CHICAGO, July 25—Bears were in full control of all grain markets most of the day. The tumbling was not confided only the control of all grain markets most of the day. The tumbling was not confided only the marphalation. The whole grain list, wheat, the control of all grain markets most of the day. The tumbling was not confided only the marphalation. The whole grain list, wheat, the control of all grain markets most of the grain list, wheat, the control of all grain markets most of the grain list, where sometimes the control of all grain markets most of the grain list, where sometimes the control of a control of the control of the

ago. Seaboard clearances in wheat and flour equaled 121,000 bu. Primary receipts were 1,419,000 bu. against 1,123,000 bu. last year.

July oats afforded the spectacular side of the blackboard story of the trading today. On a little seiling, stimulated by the very heavy receipts, July broke early to 53c. or a loss of 5c from yesterday's close. When the decline in the other grain pits was checked bids for several "fives" of new July put the price up quickly to a strong close, 2c higher, at 60c. The trade was still at sea as to the possibilities of the manipulation in this option. At the outset it was expected that the 685 cars of new arrivals today, with 172 cars of contract grade, and other contract stuff, total 300,600 bu, for deliveries, would break prices. Everything pointed to a deluge of oats this week. With only two days more to the July deal it was all guesswork whether the shorts had settled or would have enough contracts settled to avoid a bad squeeze. When the price reacted and advanced it was thought the final squeeze was at hand. Septembor was sold freely on fine weather and dropped from 22½c to 31½c and closed %c down at 32c.

Provisions were very weak on selling

and dropped from 22½c to 31½c and closed %c down at 32c.

Provisions were very weak on selling out of sympathy with grain weakness. Early the market was strong on a strong hog market. There was some fair support to lard, but other products were not wanted and prices declined sharply. September pork closed 22½c down at \$16.60. September lard 5c lower at \$10.67½ and September ribs 35c off at \$10.

Estimated receipts tomorrow: Wheat, 205 cars; corn, 125 cars; oats, 300 cars; hogs, 22,000 head.

Effort to Induce Speculation for Rise

Futile and Weakness Follows.

3,234,000.
But there is the same discrepancy in the money rates here and those abroad that there was when these foreign loans were negotiated. Money is now declining both in Berlin and in Paris and is rising here, without availing to check the calling home of credits, which necessitates the gold shipments. The removal of the feverish tone of Rock

ments.

The removal of the feverish tone of Rock Island has much to do with the undertone of weakness of stocks. The delay in the formal announcement of the details of the plan gives rise to some apprehension of changes. The criticism of the plan turns on the feature which proposes to convert stock into foreclosure bonds.

Late in the day the bears were encouraged by the failure of various attempts to put up prices to make a determined attack under which the market yielded sharply. The scramble amongst the room shorts to cover at the close and the resulting sharp railies revealed the professional character of this attack. The market closed active and extremely irregular. A feature of the day was the persistent absorption of Missouri Pacific at all levels, Colorado Fuel was notably weak.

The activity in the bond market was confined to some of the convertible issues. Total sales, par value, \$3,108,000. United States bonds were unchanged on the last call.

CATTLE—There was another light run of cattle here today, so that the market was fairly active and fully steady with yesterday on desirable grades. Buyers all took hold in good shape, so it was not long pefore practically everything was disposed of.
There were only a few cornfed steers on sale this morning and in fact there was scarcely enough to make a fair test of the market. The few loads of good stuff that was offered sold freely at steady prices, but there was nothing good enough to bring over \$7.50. When it came to the shortfed cattle the market was very duli, the same as it has been right along, and prices were, if anything, a little lower than they were yesterday. At any rate sellers had a hard time to dispose of those kinds at what looked to be steady prices.
The cow market was in fairly good shape and as compared with yesterday there was not much change in the prices paid. The better grades in particular sold at good steady prices without difficulty, no matter whether they were grass cows or had been fed corn. The common kinds, though, changed hands rather slowly, the same as usual, and were no more than steady.

Bulls, veal calves and stags, if at all good, commanded fully steady prices.
There was a good active demand for stockers and feeders of good quality this morning and the market could safely be quoted strong. The same as has been the case for some time past, the heavy feeders of good weight, flesh and quality were in the best demand. Prime yearlings also sold well, but common stuff of all weights was rather neglected and only about steady.

There were a good many western range sold well, but common stuff of all weights was rather neglected and only about steady.

There were a good many western range and the receipts this morn-stall included in the receipts this morn-stall incl
