The location of the proposed Nebraska building is on the outskirts of the large area set apart for state buildings and at the end farthest away from the main features of the exposition, but it is near one of the main entrances and railway terminals and a street railway terminal is Savage said that there is no state to which portance than Nebraska unless it be Missouri, and that he will recommend an appropriation of not less than \$75,000.

Fix on Their Figures.

The State Normal board has decided to ask of the next legislature for an appropriation of \$73,500 for salaries and all other expenses and supplies for the blennium. The raise in the cost of living has moved the board to increase the salaries of teachers. Additional teachers will also be needed. The range of wages at the Normal now is \$800 to \$1,300 a year. The last legfslature tried to get these figures reduced, but the board insisted that it would cripple the teaching force if done. As fixed last year the amount for salaries for the two years was \$52,000. Exactly \$10,000 more will be asked next winter.

It is unofficially given out that a request will be made, although not through the board, for the appropriation of \$75,000 for the building of two more structures at the Normal. One most desired is a library. An assembly hall is also badly needed. These two buildings were cared for in the last appropriation bill, \$43,500 for the assembly hall and \$32,000 for the library, but Governor Dietrich cut both of them out with his little veto.
