Gold Hill Directors Examine Property and Return to Omaha.

WILL ERECT A NEW CYANIDE MILL

Indications of a Large and Rich Shoot of tre Similar to Those on Ad-Joining Property-Output of the District.

DEADWOOD, S. D., Oct. 19 .- (Special.) --E. L. Lomax, general passenger sgent of takes an active interest in the organizathe Union Pacific Railroad company; R. C. Patterson of Omaha, H. S. Weller of Omaha, and F. L. Larson of Fremont left Deadwood among all of the Black Hills counties; for Omaha Tuesday evening after spending several days in the Black Hills examining mining property in which they are inter-The gentlemen are directors and officers of the Gold Hill Mining company, the ground of which is located in the Ragged Top district, close to the Eleventh Hour group from which so much rich ore is at present being shipped, and adjoining the holdings of the Spearfish company. The gentlemen were very well satisfied with the work that has been done on the ground, and before leaving for Omaha gave it out that arrangements would at once be made for the erection of a \$50,000 cyanide mill on the of the delegation to Butte and met other group of mines which the company owns.

The Gold Hill has received some very extensive development, the recent work tions for membership were presented last done being the sinking of a large working evening which will be acted on at the next shaft to the quartzite, and on this contract | meeting, which will be held at Lead. The finding a deposit of ore, but how extensive this ore deposit is has not as yet been determined, for the shaft has only reached the quartifie, and no opportunty has yet matter has already begun. It was the most been had for exploration. The outlook is interesting meeting of the organization most encouraging, however, and every insince it was organized one year ago. dication points to a large and rich shoot of ore being found in this place. On the surface the Gold Hill people have the same ore shoots which are being worked so suc-cessfully by the Spearfish, the Deadwood-Standard and the Eleventh Hour companies, and have done considerable work on them, with the result that they have demonstrated that there is an immense amount of ore on the property.

Higher Values Lower Down.

The ore on the lower contact, however, apper contact, and should the ore body as extensive as the management has every reason to believe it will, this fact of itself is sufficient to warrant the erection of the plant which the company has in contemplation. Work in the deep shaft has been abandoned for the present, or until the company can install more boiler power and replace the present piping in the shaft with six-inch pipe, and so give it a greater pumping capacity, the present facilities for keeping the water out of the mine not being sufficient. Another 190-horse power boiler has been delivered at the shaft and is now being put in place, and when this is done work of drifting on the contact where it is met with in the bottom of the shaft will be commenced and continued until the ore shoot which is known to exist there is thoroughly explored. The company has a good hoist on the ground, and will install an air-compressor plant and put in power drills, so that the work will proceed at a rapid rate. The 300-foot shaft for seventy feet of its depth followed down a small vertical of rich ore, but which at that dis-farmer, who disappeared from his home of which for the Americans found the score tance from the surface pitched out of the north of Punished Woman's Lake, in the 7 to 2 in favor of the Nationals. In this abaft, and Superintendent Goodman, who extreme northeastern part of Codington inning the Americans pounded out two hits is in charge of the operations, believes that county, about a week ago. It appears that large shoot of ore on the flat formation, is believed in some quarters that this af- but there were two outs at that time, and and that the vertical is but an off-shoot fected his mind and that he wandered while Donovan allowed Jones to walk, from it leading to the surface. Superintendent Goodman accompanied the directors and officers of the company to Omaha, and while there will meet with them and then decide upon the future development to be prosecuted on the ground, and the character

The discovery of ore on the quartrite in the Gold Hill shaft is a big thing for the Iron Creek and Ragged Top districts, for heretofore all of the successful mining in both has been done on shoots of ore which are found on the surface, and which, while very extensive and all carrying very fair commercial value, are not so rich as those found on the lower contact. This is the first time that quartzite has been reached in the district, and the discovery will be the cause of extensive development. There are several large companies in this vicinity and all of them have ample means to take up the work of sinking to quartrite on their ground.

Black Hills' Growing Output.

