

FLOODS GROW MORE SEVERE

Water Plays Havoc with Crops, Bridges and Traffic in Nebraska.

MAIL AIDS IN WORK OF DEVASTATION

Swollen Streams Overflow Lowlands, Washout Tracks, Crops and Bridges, Entailing Loss of Thousands of Dollars.

SUPERIOR, Neb., July 8.—(Special).—The flood situation here is worse than ever this morning. The Santa Fe road, which has been open up to this morning, was closed by a foot of water running over the tracks southeast of town. The Burlington, which was blocked by a washout fifty feet in length and eight feet in depth between Superior and Guide Rock, finds conditions still worse this morning.

A stretch of track said to be 1,000 feet in length has caved into the Republican river about ten miles west. Two construction trains have been sent to the scene to build around the washout.

Jacob Buchleiter, a farmer living in the bottom southeast of town, stayed in his home with his family too long. The water rose to the danger point and a party rescued them in skiffs.

The Missouri Pacific, after much trouble, got a train south to Scandia, Kan., yesterday, where it was stopped by an eighty-foot washout.

All the corn on the lowlands has been damaged by the high water and some of it has been ruined.

The hailstorm which touched Superior Saturday evening did great damage in the vicinity of Cadams and Nora, Neb. The storm commenced at its worst about three miles northeast of town and swept through almost to the Thayer county line.

Crops in a strip two miles in width were utterly destroyed.

High Water in Little Blue.

HEBRON, Neb., July 8.—(Special).—The water in the Little Blue river is still rising and threatens an entrance into the Weatherall Bros' flour mill, which is situated on this stream. A large quantity of flour has been removed and stored in more secure quarters until the waters recede.

The farmers of Thayer county have become very much alarmed on account of the damage done to the crop by the constant rains.

Some of the smaller grains have been completely destroyed by the severe winds and rains, while hundreds of acres are now hidden beneath the waters which overflowed the banks of the streams.

Many acres of corn have been whipped into shreds by the fierce hailstones that have fallen, leaving nothing but the stalks remaining.

The farmers say that it will be impossible for them to secure more than one-third of a crop of all their grain.

The recent rains have almost completed the destruction of the country bridges. Those that are not washed entirely away are rendered unsafe for travel. The waters are still rising and it is difficult to say how soon the repairs can be made.

It is now estimated that the repairs will cost the county nearly \$10,000.

FREMONT, Neb., July 8.—(Special).—The heavy rains of the last week have filled the Platte river from bank to bank and no sandbars are visible. The mill dam on Fobbie creek, just south of Scribner, has been carried off by high water and some of the approaches to bridges badly washed. Small grain is suffering from too much water and wind. Many fields of oats are badly lodged and will not straighten up.

Rains Stop Harvesting.

DAVID CITY, Neb., July 8.—(Special).—The continuous heavy rains during the last three weeks has done a large amount of damage to the crop of small grain. The farmers are unable to continue harvesting. It is reported that on the Platte valley north of here the oats are all down and cannot be harvested. The small grain that is cut and in the shock is damaged to such an extent that some of it will not be worth threshing. Corn is damaged some but with the present indications, be a light crop, for the reason that farmers are unable to properly cultivate it and lay it by. A small amount of corn in low places is submerged and will be worthless.

GENEVA, July 8.—(Special).—More rain fell last night. It is impossible for much of the wheat to be harvested. Since June 4 12.25 inches of rain has fallen.

BELLEVUE, Neb., July 8.—(Special).—Owing to the heavy rains of Friday and Saturday the Platte creek is rising rapidly and has already flooded the bottoms west and south of here. Great damage has been done to crops and farmers in the flooded district will suffer heavy losses. At noon today the water had reached the village of Fort Crook.

WESTERN, Neb., July 8.—(Special).—This has been a very wet season here, 14.29 inches of rainfall for June, 5.87 for July, and 2.37 fell Saturday night, 33 of an inch Sunday night. Crops of small grain are badly damaged. Corn is doing well.

