor. thou 401: 15x13 feet. This room is next to the elevator and faces court. It has a large burgiar-proof vault and is well ventilated. Has good light, and for the price furnishes first-class accommodations...................

Fifth Floor. ight and well ventilated. It is very seidom that space of this size is offered in The Bee Building. It could be used to advantage by some firm employing a large number of clerks, or requiring large floor space—a wholesale jeweler, or manufacturer's agent, who would like to be in a fire-proof building, or it will be divided to suit the tenant. Price \$50.00 May on the same floor with a number of grain firms, it would be a particularly good room for a grain firm desiring first-class accommodation.

Sixth Floor. suite 616: This consists of two rooms, both 18½x11½. Each of them has a large burgiar-proof vault, have been newly decorated and are rooms where any business or professional man may be comfortable. Price for