An interesting illustration of what modern methods will do for a low grade country, that is, a country in which the greater part of the ore mined and treated is of a grade which in other countries would not be considered good enough to receive serious consideration as a factor in the production of bullion, is given by the yearly production of gold by the Black Hills from, 1876 to the

1876\$	1,200,000 1891 \$ 4,619,270 2,000,000 1892 5,101,630 2,760,000 1893 6,750,000
1878	2 98/2 000 1893 6,750,000
1879	2,500,000 994 6,500,000
1880	2,650.000 1895 6,800.000
1881	2,550,000 1896 6,775,000
1882	2.550,000 1597 6.524,761
1888	2.525.000 1898 7,487,670
1884	9 577 ~ 999 9,131,486
1985	2,750,000 900 10,000,000
1886	3 1901 12,000,000
1887	3,420,001
1885	3,485,000 Total \$122,818.977
1890	3,904,160

It has only been lately that the highgrade ores of the Hills have received attention, and the small rich veins worked extensively, so that they figure in their product but slightly in the grand aggregate of gold produced by the country up until the end of last year. However, many of these small-vein mines are being worked, and the ore treated in different reduction plants, so their product will help to swell the output of bullion for the present year, which is expected to reach at least \$15,-

000,000. The Pennsylvania mine, on Rutabage gulch, a branch of Deadwood creek, is producing some very rich ore, and has already made one shipment to the Horseshoe smelter at Rapid City. The ore is a sylvanite, and there is about two feet of it in the twelve-foot vein that is being opened up on the ground. This sylvanite ore is very rich, and specimens when submitted to the roasting process are very pretty to look at. Several pieces of the ore which have been roasted show the gold in surprising quantities where before it was not visible, the heat bringing the gold to the surface blisters which fairly cover the rock. This small streak in the voin is exceedingly rich, but the other ore in the ledge carries pretty high values also, averaging about \$18 to the ton. In the same vicinity Pennsylvania, and adjoining it, is the Red Cloud group of claims, which has ppened up the same vein, and is now developing it, but the ore in the Red Clouds stand: does not carry the same high values as that which occurs in the Pennsylvania. It is thought, however, with a little more work the ore will improve. The Big Four company, which owns a group of slaims in the district, also has what is supposed to be the Pennsylvania vein, and is working a large force of men developing The ore here carries good values, and

MINING IN THE BLACK HILLS | richness of the Pennsylvania vein, is being worked more extensively than ever before. Association Elects Officers.

> The Black Hills Mining Mens' association met last Thursday and elected a new board of directors for the ensuing year as follows: John Blatchford, Terry; Robert H. Driscoli, Lead; William S. Elder, Deadwood; Harris Franklin, Deadwood; Charles H. Fulton, Rapid City; John Gay Yellow Creek: George M. Nix, Lead; J. E. Pilcher, Custer City; S. W. Russell, Deadwood. The annual report of the treasurer and secretary was read and showed the association to be in a healthy condition so far as membership and finances were concerned. The secretary's report showed a membership of 187, every one of whom tion, the membership being confined to no particular camp or district, but divided that the committee on subscriptions had collected the \$3,000 guaranteed the American Mining congress, and that at least \$7,000 more was pledged to be used for the incidental expenses and entertainment of the congress when it will meet in Deadwood and Lead in September of next year; that to investors in mining property, and has been the bureau from which has been distributed much valuable information concerning the Black Hills' mineral resources. The treasurer's report showed that the association after having paid the expenses obligations for considerable sums, still had a balance of \$714.21. Numerous applicavarious committees on entertaining the American Mining congress made reports of progress, which showed that work in this since it was organized one year ago.

Blows Out the Gas.

SIOUX FALLS, S. D., Oct. 19.—(Special.)

-Mrs. Tracey Dextler of Dyersville, Is., while in the city on her way to visit her brother, Frank Leiderman, at Madison S. D., had a narrow escape from death. She engaged a room at a local hotel and retired for the night. In the morning employes of three-bagger. In the fourth inning, with the hotel noticed the smell of gas in the two on bases, Crowford lined one out building, and when they went to the room which looked as if it was going to leap of Mrs. Dextler they found her in an un-The ore on the lower contact, however, conscious condition. Two doctors worked arose to the sight of the big crowd a wee carries higher values than it does on the over her for several hours before she remits of a white-headed fellow was seen to gained consciousness. She states that she start in the direction of the fence. Then which is disclosed in the 300-foot shaft had never had any experience with gas the sphere began to descend. Finally it which has just been completed prove to be and when she was ready to retire she reached the ground, but it failed to make blew it out.