Nemaha out of its Banks.

TECUMSEH, Neb., July 8.—(Special).—Heavy rains for the past forty-eight hours along the Nemaha river have brought that stream out of its banks again. The bottoms are badly flooded.

WYOMBE, Neb., July 8.—(Special).—Owing to the recent rains the waters of the Blue river and of Indian creek have risen higher than at any other time this season, and they are still rising. Many fields of grain and corn on the bottom lands are seriously damaged.

BEATRICE, Neb., July 8.—(Special).—The flood situation here is unabated and the Blue river rose during the night at the rate of nearly two inches per hour.

Today the water is running over the paving on West Court street, and traffic over the bridge which spans the Blue on that street has been suspended.

A large amount of wheat in shock and

The World Is Wide but hardly wide enough for ROSE'S Lime Juice which is everywhere acknowledged to be the very best temperance drink. It is the product of the choicest West Indian Lime Fruit, and is always delicious, wholesome and refreshing. Ask your grocer or druggist for it, and insist on having ROSE'S.

NEBRASKA CROP CONDITIONS

Heavy Rains Have Damaged Wheat in Southeast Part of the State.

CORN DOING FAIRLY WELL, BUT IS WEEDY

Hailfall Ranges from Six Inches in Southeast Part of State to Nothing in the Sand Hill Country.

United States Department of Agriculture climate and crop bulletin of the Weather bureau, Nebraska section, for the week ending July 7, 1902:

The last week has been cool and wet, with less than the normal amount of sunshine. The daily mean temperature has averaged 3 degrees below the normal.

The rainfall was above normal throughout the eastern portion of the state and quite generally exceeded two inches, while in a few instances it exceeded six inches. In the western part of the state the rainfall was generally light.

The continuous heavy rains in the southeastern counties have been unfavorable for crop interests. Crops of all kinds on lowlands have been seriously delayed and considerable damage has resulted to rye but uncut wheat; the grain which is sprouting in the shock and comparatively little has been stacked. Oats have made a very rapid growth and in some southeastern counties are lodging badly. Corn has grown fairly well and although small in a healthy and promising condition, cultivation has been delayed and some corn fields are weedy. Potatoes promise a large crop, but in a few places are commencing to rot.

Southeastern Section.

Butler.—Three-fourths wheat cut; ground too wet to use machines in places, and some cutting with cradles; oats badly lodged; corn doing well; rye very heavy; corn doing well.

Clay.—Wheat harvest progressing slowly, but considerable progress made; beginning to thresh; rye very heavy; corn doing well.

Fillmore.—Little wheat cut during week; considerable damage done to wheat; oats badly lodged; corn doing well; rye very heavy; corn doing well.

Hamilton.—Wheat harvest nearly done; oats heavy and well headed; corn growing fast; some potatoes rotting; meadows and pastures good.

Jefferson.—Wet weather caused some wheat to sprout in shock; oats about ready to cut; some damage in river valleys by high water.

Johnson.—Wheat considerably damaged by wet weather; too wet for oats; corn doing well.

Lancaster.—Wheat damaged by wet weather; oats very heavy; corn doing well; potatoes extra good.

Lincoln.—Wheat and oats on lowlands injured by water; potatoes excellent; pastures good; oats lodging and beginning to rot.

Nuckolls.—Harvesting delayed by rain; oats very heavy crop; pastures fine; corn doing well.

Osage.—Wheat harvest well advanced; some wheat sprouting in shock; oats lodging badly; fruit and garden crops doing well.

Polk.—Harvesting retarded by rain; acres of wheat and oats in shock; falling or shelling out; oats lodged badly.

Richardson.—Wheat most all out, some growing in shock; corn doing well; rye very heavy; corn cultivated third time.

Saline.—Corn cultivation and wheat harvest delayed by heavy rains; meadows and pastures good; oats lodging badly in places.

