September Options Suffer Escessions Weak Ruling Grain Marketa

SUPPORT POOR AND WEATHER BEARISH

Fair Buying in May Corn, but September Moves Erratically-Provisions Irregular and Close Above and Below.

CHICAGO, Aug. 27.—All grain markets ruled weak today. Improvement in the weather was the most potent factor. Surport was poor and stop-loss orders were felt, particularly in the near deliveries of wheat and corn. At the close September wheat was %c lower, September corn %c off and September cats %c lower; September provisions closed 12%c lower to 22%c higher.

wheat and corn. At the close September of and September oats be lower, September off and September oats be lower, September provisions closed 13\( \) lower, September provisions closed 13\( \) lower to 23\( \) of higher.

Wheat opened weak under the influence of lower cables and favorable weather for cutting and threshing the spring wheat. Early trade was dull and of a waiting nature, with prices slowly easing off. Corn turned weak and, affecting wheat, brought out stop-loss orders and September broke sharply. The volume of business was not great and all day there was a heavy tone to the market. There were conditions, however, that at times made an impression on the crowd and prevented possibly heavy pressure from seliers. Receipts were failing off and grading was still very poor. Export clearances were fair, wheat and flour equalling 300,000 bu. More important as a sale retarding influence was the fact that Duluth did not receive a single car of wheat, whereas last year there were life care. Outside markets were weak and exerted an influence. Cash business was small. September started higher lower at 71\( \) of the siumped to 70\( \) of callied to 71\( \) and closed weak, \$\( \) off, at 70\( \) closed receipts were life ears, none of contract grade; Minneapolls received \$\( \) is an additioned weak, \$\( \) off, at 70\( \) closed business was small. September started weak and 77\( \) a year ago. Primary receipts were 1,001,000 bu., compared to 1,244,000 bu. a year ago.

Con started weak on the influence of dries weather and more liberal acceptances of Chicago bids in the country. All day September was offered freely and weakness prevailed. In other months there was better buying, particularly in May, in which there is said to be a fair short interest. Pxtremely small local receipts—17 cars, and only 5 or contract grade—had little effect against the wheat and weakness had an effect, but the slump in the hos were lower. Beptember started \$\( \) of \$\( \)

Weakness Follows.

Meskness Follows.

NEW TORK, Aug. 27.—Today's early strong market was a repetition of yesterday, but on a smaller scale. The resemblance extended to the reactionary tendency, caused by the heavy realizing in progress' under conver of the sustaining strength of a few stocks, but it was not until the announcement of the reduction of the dividend on Reading first preferred that the weakness of the whole market became active and prices broke all around to well below last night.

There has been an impression for many weeks that the Reading dividend would be reduced in order to extend the voting trust, which under the terms of the trust would be dissolved by the payment of one year's full dividend on the first preferred stock. The announcement last week that the Southern railway voting trust has been requested by stockholders to defer the dissolution of the trust by the post-ponement of the dividend on the preferred stock, was a strong corroboration of the expectation of smilar action in the case of Reading.

It is improbable, therefore, that the mere fact of the reduction of the dividend would have shocked the stock market had it not been for the determined way in which the reading stocks were advanced this morning on the purchase of enormous blocks of stock.

The sudden tumble in those stocks caused by the announcement of the dividend reduction gave rise to a chilling apprehension that the bold speculators who are leading the operations for advancing prices are acting without the best information in all cases and may be putting up all prices simply by the force of abundant funds and which has made the higher range of prices. The favorites of yesterday and today was an additional factor in arousing uneasiness as to the solidity of the demand which has made the higher range of prices. The cow market was fairly active and no quotable change from yesterday was noticeable. Trading was quite active on the better grades and sellers had no difficult to dispose of what they had at very satisfactory prices. The medium grades and common stuff soid rather slowly the same as has been the case for sometime past. There was not enough change in the prices paid for buils, veal calves and stags to be worthy of mention.

The active demand from the country yesterday for feeders brought speculators out good and early this morning, and they swere all looking for good, heavy, dehorned eartie. Such kinds could safely be quoted steady to strong and active. As there were every list loads shipped to the country yesterday the yards were pretty well cleaned of good cattle, but there were plenty of the commoner kinds left. That fact naturally made buyers slow about buying the inferior kinds, so that the market was dull on all but the good stuff.

The market on western beef steers was fairly active and no material change from yesterday was noticeable in the prices paid. Good western feeders also sold to good advantage, and the best grades could be quoted strong. The commoner grades of killers, as well as of feeders, were rather slow sale and no more than steady. Ranga cows of good quality were active and steady with inferior grades dull. Representative sales:
