PEATURES OF FALL PASHIONS.

for Pall Wear.

NEW YORK, Sept. 5 .- Recently Imported gowns for sutumn and winter wear show delightful cape collar effects. The collars fall but a few inches below the shoulder line, and a drooping and softly feminine look denotes the best models.

Sometimes these shoulder coverings are in two pieces, a short, plain collar over a trimmed one; the deckings of this stitched applications, fancy braids or velvet or taffeta bands. The front edges of both the capes round gracefully up to the throat. There, a trimmed square cellar turns over, hammered metal clasps or velvet strings fastening the stylish detail with street

Black may appear in the needlework of these splendid fixings-the cloth and silk insets (for there are silk insets, too) are commonly put in by hand-but the latest madness of fashion is to have the smart tollette in one color.

A modiste of reputation writes from Paris: "The most charming tollettes of the Bots are of cloth with trimmings of the same, strappings and stitchings always matching in tone. Costumes worn by ultra fashionables are of coral pink cloth, azure blue, mist gray and soft 'September'

Nothing could be more effective for house gowns than falls of lace on embroidery over the shoulders. Drooping fichus and capes give a look of grace where there is not to waste it, but to spend it and be acnone, just as a train does; a look of quainted with its management, femininity, if you will, which is always desirable.

A batch of pretty house growns displayed in a leading department store revealed the new cape collar in its most enchanting shapes. Everything was done to make the shoulders long and drooping, the widening of the sleeves at the bottom adding to the down falling effect.

A delicious house frock on the princess order showed bunches of grapes worked at excuse for elaborate ornamentation. Braided the upper line of the lace shoulder frill. The yoke and front of the dress, which was of ivery white cashmere, were in allover lace, bordered by a bias of white taffeta, needle-worked. The same banding zigzagged over the narrow front, four scant feills finishing the skirt at sides and back. A very dainty dress of pastel gray voile showed a shoulder frill of the same, drop-

Among the new autumn and winter colors many wonderful shades of blue are seen. There are also rich browns, dull reds magnificently effective, and the blue and green combinations so much worn this summer. Contrary to expectation, it is declared that this combination shall go triumphantly through the autumn and winter, trough it will be seen mainly in gown textures. A beautiful Scotch wool in invisible plaids (something very indistinct) shows a line

of black with the blue and green. Braids in Favor.

Braids will not be used again, put on in plain rows, the widths graduating, and in many novel ways.

A street gown of blue French cloth recently worn by one of New York's smart set showed the braid fever in a form as wild as effective. Huge targets had been made by sewing a narrow black hraid round and round. These bordered the skirt in a single row, the targets placed at intervals of six inches. The tailed bodice showed only two, but they were as vast as those of the skirt. Placed over each bust, these had something of the look of the breast shields worn by the Ama-zons of ancient history. Nevertheless, funny as it was, the striking arrangement called for the admiration of every eye. The gown was plainly executed, only for its present owner. Beyond a doubt it was the sole blossom of its kind in existence. The back of the jacket waist was relieved from plainness by a round collar trimmed with the braid in straight rows.

The same bordered the basques and deep cuffs of the slowves. These were tucked in a tight cap at the top, which greatly insed the length of the shoulders. At the bottom of the sleeves there were, of course, the usual puffs. It is plain that overskirts are once more striving for recognition, many of the imported gowns showing tentative efforts in this direction. As yet the jupe draperies

are beautifying, the double skirts seen being mainly cut with flowing Greek lines. But there are basques suspiciously reminiscent of the peplums of ye olden days, the upward slashings suggesting the former

Provided we don't return to "pinbacks" and bustles, however, we may endure the overskirt.

One of the new skirts has the back in three kilted flounces, headed by a wide band of trimming. The narrow apron gore -and apron gores are narrower than ever-is made entirely of the trimming, embroidery tucking or braiding. Graceful Skirts.

But the most graceful skirt is still the one severely simple in cut. The lines are long and flowing, a judicious shaping of the bottom producing the requisite foot flare. Sometimes the flare is made by the deep flounce seen this long while, but the newer method achieves it with the skirt cut alone. must have some change—is to outline a

The wife of one of our foreign ambassadors, whose husband was about to leave her on a long journey, was given a check book, which unfortunately and unwisely she had neved had before, with a sum of money in the bank. On her husband's return he asked her if she had had money enough. 'Oh, yes," she replied. "And, indeed I have half a dozen checks left;" her idea being that each check stood for as much money as she chose to indicate upon it, without reference to any specific deposit or anything apparently but the capacity of the vaults of the bank; while the bank officials, who had had her husband's greatly larger account, had suffered her to draw what she
