Private cables from Brasil today almost without exception confirmed yesterday's advices of serious damage to the new crop, heavy frosts having formed all through the Rio and Santos districts. On the bad crop news foreign markets were strong and higher, Rio and Santos capecially so, private cables reporting further sharp advances in those markets today and an advancing Rio exchange rate. Shorts had a bad day of it here. Prices after the start continued to advance, profit-taking longs and importers having about the only coffee for sale, until at the close the market was firm in tone at a net rise of 20 to 25 points. The feeder market was the most active that it has been in a long time. A large number of buyers were on hand, and there were not enough to meet the demand. As a result buying was very spirited and everything desirable was disposed of in good season at strong prices. A big string of yearling ewes sold to a feeder at \$3.30.