Stanton.—Wheat harvest nearly finished; some in shock; corn doing well; meadows and pastures good; oats lodging on lowlands, but promise large crop.

Seward.—Wheat harvest about done, some wheat sprouting in shock; oats very heavy; corn on lowlands damaged by water.

Thayer.—Wheat harvest nearly finished, slight damage in shock; corn doing well; meadows and pastures good; oats lodging on lowlands, but promise large crop.

York.—Harvest delayed by rain; corn doing exceedingly well.

Northeastern Section.

Antelope.—Some rye cut; crops doing well; heavy rain.

Boone.—Excessive rains have retarded work; corn looks promising; small grain fine; but lodged in places.

DeSoto.—Wheat and oats headed out and look fine; corn growing fast; hay plentiful; meadows and pastures good.

Colfax.—Some rye and wheat growing in shock; oats heavy and badly lodged on lowlands; corn growing well; alfalfa splendid.

Cuming.—Corn cultivation and haymaking retarded by rain; pastures fine; potatoes large; oats good; corn improved.

Dakota.—Wheat harvest nearly done; doing well; barley nearly ready to cut; potatoes splendid crop; hay doing well.

Dodge.—Wheat harvest not all out and being damaged by wind and rain; oats lodged badly; some cornfields getting weedy; hay heavy.

Douglas.—Oats lodged some; some hay damaged by rain; corn looks well and promising; meadows and pastures good.

Fillmore.—Rye harvest in progress; wheat and oats promise good crop; corn growing slowly; pastures good.

Franklin.—Corn cultivated for the last time; corn growing well; grass and potatoes good; oats lodged.

Madison.—Corn has good growth; rye being cut; too wet for oats; corn doing well.

Pierce.—Some hay spoiled by rain; most cornfields coming out nicely; oats and wheat rank and good headed; good crop of hay.

NEBRASKA CROP CONDITIONS

Heavy Rains Have Damaged Wheat in Southeast Part of the State.

CORN DOING FAIRLY WELL, BUT IS WEEDY

Hailfall Ranges from Six Inches in Southeast Part of State to Nothing in the Sand Hill Country.

United States Department of Agriculture climate and crop bulletin of the Weather bureau, Nebraska section, for the week ending July 7, 1902:

The last week has been cool and wet, with less than the normal amount of sunshine. The daily mean temperature has averaged 3 degrees below the normal.

The rainfall was above normal throughout the eastern portion of the state and quite generally exceeded two inches, while in a few instances it exceeded six inches. In the western part of the state the rainfall was generally light.

The continuous heavy rains in the southeastern counties have been unfavorable for crop interests. RAIN POORLY DISTRIBUTED

Too Much in Some Sections and Not Enough in Others for Crops.

CONDITION OF CORN CROP FAVORABLE

Spring Wheat is Promising and Harvesting of Oats is Well Under Way, Although Lodged in Some Places.

WASHINGTON, July 8.—The weather bureau's weekly summary of crop conditions is as follows:

The northern portions of the country east of the Rocky mountains, that suffered from low temperature during the last half of June, due to the exception of New England, experienced more favorable temperatures. The Missouri and upper Mississippi valleys, lake region, middle Atlantic states and New England have received abundant rains, which proved unfavorable to the crop of corn in the north Atlantic states and portions of the upper Mississippi valleys and portions of the lake region and middle Atlantic states.

Drouth continues with increasing severity over a large part of the central and gulf districts, and rain is much needed in the north Atlantic states, where the week has been unusually warm, with showers over limited areas only.

The east has experienced a week of very favorable temperatures, with scattered showers and more than usual cloudiness, which is favorable to the conservation of the abundant rainfall of the previous week. The Rocky mountain plateau and North Pacific coast districts have experienced a week of remarkably low temperature, with unusual precipitation, which in the form of snow in the northern districts, and general frosts and freezing temperatures in Nevada and Utah. On the north Pacific coast the week was too cool and wet, but in California the conditions were generally favorable.

Improvement in Corn Conditions.

Under highly favorable temperatures the condition of corn throughout the central valleys, and the outlook for this crop in the principal corn states is encouraging, although in the states of the Missouri valley it has suffered considerably from lack of cultivation, due to excessive moisture. In Kansas the bulk of the crop is laid by and much is silking and earing. In Nebraska corn is rather small, but is growing nicely, although needing cultivation; three-fourths of the crop in Iowa is well cultivated and in normal condition; notwithstanding the unfavorable effects of heavy rains in Missouri the outlook in that state is the best in years; in Arkansas, Tennessee, the Ohio valley and lake region the general outlook is excellent; in the southern states a very poor crop is indicated, and in portions of the central gulf districts the early planted is injured beyond recovery.

Bad Weather for Harvesting.

The unfavorable harvest weather of the previous week in the states of the lower Missouri valley continued during the last week, although harvesting of winter wheat is now practically finished in that section. Some damage to grain in shock and stack is reported from Illinois, Missouri and Nebraska. Harvesting has continued in the Ohio valley, notwithstanding favorable conditions, is practically finished over the southern portion of the middle Atlantic states and has been doing well in the lake region. On the north Pacific coast lodging has been reported and harvest will be later than usual, but the general outlook continues favorable. Harvesting continues under favorable conditions in California.

Spring Wheat is Promising.

Spring wheat has experienced no unfavorable conditions during the week. The general outlook for the crop is generally very promising. Harvesting of oats is in progress in the lower Missouri valley, Tennessee and middle Atlantic states, and the crop is ripening in the Ohio valley, good yields being reported. In portions of the Missouri and Ohio valleys and upper Ohio valley considerable lodging is reported, but the general condition of the crop is promising.

Cotton Crop Deteriorates.

With showers over local areas only and very high temperatures, the cotton crop over much the greater portion of the central and eastern districts of the cotton belt has materially deteriorated, and all over the southern portion of the districts named, although considering the size of the plant it is fruiting well and is generally clean. In Tennessee, extreme northern Mississippi, Arkansas, Missouri, Oklahoma and Indian Territory the crop continues in promising condition, although it is being retarded in the size of the plant in portions of Arkansas. In Texas cotton shows further improvement and is making good healthy growth, except in the southern and northwestern counties, where it is at a standstill. While the plant is small, it is spreading nicely and fruiting satisfactorily, and but few reports of shedding and boll weevil are received.

A further improvement in apples is reported from Kansas and Oklahoma. A good crop of hay is being secured in the states of the Missouri and central Mississippi valleys.

In Montana, Idaho, Washington and Oregon haying has been interrupted by heavy rains.

Eleven Die of the Heat.

No indication of abatement of the hot wave at Pittsburg.

PITTSBURG, July 8.—There are no indications of an early abatement of the hot wave. The mercury at 11 a. m. was 84 degrees. Eleven deaths and six serious cases of prostration have been reported within the last twenty-four hours.

Take your baskets and picnic at Courtland beach.

SHOOTER AND KILLS SISTER.

Murderer Then Turns Revolver on Mother, Inflicting Probably Fatal Injuries.

BOSTON, July 8.—Herbert Hill today shot and killed his sister Alice at their home in Roxbury and then turned the revolver on his mother, who had come into the room to protect the daughter, inflicting probably fatal injuries. Hill escaped.

MINOR MATTERS AT LINCOLN

Acting Governor Steele Grants Requisition for Return of a Prisoner to Illinois.

LINCOLN, July 8.—(Special).—Articles of Incorporation of Nebraska Mining company of Omaha were recorded in the secretary of state's office today. The company is capitalized for \$100,000. Its incorporators are: Jacob Fawcett, Charles Leach, Chester J. Strock, W. H. P. Palmer, C. C. Colby and Paul Jensen.