Hunters After Bear.

PIERRE, S. D., Oct. 19 .- (Special.)-For several years hunting parties have gone crowd yelled itself hoarse. It was a phe-out from this city to the vicinity of In-nomenal catch. It was a fine thing for terior, where it is claimed that bears are yet to be found in the canyons bordering on the Bad Lands. While the hunters have never yet brought back any bear, they have sighted the game several times, but the brush is so thick that they have never yet secured a good shot. A letter was received in this city a few days ago from that section, reporting several large cinnamon bears to have been seen a few days ago, and another effort will be made in a few days to get one or more of them.

Farmer Cannot Be Found.

whereabouts of Henry Lentz, a prominent this vertical is again coming in, and that a for several days prior to his disappearance them three runs. In the ninth little Hartshort drift will again catch it, and when it he worried a great deal over his inability zel did his best to open things again. It is met with that it will prove to be a to secure a crew to do his threshing, and it was then he drove in his three-base hit, away while temporarily insane

Strike Quartaite in Well. TYNDALL, S. D., Oct. 19.-(Special.)-

Norbeck & Nickelson, artesian well drillers, have completed an eight-inch well for the city. This week they struck what was supposed to be granite and a piece of the rock was sent to Prof. J. E. Todd, state geologist at Vermilion university. A wire was received in return: "Specimen from Tyndall is Sloux quartzite without doubt." The well is 868 feet deep and the flow very

First Meeting of Campaign.

HURON, S. D., Oct. 19 .- (Special.)-The first political gathering of the campaign licans congregated in the opera house t hear Hon. Coe I. Crawford discuss politics matters. The talk was practical and logical and will have good effect in th

Catholies to Erect New Church. SIOUX FALLS, S. D., Oct. 19 .- (Special. -A handsome and costly new Catholi church building will be erected at Lester ville in the near future. Arrangements al ready have been made to erect a new par sonage, and when this is completed the new church building will be erected.

Iron Rod Punctures Skull.

TYNDALL, S. D., Oct. 19 .- (Special.) E. Sunderlin of Tyndall, while assisting erect a windmill near Avon was hit o the head with a rod which penetrated hi skull, necessitating the removal of a piece of the bone.

NO PIE FOR SCHOOL GIRLS.

Cut Out of the Luncheon Menu in Keith.

Baltimore Schools. A crusade is being made by Superintendent Van Sickle against the use of ple by the pupils in the public schools of Baltimore. He does not try to prevent the pupils from eating ple at home, but he is trying to prevent the sale of pie by the caterers at the schools.

A few days ago Isaiah Nixon, who has had the privilege of selling lunch to the young women at the Western High school, applied for a similar privilege at the Eastern High school. The application was made to the school board. The president of the board turned to the superintendent and inquired what sort of a caterer Nixon was and if the extension of his privilege could be made with a due regard for the

public interest. "I certainly think so," replied the super intendent. "Nixon has given us a good menu, and has been especially obliging when we have asked him to sliminate certain objectionable articles from the bill of fare. He has even cut out ple. He cut it out without a murmur."

The board unanimously agreed that a lunchman who was so brave as to cut pie out of a school lunch was a hero and it therefore, resolved to extend the privilege. Mr. Van Sickle is a New Englander, and was, therefore, thought to have veneration akin to his respect for Plymouth Rock for that Yankee institution known as pie. He gives the following reasons for his

"Pie," said Prof. Van Sickle, "is outside the plane of digestible food, particularly the crust, and especially when only thirty minutes are allowed to consume it in, as in the case of the girls.

"Besides," he continued, "I was further encouraged in my determination to exclude ple as a factor in the lunches at the request of a number of the intelligent mothers of is considered a fair grade of shipping ore. the girls who were opposed to ple eating at The district, in consequence of the proved | lunch time."

