Killing Freet in Half Gorn Belt Rules Prices in Chicago.

WHEAT DOES NOT HOLD THE ADVANCE

Corn Closes Higher and Provisions Are Stronger, but Onts Closes Lower in the Pit Than the Day Before.

CHICAGO, Sept. 12.—A killing frost in hair the corn beit ruled the grain pits today. While corn shorts were targely prepared for this sort of news there was a good upturn in the coarser grain early and a good and active business was done. Principally in sympathy with the corn advance wheat made init early gains. The outside situation, however, was weak, warmer weather was predicted and while some of the corn was reported damaged to per cent longs in general took profits. Most of the corn gain was lost and wheat under pressure closed weak. In the end September and December wheat both lost %c. September and December corn gained %c and December oats lost %c. Provisions closed biblife to 20022%c higher.

So much precautionary buying in of short corn had been done in anticipation of the frosts that the market was bereft of the exciting feature that otherwise would have characterized the opening. Killing frosts were reported in the Dakotas, Minnsota, lowa and Nebraska, and Ighter frosts in southern Kansas. At Spencer, la. the damage was estimated at 50 per cent. What was missed in last night's frosts bid fair to be nipped tonight.

A big buying business started early, led by commission houses. The local crowd was somewhat against the price and sold, but the demand was good, and fair advances were registered early. Local receipts were improved both in quality and quantity and cables turned a trifle better. While most of the local crowd wanted early profits it was nearly mid-session when the outside began to be affected by the advances and at that time highest prices were reached. However, the late inquidation and predictions for warmer weather after tonight's probable frosts lopped off much of the corn gain, May was strongest and closed strong at %c up at 41%c.

The near options were supplied to the shorts in sufficient demand and with the

t 41%c. The near options were supplied to the The near options were supplied to the thorts in sufficient demand and with the sellef that the frost scare was passed raders allowed prices to close at barely irm figures. September sold as high as paid and closed 4c up at 60c. December sold at 44%c and closed 4c higher at 43%@ 4c. Receipts were 218 cars, 60 of contract rande.

soid at 44½c and closed ½c higher at 43½d 44c. Receipts were 218 cars, 60 of contract grade.

Wheat made some advances early in the day in sympathy with the corn bulge, but after a fairly heavy business the pit turned heavy and the close was weak. At the outset buying was general under the lead of a big elevator and the commission houses. The frosts northwest, the continuation of the small spring movement and good clearances were the other bullish incentives. After the initial upturns the early buyers turned quiet sellers and the gain and more besides was lost. English cables were lower, but the continent held firm. St. Louis was a fair buyer here. In-assunch as the corn market was the leader the clearing slump in wheat the clearing and to the decline in corn.

December opened ½@½c up at @½@65%c, sold to 65c and closed weak, ¾c lower at 6½@65%c. September sold from 74½c down to a weak close, ½c off at 73½c. Local receipts were 256 cars, 7 of contract grade; Minneapolis and Duluth reported 631 cars, making a total for the three points of 887 cars, against 558 last week and 1,14 a year ago. Seaboard clearances in wheat and flour equalled 646,000 bushels, Primary receipts were 1,112,000 bushels, compared to 1,479,000 bushels last year.

Oats had only a small share of the interest today, corn detracting largely from this pit. There were no prominent features and the small early advances were purely sympathetic. There was a small demand for cash stuff. Prices closed e

strong under the influence of the advancing hog market.

On the rise there was considerable selling, which caused some reactions. The pit, however, was bullish on the cold weather and higher corn. The trade was good at times, though it was principally local. January pork closed 206223c up at \$15.224. January lard life higher at \$8.624 and January ribs 5673c up at \$7.774.

Estimated receipts for tomorrow: Wheat, 185 cars; corn, 215 cars; oats, 195 cars; hogs, 10,000 head. The leading futures ranged as follows: Articles. | Open. | High. | Low. | Close. | Yes'y.

