MINING IN THE BLACK HILLS

Preparations Being Made for Winter Campaign on Many Properties.

NEW COMPANY GETS IN ON RAGGED TOP

Mining Association Completes the Work of Raising Funds for Entertaining the Mining Congress.

DEADWOOD, S. D., Oct. 12 .- (Special.)-Superintendent Allen of the Lucky Strike Mining company, the grounds of which are situated at Benchmark, on Elk creek, returned last week from Stoux City, where he had been to attend a meeting of the etockholders and directors of the company. At the meeting it was decided to ask for bids and award at once the contract for erecting a small stamp mill and saw mill on the ground. The claims of the company are all heavily timbered, and the sawmill will be used for the purpose of getting out timbers and lumber for the stamp mill. The development which has been done on the ground of the company during the last spring and summer has opened the ore bodies sufficiently to warrant the making of this improvement. Mr. Allen expects to have the work started on the plant this week and to have it in running order this year. While the ore is a free milling proposition it is proposed to add cyaniding tanks for the treatment of the tailings. Three veins of free milling ore have been opened up on the property, and on two of them a good deal of development work has been done, while on the third the work has been confined to the surface and is in the nature of open cuts, which have exposed the vein for a considerable distance along its strike, and the ore taken from these workings give very fair assay returns. One vein, which is shown on the White Horse, Black Horse, Lillian and Bird lodes has been exposed for a distance of about ing in several places, and a week or so 5.000 feet. This yelp, at a depth of eighty feet, is fourteen feet wide and will assay from \$18 to \$22 per ton gold. Another shaft of fifty feet has been sunk on this vein, of fourteen feet on the ledge when the from which cross cuis and drifts have been strike was made. A couple of shots had run, and in all of them the ore is of the same average value. Besides these workings two tunnels have been driven on the some of the specimens being rich. The win from Annapolis only 11 to 0. vein, both of them in ore which is as good ore body where the find was made is ten as that found in the shafts. About 2,000 feet wide, and all of it prospects well in Ithacans had for opponents the Williams feet to the west of this vein another vein the pan, while there is at least three feet college eleven. Two weeks ago Harvard twenty feet in width has been opened up of the vein which is exceedingly rich. A defeated Williams only 11 to 0 in the first on claims owned by the company.

be run continually during the winter months a freemilling proposition. The company and should the cre prove to be so good as the management has every reason to be-

them a good idea of what is in their ground. New Company on Ragged Top.

fixed to prosecute mining operations in the Ragged Top district. The company owns 600 of land adjoining the ground of the Spearfish and Deadwood-Standard, two companies which are at the present time operating evaniding plants with a daily capacity which aggregates 500 tons. These companies are operating on the same shoots of ord-Herald, two characters, two characters. cers of the company are: William Lardner, topics of the time and about topics that directors. Most of the company's ground these verses by Cynthia was as follows: has been patented, and the rest is ready to be patented. The company will at once begin the work of developing the ore shoots which have been exposed on its ground, and will also make arrangements for the erection of a treatment plant. The Potsdam company is a Deadwood organization and has been incoroprated under the laws of the state

of South Dakota.

The Ak-Sar-Ben Gold Mining company is the name of another new company which on Sheeptail gulch and which owns about offered "genuine black diamond stickpins" fity acres of good property. The officers at 15 cents apiece. The "black diamonds" Neb., vice president; A. D. Benway, Lin- brisk at times and scores of men wore them coln, Neb., secretary and treasurer. On one of the company's claims, the Maggie, there has been opened up one of the largest hoots of ore in the Black Hills. This ore silicious and one of the best cyaniding reading: proposition in the Hills, and will assay as high as \$18 to the ton. A tunnel is being bust us." run on this shoot of ore, which is opening it up, and another tunnel has been started the contact between the trachyte and "Buy now at reduced prices. We guarantee limestone, and the indications are that anthese to be genuine anthracite. Come here other big shoot of ore will be struck. The company will continue work on its ground late." of the winter, and get it in shape so that it can erect a treatment plant of its windows. own in the spring. It is said that the company is a strong one and able to make all the improvements necessary to work the ground.

Mining Association Election.

