Lettered Streets Vex a Financially Hampared Administration.

PUBLIC IS CARELESS WITH REFUSE

Thrown It Into Thoroughtares and Alleys, Regardless of Appearances, and Gines is Strewn in Dangerous Places.

Several times within the last week atcention has been called to the condition of the paved streets, especially those in the business portion of the city. Inquiries made yesterday disclosed that the administration is badly hampered at this time for funds to properly clean the streets.

Property owners and renters of stores withe seem to disregard the ordinances in force in connection with the throwing of store sweepings into the gutters. Glass is also thrown on the streets and into the sileys. During the last few months every fort has been made by the street department officials to cut down expenses and still keep up appearances. While the exremain undoubtedly have been cut down, appearances have not been kept up.

An official of the city said last evening that, if possible, an effort would be made winter to secure enough money to purchase a street sweeper and then the the majority favoring a continuance of the payed streets could be kept passably clean working the machine four or five nights , week. Within the last few days visitors o the city have remarked on the condition of the principal thoroughfares and an explanation had to be made. The city auhorities seem in no way to blame, as the only relief apparent is through a change in the existing laws.

Connett Meeting Tonight.

Considerable interest was manifest yesterday in the meeting of the city council, to be held tonight. Two remoustrances against the granting of telephone ordinances have been filed and it is expected that these will be read by the clerk. The filing of the remonstrances signed by more than one-fifth of the voters practically prevents the council from granting franchises to the two companies, at this time. The matter will therefore have to go over until the election in April. The question of the overlap probably will be discussed and some arrangements may be made for the appointment of a committee to look over the charter and suggest amendments, with a view to securing more revenue in order that the city,'s debts may be paid as soon as possible. A bond proposition at this time is out of the question, so that relief must be sought from the legislature.

City Must Economize.

Mayor Koutsky, City Attorney Murdock and members of the finance committee of the council are figuring bow to save money, in order that the present overlap of \$70,000 may not be increased. It has been suggested that the number of policemen and firemen be reduced, but this plan is not favored by taxpayers, as it is stated that neither department has enough men now. Even should these departments be reduced there still would be an overlap in the funds. There is not enough money in the fire fund now to settle October bills, to say nothing of salaries. The water fund is depleted and the money on hand cannot run the police department much longer. As yet no plan has been devised whereby the city can raise revenue enough to meet its obligations in the departments men-

Numbering Houses.

In some parts of the city houses are being numbered in accordance with the instructions issued by the city authorities some months ago. There seems to be a need of thorough renumbering on account of the increase in small houses in all parts of the city. A suggestion is to be made to the PURSUES HUSBAND WITH GUN city council soon to this effect. While the business portion of the city is fairly well Colored Woman Gives Her Lord and taken care of in this matter, there is, it is stated, a chance for improvement in the residence portions.

Still Repairing Walks.

City Engineer Beal, who is also in charge of the street department, proposes to make all of the sidewalk repairs this week that he can, so as to insure as much good walk as possible before winter comes. In some cases only a plank or two are needed, while in others portions of walks three and four the police are searching for Archibald. feet in width have been removed. Gradually the business portion of the city is getting down to permanent walks and this tends in a great measure to save the city money in her good money to get that way. In the cases where accidents might happen and damage suits be brought.

Warrants Held Back.

Some of those holding claims against school district No. 8 are wondering why warrants have not been issued. At a meetquite a bunch of claims was allowed, but warrants. It was reported on the streets yesterday that the members of the board had decided not to issue any more warrants this month. The reason for this action has not been made public.

Saving City Money.

Live Stock Receipts.

Commission men doing business at the Union stockyards here look for large receipts of cattle from the ranges this week. One dealer said last evening that he did not look for any more exceptionally big runs, but that from this time on the runs would be large enough to keep all hands busy during a greater portion of the day. A representative of a commission house who came in from the west yesterday stated production says Russia has produced since that on some portions of the western lines stock cars were being used now to transport coal, on account of the exceptional de- 85,000,000 barrels and in the United States mand for fuel at this time.

Want Walks Repaired.

The plank walks around the site purchased by the Board of Education for a High school are in a dilapidated condition. It has been suggested to the mayor that the board be called upon to repair the was stated yesterday, be done. While the repairs will not cost much the city feels that the board should stand the expense. Aiready the street repair fund is in a depleted condition, while there is yet some money left in the treasury of the school district. It is said that three and a half barrels of oil equals one ton of Russian coal, which is high-priced and inferior in quality, and it is only the irregular supply and the fluctuating price which prevents the sale of larger quantities of fuel oil in the interior of Russia.

During 1900 Russia produced about 17, 800,000 short tons of coal, the higher grades of which sell from \$7 to \$8 per ton. During the same year the United States produced about 270,000,000 short tons.