NEW YORK, Sept. II.—Call money advanced to 20 per cent shortly before the close of today's market and the list, which had been heavy throughout, closed with marked declines. Opening prices were lower, though mostly fractional, but the unsettled tone which characterized the day's comparatively moderate transactions was apparent from the outset. London came lower in the absence of New York support, though later there was considerable improvement and a better demand for internationals in that market. Missouri Pacific was the chief sufferer in the early trading, selling off about 2 points and making no recovery. The decline in the gransers and Pacifics was in part due to reports of frost in the corn beit. The selling of Baltimore & Ohlo was accompanied by reports that insiders had discounted the extra stock issue. St. Paul received better support soon after the opening, but in the main stocks which then held their own were of the so-called pool class. There was no great pressure against any particular stock, but the early high rate for call money—10 per cent—coupled with reports that some of the banks were showing discrimination in the matter of collateral, added to the increasing uneasiness. Louis-crimination for the matter of collateral, added to the increasing uneasiness. Louis-crimination from the matter of collateral, added to the increasing uneasiness. Louis-crimination for the matter of collateral, added to the increasing uneasiness. Louis-crimination in the matter of collateral, added to the increasing uneasiness at this juncture, the latter selling excitividend. Trading received another check in the second hour, when call money advanced some more, but no great amount of long stock seemed to be offered. Nevertheless it was clear that a number of weak accounts were shaken out. There was a rally in the granger group on reports that the frost had done little damage and at the same time Manhattan also selling ex-dividend was being absorved in small lots on rumors of closer relations with New York Central.

The at the Close.

same time Manhattan also selling ex-dividend was being absorved in small lots on rumors of closer relations with New York Central.

The United States Steel shares were heavy, with little or no evidence of support, but the strength of Union Pacific and St. Paul was suggestive of pool support, while the weakness of Chesapeake & Ohio was attributed to inside seiling. A further reactionary movement set in during the second hour of the afternoon, when money advanced to 15 per cent.

Declines at that time embraced practically sill the active issues and brought prices to the lowest level of the day. Maximum declines of 2 per cent were registered by St. Paul, Missouri Pacific, Norfoik & Western and Northwestern, with a 4-point decline in Louisville & Nashville and even greater losses in the specialities. Announcement of the 20 per cent rate on call money was the signal for another selling movement, but partial recoveries were made by St. Paul and Louisville & Nashville. The final dealings brought some more liquidation and the closing was heavy and unsettled. In addition to the net losses already mentioned net declines of a point or over were made by Atchison, Baltimore & Ohio, Chicago & Northwestern, Reading second preferred, Minneapolls, St. Paul & Sault Ste. Marie preferred, North American, Westinghouse, New York Airbrake, Virginia-Carolina Chemical Issues, the copper stocks and numerous others. Net gains were the exception and mostly fractional, London traded in about 1,500 shares, mostly on the buying side during the decline. Aside from the squeeze in the money market the monetary outlook generally was disquieting. Forecasts showed turther heavy losses of cash by the banks, the greater part of it to the subtreasury, which pald out over \$440,000 for pensions and almort \$2,000,000 for gold, also transferring \$150,000,000 to this center and Boston were not confirmed.

Foreign Financial.

Foreign Financial. BERLIN, Sept. 12.—On the bourse today high-class investment securities were in fair demand, but in the absence of specu-

New York exchange. On the Stock exchange business was duli and irregular. Consols were easier and home rails were more cheerful. Americans were irregular, the drop in New York having a discouraging influence. Prices generally were under parity. The Chicago, Milwaukee & St. Paul dividend and the new issue of Baltimore & Ohio had little influence. Business closed oull. Call Money Advances to 20 Per Cent

& Ohio had little influence. Business closed oull.

PARIS, Sept. 12.—Prices opened steady on the bourse today, buyers being influenced by the prospects of cheap settlement money. Spänish 4s and Turks attracted attention. Rentes were neglected. Business was small. Brazilians were well supported. Argentines were weak and Ottoman banks were bought. Spanish rails improved, metropolitans were very firm. Thomson-Houston improved. Russians opened weak, but closed with a recovery. Kaffirs were heavy early in the day, but firmed up at the close. The private rate of discounts was 11-16 per cent.