The Black Hills Mining Men's association will hold its annual election of officers on the 16th of the present month. At the meeting the committees which have been collecting the \$3,000 guarantee demanded the American Mining congress will make a report. It is known beforehand that the amount has been raised and that a fund of at least \$11,000 has been as good an guaranteed for the entertainment of the mbers of the congress when it assembles in Deadwood and Lead next year. The association has been one of the greatest aids to the mining industries of the Hills, for it has really been a bureau of information to the would-be investor, and the reports sent out by the secretary on properties and mining districts have been conscientiously correct, for part of the pursome of the association is to protect wouldhe investors. The association has a very large membership, and it comes from every district in the Hills, and its meetings are not only entertaining socially, but are always a source of instruction, for it is the practice at every meeting to have a paper

read by some authority on mining. Making Old Mine Produce.

GALENA, S. D., Oct. 12 .- (Special.) -- Rod Wards mine, is taking out some very high grade silver-lead ore, which he is adipping to the Horseshoe smelter at Rapid City.

"Nossing."

"Nossing."

"Nossing."

"Alas, eet ees too true, Nobedy weel trust-a me." He sent four cars to the amelter last week and is now leading four more for shipment to the same place. The ore carries from sixty to 150 ounces of silver and about 56 per cent lead. Until Mr. Murray took a lease on it, it had been idle for a number of years, but he has cleaned out the old workings, and were the shipping facilities better could send several hundred and is now leading four more for ship-

tons a week to the smelter, as there is large body of ore in the mine.

The Rattleanake, which is being worked under leave by Bart Harris, is producing a high grade of cyaniding ore, which is being shipped to the Imperial mill at Deadwood for treatment. The last shipment made consisted of four earloads, and Mr. Harris is loading several cars at the mine now. The ore goes about \$12 to the ton on the average, but there are streaks in it which

will assay very high. The Sunday mine, close to the Rattlesnake, is taking out some very good ore, which is being sent to one of the Deadwood syanide plants for treatment. The ore is similar to that taken from the Rattlesnake, in fact the shoot of ere which is now being worked is a continuation of the one in that mine. A short time ago Bart Harris bought the privilege of working over the old dump of this mine, and made such a good thing out of it that the owners of the property resumed work on the mine themselves, with the result that they have opened up one of the richest shoots of ore in the Ga-

iena dietrict. The new cyanide mill for the Golden Crest is now well under way and ready for the machinery, which should begin to arrive this week. The stone and brickmasons have completed their work and the carpenters are well along on the building. Work in the mines is progressing finely and all of the underground workings will soon be connected with the company's big heist. The ore they are getting le of a good quality, and there appears to be an abundance of it.

Rich Strike in Columbia.

ROCHFORD, S. D., Oct. 12,-(Special.)-

A strike was made this week in the new shaft which has been started on the Columbia's ground, one and a half miles from this camp, which has attracted considerable attention in this district, and which promises to develop into something good. For several months the company has been prospecting its ground, undecided where to sink its permanent working shaft and to erect a hoist. It had been workago started this new shaft on the vein where it is exposed on the surface, and on Wednesday last it had reached a depth blown out a quantity of ore which on examination was found to carry free gold, The small plant which is to be built is has been assayed and the returns give purely for experimental purposes and will \$57.37 gold, which is exceedingly high for did so in a way. Cornell rolled and should the cre prove to be so good as the management has every reason to believe it will, a larger plant will be continued here and by the time
Besides the Lucky Strike company, there
are other companies working ground in the
vicinity, but none of the ground has received
the development which has that of the
Lucky Strike. The Peterson ground, which
has been worked only on the surface, shows,
some very rich ore, in fact within a few fest
of the surface several tons of very rich ore,
have been taken from the vein, which has
been sacked and shipped and the returns
have been unfficient to keep the work on
the property going steadily. A number of
Deadwood people are interested in the district and with the crection of the Lucky
Strike plant they will be given to this shaft and
tested on a scale sufficiently large to give
them a good idea of what is in their ground.

Not command the several tons of the district and with the crection of the Lucky

Reuben, Reuben, I've been thinkin'
What an awful thing 'twould be
If they took to burning diamonds
And sold coal for jewelry.

This was Reuben's response: Cynthia, Cynthia, I've been thinkin'— And I know you'll take my word— Not one-half the population Ever'd know it had occurred.

This passed for merely nonsensical rhyme No one ever thought coal would be sold for jewelry, but that is what is being done in Chicago these days. A man stood at has recently been organized to work ground Adams and Dearborn streets yesterday and of the company are: O. L. Benway, Rock Is- were lumps of hard coal fastened to washed land, Ili., president; J. W. Good, Chadron, gold ping. The sale of these jewels was in their cravats. On the display board the man held before him was the sign:

"Hard Coal, \$25 a Ton." Along with the pins were sold badges

"We must bust the trust or the trust will "The price of these pins will probably go up in a few days," cried the street salesman.

