all kiftds met with ready sale, while the ini. commoner grades were neglected and hard to dispose of at what seemed to be saits-factory prices. There were a few bunches of cornfed steers in the yards, and as high as \$7.50 was paid. The sales that were made looked just about steady with other sales that have been made of late. Buyers seemed to want them, and as a result all that were offered changed hands in good season. The cow market was fairly active, par-ticularly on the more desirable kinds, and just about steady prices were paid all around. There has been a pretty good de-mand for canners for the last few days. but of course prices are low, as supplies have been very heavy for some little time. Bulls, veal calves and stags sold in just about the same notches as they did yester-day. The stocker and feeder trade continued

Builts, veal calves and stage sold in just about the same notches as they did yester-day. The stocker and feeder irade continued active on the better classes and slow on the common kinds. The demand from the country yesterday was in pretty good shape and the good heavy cattle and also the ighter weights showing quality moved quite freely, but the same as has been the case right slong, inferior grades sold very slowly. As a result commission men found it a difficult matter this morning to dispose of their cattle lacking in quality and especially the inferior light weights. Western range steers that were good enough for killers commanded steady prices and the market was fairly active on the more desirable kinds. The proportion of killers was not at all large, so that packers had little chance to pound values. Feeder steers that were at all desirable also sold freely at steady prices, with the common kinds duil. Range cows could be quoted