PARIS, Sept. 12.—Three per cents, 101f 42bc for the account. Exchange on London, 25f 20c for checks. Spanish 4s, 85.25.

feds on sale this morning, but the market was in bad shape. Packers were bidding so much lower that sellers did not consider their bids as being anywhere near the market, but, on the other hand, packers claim that they have been paying entirely too much for the short fed catile at this point as compared with Chicago. It was late before any business was transacted and the prices pald were a good deal lower than the same kinds have been bringing all the week. The general opinion was that strictly good corn cattle would not have shown much change, but there were none here to make a test of the situation. Amount. Inc. Dec.

NEW YORK, Sept. 12—COTTON—The market opened firm and 469 points higher in response to a builish set of Liverpool cables. The English market was influenced by less favorable crop reports and continental buying orders. The local trade was made very uneasy by the appearances of a cold wave over the western belt and the presence of freezing temperatures just north of the cotton country, the range being from 28 to 38 degrees. Fearing possible frost formation in the west tonight local shorts ran for cover immediately after the opening and quickly bid the whole list upward, January reaching 8.88c. Liverpool took fright at the cold weather reports also and the close was 4½ points up on some options. Receipts were very thoroughly discounted. After a slight reaction the market again turned strong and rushed up to viic for January on urgent general buying, started by an official forecast for frost tonight in Okiahoma and Arkansas. The bears having fresh in mind the condition report of 64 on the 3d inst. were greatly alarmed by this new factor and feared positive disaster possible, as the records show no precedent for this time of the scasson. Still later the market settled back several points under profitaking and bearlsh weekly statistical statements, but once more shot upward toward the close on strong buil support and vigorous public buying. The market was finally firm and net 13 to 16 points higher. Total sales were estimated at 350,000 bales.

COKE BLOCKADE IS STILL IN EXISTENCE

General Conditions in the Business World East and West Are Encouraging-Lack of Fuel a Menace.

NEW YORK, Sept. 12.—R. G. Dun & Co.'s Weekly Review of Trade says:
Industrial activity is greater than at any recent date. Many new factories and mills have been added to the productive capacities and idle shops resumed through the settlement of labor controversies.

A coke blockade still exists, the railways being unable to handle the output, which is above all records and in urgent request. Despite the rapid development of transportation facilities, the nation's needs have grown still faster and the situation is distressing for shippers and consumers.

Large crops are being harvested and the greater abundance of foodstuffs caused a decline in prices of commodities during August of 3½ per cent, as measured by Dun's index number.

Retail Outlook Bright.

Retail Outlook Bright.

Retail trade is large, with a bright outlook for the future in jobbing and wholesale business. There are few of the cancellations so numerous at this time last year, while collections are improving. An advance of 223 per cent in bank exchanges at New York over the same week last year cannot be explained by speculation, as dealings in stocks were heavy in 1901. Railway earnings in August exceeded last year's by 4.2 per cent and those of 1900 by 18.1 per cent.

Although the weekly capacity of pig iron furnaces in blast September 1 was reported at 335.112 tons by the Iron Age, it has since been appreciably curtailed by the inadequate supply of fuel, on which account numerous furnaces were flown out or at least banked. As consumptive requirements are increasing it is necessary to place orders abroad more extensively, and in some cases the entire output of foreign plants has been secured. Not only raw material but billets and even rails are sought in other markets, German mills offering the best terms in most cases. Heavy importations have prevented further advances in quotations, but domestic producers have a steady market for their outadvances in quotations, but domestic pro-ducers have a steady market for their out-put, contracts still running far into the future.

New Locomotives Needed.

Railways are in great need of new loco-motives and other equipment.

New England producers of boots and shoes are insisting on full prices and some grades that were slow to respond are now sharing the signs of improvement. grades that were slow to respond are now sharing the signs of improvement.

No weakness is shown in leather, some selections still rising more, particularly the better grades of sole and belting butts. Slight reactions have occurred in some packer and country hides, but most lines are still firmly held. Liberal receipts have not depressed foreign dry hides.

Textile mills are well occupied, with prices sustained in all cases and moderate advances in some cotton goods which are indemand for quick delivery. With the completion of early orders there has come a quiet market for woolens and worsteds, but mills have large contracts on hand.

Low stocks of wheat and poor grading of receipts, together with fears of frost in corn sections, sustained quotations when a decline would have been imminent if full confidence were placed in official returns of conditions.