Similar pins are also to be seen in shop

An Enthusiastic Rooter.

Indianapolis News: "See that man in front of you?" whispered the fat man to the lean one sitting next to him on the bleachers. "Look at his hands. Base ball

The hands referred to were bruised and the fingers blistered. "What position did he play?" whispered the thin one.

"He never played." "But his hands?" "He got 'em that way cheering for deaf mutes' team."

From Sole to Upper.

What To Eat: "What is this leathery stuff?" the diner asked, when the second course of the dinner was served. "That is a filet of sole, mir," replied the

waiter. "Take it away," said the diner, after attacking it with his fork, "and see if you can't get me a nice tender piece of the upper, with the buttons removed."

Papa and the Count.

Cleveland Piain Dealer "Tell me frankly, count, how much you owe."
"Really, sare, your questions covers me wis confusione."
"That's all right. Confide in me. If you are to marry my daughter I want you to be open and honest. How much do you owe?"
"Neasing."

SURPRISES AT FOOT BALL

Saturday's Games Such as to Pussle the Wirest Dove Makera

PENNSYLVANIA'S GOAL LINE CROSSED

Swarthmore Holds the Red and Blue Down and Scores, and Other Big Teams Have Their Hands

Full. With one of the vaunted Big Four teams

scored upon and narrowly missing defeat and with the other three winning by comparatively small scores, the foot ball games of Saturday seem to have developed some astonishing conditions in that company at least. In a heavy rainstorm the team rep resenting little Swarthmore college held the University of Pennsylvania down to a score of 11 to 5, the Quakers winning only by one touchdown. This, too, was through fifty minutes of play, halves being made twenty-five affinites long.

This lack of scoring ability on the part of the Red and Blue is surprising, far more so than the same quality as exhibited by the remainder of the quartet. Yale only did Brown 10 to 0, but from all reports the Blues were up against a powerful team, one that is likely to be heard from later. Then Princeton defeated Annapolis only 11 to 0, which is not flattering work, though still a credit so long as the Tiger goal was unassailed. Harvard scored heavier than any with 22 to 0 against the University of Maine, but it must be remembered that the Crimson was playing a team that either Brown, Annapolis or Swarthmore would defeat, the first two very easily,

On the whole the real interest in the east as far as Saturday's games were concerned is found outside of the four lead-The showings of Columbia, Cornell and little Georgetown university are the Excessive Speculation Lends to Liquisurprises. One week ago the Georgetown team defeated the Annapolis middles 4 to 0, scoring two safeties. This was a great surprise, as Georgetown had never won from the sailors before. This week Georgetown wins again, beating St. John's college 18 to 0. That was, of course, rather expected, but meanwhile on the same day the Tigers

Cornell presents a sort of anomaly. The sample of the ore taken across the vein Crimson game of the season. Cornell was

continue to run up the biggest scores, with wood Thursday for the purpose of engaging the University of Illinois coming in a close The Potsdam Gold Mining company is the miners. The company is a strong one and second, and far ahead of the remainder of name of a new corporation recently organ proposes to open up its ground thoroughly. the clan, as was predicted. The Cophers meanwhile only piled up twenty-nine points against Beloit, which was hardly what was expected of them. Beloit is a small school. and last season Michigan made eighty-nine against it and Wisconsin forty much earlier in the schedule.

The wins of the Wolverines from Indiana and the Badgers from Lawrence are so big as to be almost unmentionable as foot ball contests. Nor has either team anything threatening scheduled up till their own meeting on November 1 in Chicago, the big game of the season. Each school has been playing for this one game ever since it was agreed upon a year ago, and it is amusing to see how careful Wisconsin was. and Michigan also, not to sign a single heavy game before then, the Badgers even cutting Nebraska out of a contest on that account, though ostensibly for other rea-

Nebraska's victory over Grinnell did no: bring out a large enough score to be satinfying. Drake beat Grinnell a week ago, 11 to 0, and Nebraska should have done twice as much at least. However, the goal line is still intact, and that speaks well for defense.

Of the same class was lowa's win over Drake. With the latter team playing admittedly "bum" foot ball, being slow and out of form, the lowens should have rolled up more tallies than a dozen. In view of these two games it will be interesting to see how Kansas and Drake will fare next Saturday. That game will offer the first line of the season on Coach Curtis' team, which he will take north against the Badgers of his alma mater a week later, and which plays Nebraska at Lincoln on November 8.