Acting Governor Steele this afternoon honored a requisition from the governor of Illinois for Harry J. Simpson, now under arrest in Pierce county. He is wanted in Carroll county, Illinois, to answer to the charge of seduction. The service was related, but the acting governor, after listening to both testimony and argument, concluded to grant the extradition.

BODY FLOATING IN CREEK

Remains of Alfred Anderson Found in Logan Waters Near Bancroft.

BANCROFT, Neb., July 8.—(Special).—The body of Alfred Anderson, a young Swede, about 25 years old, was found floating in the Logan creek last evening by a son of J. O. Strickland, Bancroft, who came to town at once and notified the authorities, who went out and brought in the remains, which was decomposed almost beyond recognition.

The last seen of the unfortunate man was on July 4, when he has been drinking and a bottle of whiskey was found in his pocket. It is thought that this led to his death.

Farmer Drowns While Bathing.

RED CLOUD, Neb., July 8.—(Special).—Saturday afternoon Albert Wilson, a prosperous farmer living in Cather township, was drowned while bathing in a pond. Soon after entering the water he was seized with cramps. A neighbor tried to save him, but his efforts were of no avail.

Board Names Superintendent.

WEEPING WATER, Neb., July 8.—(Special).—At a meeting of the school board held at Weeping water, D. K. Luby of Superior was elected superintendent of the schools to succeed Prof. E. L. Rouse, resigned. Mr. Luby comes a very highly recommended.

Hangs Himself from Tree.

SUPERIOR, Neb., July 8.—(Special).—Mrs. Yetter, wife of a farmer living southwest of town, committed suicide Friday. The rest of the family had gone to a Fourth of July celebration, and upon returning to the home found the woman hanging from a tree.

Narrow Escape from Drowning.

BEATRICE, Neb., July 8.—(Special).—The 12-year-old son of Conductor Horne had a narrow escape from being drowned in Indian creek this afternoon. He was rescued by a farmer, who experienced considerable difficulty in pulling him ashore.

Beatrice Grants Telephone Franchise.

BEATRICE, Neb., July 8.—(Special).—The city council tonight passed an ordinance granting a twenty-year franchise to the R. Y. Montague investment company of Kansas City, Mo., to operate an independent telephone company in the city.

The Georgia Serenaders at Manawa are preparing to give an appreciative audience. It only costs 10 cents for any seat in this lovely summer theater and the show is well worth a dollar.

CATTLEMEN ASK PROTECTION

Are Going to Remove Animals from Indian Territory in Order to Save Them.

ADMORE, I. T., July 8.—Cattlemen have asked the federal authorities to protect their cattle until they can remove them from the territory. Large numbers of horses had been shot and killed within the past twenty-four hours, supposedly by Indians. Deputy marshals today arrested two men charged with cutting several miles of pasture fence, because the stock had been fenced in. More arrests are being made. The Choctaw tribal officials hereafter will not allow their domain to be used for grazing purposes. In the Chickasaw nation cattlemen are paying tribute in a tax of 25 cents a head. This tax is being enforced rigidly by the federal government.

The cafe accommodates 500 persons at once at Courtland beach.

MAYOR TURNS DOWN GIFT

Emporia's Chief Executive Vetoes Ordinance Accepting Site for New Library.

EMPORIA, Kan., July 8.—Mayor Morse today vetoed the city council's acceptance of a gift from Mrs. Carrie Plumb, widow of the late United States Senator Preston B. Plumb, of a site with plans and specifications, for Emporia's \$20,000 Carnegie library. Mrs. Plumb made the offer yesterday and the council accepted it last night by a vote of 5 to 2. In vetoing the council's action, Mayor Morse said that he disapproved of the location, which is opposite Mrs. Plumb's residence. Some of the councilmen say they will endeavor to pass an ordinance accepting the gift over the mayor's veto.
