of 1/20 per pound on soft shell nuts is re-ported. The rest of the list is strong at the old figures. The coffee market has shown no particu-iar change since last report. It seems to be fluctuating back and forth through Market Mar

be fluctuating back and forth through a narrow margin, without any quotable gain in either direction. The tea market, though, is very strong and higher prices are being looked for. In fact jobbers say they would not be surprised to see the market practically cornered and much higher prices prevail. According to reports the Japan crop was damaged 30 per cent by froats and indications point to a short-age everywhere. It is claimed that not a pound of early picked teas can be bought in Japan. Japan.

Active Demand for Dry Gouds.

<text><text><text>

No Change in Hardware.

Leather Goods Continue Firm. The leather goods market continues very firm and manufacturers are either asking a little more money for their lines or eise taking a little out of them to anake up for the high price of leather. So far as the local situation is concerned wholesalers report trade very active and look for a brisk demand next week when the high price the full of buyers. They are rushing out their fall shipments as rapidly as possible and most of the houses are. The rubber goods trade continues active both en footwear and clothing. With a normal winter there seems to be but little doubt but what more goods will be sold out of this city than eyer before. Fruits and Preduce.

Fruits and Produce.

Fruits and Produce. There was a liberal demand hast week for fruits both from the city and the country. There has not been much change in the prices, but it is evident that the season for peaches and plums is rapidly coming to a close. California and Colorado are fur-nishing the most of the peaches, though there were a few Michigans on the market is week. In another column will be found the prices at which the different lines of truits as well as of vegetables are selling. Receipts of eggs have been rather light all the week and as a result prices have advanced a little. The same is equally true of butter and of poultry. The demand has been of liberal proportions, so that all the stock offered met with ready saie.

week ago. Although the big bulk of the cattle this week consisted of western rangers the pro-portion of beef steers was not at all large. The feature of the trade seems to be the unevenness of the prices paid, and as a re-sult there is considerable difference of opin-ion as to the position of the market as compared with a week ago. As a general thing, however, the best grades may be quoted fully steady with last week, but very few of that class have been coming. The top price for the week is \$5.45, but they are safely 15c lower than they were a week ago. Cattle on the Texas order are also lower for the week. The very common grades have not shown much change. Good western feeders of all weights are also fully steady for the week and have sold freely. The medium and common kinds, though, have been neglected and are unevenly lower. Range cows are just about steady with the close of last week, the advance of the first half of the week having been iargely lost. HOGS-There was a light run of hogs

with the close of last week, the advance of the first half of the week having been largely lost. HOGS-There was a light run of hogs here today, but as reports from other points were not favorable to the selling in-terests the market opened about 5c lower than yesterday's average, or about steady with yesterday's close. Later in the morn-ing the feeling became a little better and a good many hogs sold only a shade lower than yesterday's general market. The work the middle of the market. The bulk of the sales went from \$7.35 to \$7.35 and as high as \$7.45 was paid. As will be seen from the table of receipts above the receipts for the week show an in-crease over last week, but a decrease over the same week of last year. The first half of the week prices advanced materially. but for the past three days the market has been going down rapidly and the decline amounts to nearly \$5c, and as compared with the close of last week the market is fully be lower. Corn has long fed millions-it is now destined to far wider uses in manu-facturing its millions of acres of waste stalks and pulp for paper and cellu-

THE NATIONAL FIBER & CELLULOSE CO.

Are preparing to work up the wasted corn stalks the coming season in their first great central factory and depiting station, which are being established at Kankakee, 10., and nearby towns.

Kankakee, II., and nearby towns. This is the greatest discovery of this truly wonderful age and will create more wealth and bring comforts to more people than any other discovery of this century. Consider the eighty million tons of now wasted corn stalks throughout the corn belt made into paper, box boards, cellulose compounds and hundreds of other valuable products. Consider the millions of people benefited. Consider the vastness of the field. Commerce will carry our manufactured wares to all parts of the world. Then you can realize the millions to be made out of this new industry. What are the gold mines, coal mines or other minerals compared with the corn fields? When all these are mined out, sumshine and rain will renew the vast corn fields each year while civilization lasts.

THE NATIONAL FIBER & CELLULOSE CO.

invite you to visit their demonstration plant at 479 W. LAKE ST.: CHICAGO. Watch the machines do their work and see the product. If tinable to de Uds, send for a handsome souvenir made from the corn stalk pulp. We are selling their \$10,00 shares now at \$2.56

October first the price advances to \$3 per share and other ad-vances will quickly follow as progress warrants.

If you wish to create a dividend paying estate for old age, we recom-mend the purchase of this stock. Remember date of advance is OCTOBER FIRST. Write or wire us at once to reserve you a block of this stock, as this alotment is being rapidly sub-scribed for.