Missouri's showing against little Simpson college does not speak well for the Columbia boys. A score of 11 to 6 is no compliment to the Tigers of the west, and and get the real article before it is too that they let Simpson score is still stronger criticism. As they stand today, Nebraska has plainly a far better team than Missouri, and is probably superior to Kansas.

IOWA GETTING GOOD PRACTICE Game with Drake Serves to Correct

Some of Its Serious Faults.

IOWA CITY, Ia., Oct. 12—(Special.)—The close of the second week of the Iowa foot ball season with the total scores of the 'varsity 75 to 5 is most satisfactory to the Iowa coaches and management. The game with Simpson college on Iowa field next Saturday will furnish the practice desired for the third week without injuring the players too much for appearance on the day of the first big contest of the season a week from Saturday. The plays which are to be used against Minnesota on Iowa field October 25 will be largely under control by the team by the end of this week. Four new plays for the game with the Gophers were tried in practice the latter part of last week until they were reduced to a amoothness satisfactory to Coach Kinpe.

The Drake game Saturday furnished the kind of practice which the Iowa team needed. The inckles this year have not had the practice which they should have had and the strength of the Drake team being largely in its tackles, the instruction gained from the contest will go far toward making these two positions stronger and able to stand against Minnessota. The halfbacks were given a training Saturday which showed its benefits before the close of the game. The Iowa backs have been tackling high this year. This is due partly to injuries to their shoulders which have made them wary of alternpting the correct low tackle when they seemed able to down the runner by an easier method. Drake, however, has some fast halfbacks, who eluded the Iowa backs with their high tackles in the first helf the Hawkeye backs had learned their lesson and were tackling as they should. Another weakness of the Iowa team was its slowness in charging when on the defensive. This was particularly true of the tackles. The gave the Drake backs an opportunity to get past them and threw upon the ends so much labor that the ends rebelled guite stoutly in one of the many particularly true of the lawkeyes and afforded the Drake men two tries at a field goal from the lowa twenty-yard line.

The failure of the lowa team to run u

a larger score Saturday was largely due to the exasperating and unusual way in which Drake played the game. Stopping after every down to get breath and long, wordy contests with the referee were new things to the lows players. Much of the lows game is its swiftness of attack and it was impossible to attack swiftly when the opponents isld down after every Jown. Two years ago Drake attempted this sort of play, but it was stopped at once by Referee Raiph Hoagland. Cumpire Burkland did all he could Saturday to stop it by yelling "Play built" until his throat was hourses, but he did not avail with the referee. Mr. Stipp was taken as an official on very short notice, it being thought until, midnight Friday, owing to nondelivery of a telegram, that Paul Hayner of Chicago could be obtained for referee.

Railroad Earnings Increase.

Railroad Earnings Increase.

Railroad earnings continue to show remarkable gains; partly a result of heavy westbound traffic, which usually commands high freight rates. Net earnings, however, are frequently not so satisfactory as last year; the higher cost of materials, the increased cost of operating and the advances in wages all making heavy inroads into profits. Very likely the railroads are not the only concerns feeling the effects of these tendencies. There are other lines of enterprise making large earnings in which profits have reached their zenith for the time being. The coal strike has become a depressing factor in the market, not so much for its effect upon the coal shares as for the important questions involved. The threatening attitude of labor and the sharpening of issues between monopolies of capital and monopolies of labor are likely to have a seriously deterrent effect upon all corts of new enterprises, unless an early settlement of the coal strike is forthcomcapital and monopolies of labor are likely to have a seriously deterrent effect upon all corts of new enterprises, unless an early settlement of the coal strike is forthcoming. The almost certain projection of these issues into the coming election and the inevitable raising of a new set of economic problems with which the country is not yet prepared to deal are certain to have a depressing effect upon all lines of business. It is fortunate that the country is still enjoying great commercial and industrial activity and that general conditions are sound; but it would be folly to overlook that a new set of influences are coming into prominence which will have to be seriously recknowed with in business affairs as well as in politics.

Improved by Liquidation.

Improved by Liquidation.

The position of the market as a whole has unquestionable been greatly improved by the liquidation of the last few weeks. The test has shown that there are no weak sputs of importance, and an effective check has been put upon undesirable speculative movements. The present, however, is not favorable to the buying of stocks. The scarcity of time money as well as call money is a warning. There is still a probability of further squeezes in the money market and sharp raids upon weakly held stocks. A great change in existing conditions must come if we are to have a genuine bull market during the present year. Sharp upward reactions are not at all unlikely, but stocks will probably be a good sale at such times for several weeks to come, even if the decline, which reaches about logiff points, should not be extended. Builtsh enthusiasm has been much chilied, and a period of rest will be necessary for recuperation, even under favorable circumstances.

desirable grades have sold at satisfactory prices.

The week opened with stockers and feeders active, and by Tuesday an advance of 15g/25c had taken place. That, however, proved to be the high day of the week, as since that time the demand from the country has not been up to expectations. The good cattle are probably about steady with the close of last week, but the common to medium grades are unevenly lower. It has been even harder this week than last to dispose of the cattle lacking quality, and a good many sales late this week were made that looked 15c, and in extreme cases 25c, lower than the same kinds sold for last week.

25c, lower than the same kinds sold for last week.

Western beef steers of good quality have been in active demand all the week, and as the supply has been limited, prices have improved lic to 20c, and in extreme cases a quarter. Commoner grades have not shown that much advance, but still even those are higher than they were a week ago. Western cows are also 2565c higher for the week, the greatest advance having taken place on the better grades. Stockers and feeders advanced 15a25c the first of the week, but all that galn has been lost and more, too. The strictly good cattle are not much lower than last week, but the common kinds are fully 15c lower, and in some cases 25c lower. Representative sales:

HOGS-There was only a small run of hogs in sight this morning, but in spite of that fact the tendency of prices continued downward. At this point the break amounted to nearly a dime. The bulk of the sales went from \$6.00 to \$7.00 and as high as \$7.07\tilde{W} was paid. There was no particular change in the market from start to finish and, as the offerings were light, practically everything was disposed of in good season.

The supply of hogs for the week is not

good season.

The supply of bogs for the week is not much different from last week, but as compared with the corresponding period of last year there is another decrease. For the year to date the falling off amounts to about 27,000 head. The tendency of prices has been decidedly downward ever since Monday and as compared with the close of last week the market is 2500 lower. This decline carries the market to the lowest point reached since August. Representative sales: resentative sales;

SHEEP-This has been an eventful week in the sheep market, as on Monday the largest number of head arrived since the yards were opened, and the supply for the week has also broken all previous records. As will be seen from the table above over 10,009 have arrived this week, while the previous high mark was \$8,521, which arrived during the week ending October \$1,180. In spite of this enormous run the market on good stuffs has held up in very satisfactory manner, which is taken as an indication of the liberal demand at this point.

point.

There were no fresh arrivals of shee and lambs today, so that a test of the market was not made. As compared with the close of last week the market on factors and lambs of desirable quality. the close of last week the market on fat sheep and lambs of desirable quality is steady to strong and active. The supply has been none too great to meet the demand, but, on the confrary, packers could not get enough a good share of the week to fill their orders. as the bulk of the receipts were feeders. The common kinds of killers were not very active, but still they are also steady for the week.

The big end of the receipts all the week Texas beef, 54.57c. Cabies, last receipts Block, Denver, Colo.

consisted of feeders and the quality was far from being choice. The strictly good to choice feeder welhers and yearlings and also choice lambs showed very little change from the close of last week. The common kinds, 'hough, are all the way from 15c to 25c lower. Receipts also included a good many light lambs of rather common quality and also a great many old ewes, for which the demand was very small, and as a result trade on that class of stuff was extremely dull and prices broke in bad shape. The decline for the week amounts to 25good or 50975c as compared with ten days or two weeks ago.

or 50675c as compared with ten days or two weeks ago.

Foreign Financial.

LONDON, Oct. 12.—The rates of discount, which responded only feebly when the Bank of England rate was advanced, have since steadily fallen off to 34 per cent for three months bills. The weakness appears to be due to lessening apprehension of university developments in New York. of unfavorable developments in New York and the accumulation of funds in the hands of bankers and brokers. The market, which supplied itself liberally from the Bank of England just before the advance of the official minimum, has still plenty of money at its disposal. In the meantime the bank is not in a position to control market rates, and borrowers are getting what short loans they require at 24 percent, or less than the rates paid for money on deposit. of unfavorable develops

MANCHESTER, Oct. 12.—While there was no particular change on the cloth market generally last week, business was exceedingly difficult to negotiate. There was a rather more hopeful feeling, especially in the Indian section. There was fair inquiry with occasional unremunerative transactions, An increasing number of fooms are idle at Blackburn. The China inquiry was dormant. There were moderate engagements in the market extending into January. Miscellaneous South American and Levant inquiries were at hand. Yarns were fairly steady and quiet. The demand for the turnover of American cottons, twists and wefts was not large. Shippers appear to have satisfied their immediate wants. MANCHESTER, Oct. 12 .- While there was