WIN MERCER AN EASY MARK

National Sluggers Straighten Out His Curves with Much Freedom.

ALL-AMERICANS OUTPLAYED EVERYWHERE

Second Came of the Two Proves a Snap for Representatives of

The All-Star Nationals won yesterday's game at Vinton street park because they outplayed their American league opponents at every turn of the road. Mr. Donovan, the tall, shapely twirler for the Nationals, was largely responsible for the way things went. He was very much of an enigma to the All-Americans, and yet was by no means stingy, for he gave out seven free passes to first. Counteracting this erratic work, however. Donovan struck out twelve men and held his rivals down to a scanty the association has been of great benefit five hits. It must not be forgotten that Donovan went a long ways toward winning the game with the stick. He got his base every time he went to the bat, which was five, drove out two safe hits and scored three times.

Big Sam Crawford from Wahoo was again heavy load rested on Sam's broad shoulders, but he supported it in veteran style. When Sam stepped up to the plate in the first inning a din of hurrahs went upstarted by hundreds of Wahooans who were there for Sam's special benefit. Then came the bouquet. It was a large homeshoe of flowers with "Wahoo" tattooed on the upper round. Sam took it, bowed and grinned. He didn't do anything this time at the bat, but showed his love for flowers by rapping out two doubles and one single later in the day. It was whoop for Sam from start to finish, and Sam paid for every whoop, too.

If it hadn't been for Little Sawed-off Hartzel out in center field Sam could have swelled his credit account with a nice long the center field fence. Just as the ball

Topsy Hartzel's Star Catch.

a touchdown. Hartzel snatched it on a dead run and with the ball in his hands rolled head over heels. In the meantline Big Sam was down about second base. The Hartzel, however, that he tore out of the game with this brilliant play to his credit, for he made two grievous errors after that. Taking the catch of Sam's long fly and the little center fielder's three-bagger into consideration, however, the credit side of his ledger showed up well as compared to his debit side.

Mercer Was Easy.

It became evident early in the game that the Nationals had an easy thing with Mercer's curves. They seemed to jump onto them whenever it was necessary, but on the contrary, Donovan was too much for SIOUX FALLS, S. D., Oct. 19 .- (Special.) the Americans all the way through. Only -Considerable uneasiness exists as to the once did things really look close, and that was in the eighth inning, the beginning and drew three bases on balls, which netted was unable to untwist the benders that went toward him.

Along their route to Omaha these two teams, which have been traveling together, have been looking forward to the time when they would reach the Gate City. "We will make some money when we get to Omaha," was a common expression among the men. For Omaha's reputation as the best ball town west of the Missouri has become thoroughly known in other parts of the country.

There was certainly no cause for disappointment among any of the visiting players yesterday, for the crowd easily numbered 5,000, and it was an enthusiastic crowd, too. Score: NATIONALS.

Monetary Conditions Improve.

Monetary conditions show decided improvement and easier rates now prevail, owing to the heavy liquidation of speculative accounts during the last few weeks and to the efforts of the treasury, especially Secretary Shaw's decision to buy bonds. The prospects, notwithstanding, are that money will remain firm until after the January disbursements, as funds are in active employment in the interior and will into return with any freedom until toward the close of the year. There has been not serious stress in the money market; the demand for relief comes chiefly from those who have inconvenienced themselves by excessive speculation. The recent stringency very largely was the result of the overdoings of the last two years, which are well understood in Wall street, and it is far better that a natural correction should be applied in the form of higher rates for money than that such commitments should be allowed to remain. There has been a great deal of forced liquidation of the wholesome sort, and more may have to come later before the congestion prevailing in Wall street is fully relieved and thereby the money situation permanently adjusted. The prospects of gold imports do not materially improve. Our large borrowings in Europe, and the necessity of paying back these loans, together with slight distruct on the part of European bankers in the speculative situation here, all tend to discourage an influx of gold. Hence the only road to easier money and stronger bank reserves is the steady withdrawal of funds from speculative purposes, which has been and still continues to be the very proper policy of New York banks.

MISCELLANEOUS.

Industrial Profits Decrease.

A striking feature of the annual reports of industrials now coming before the public is decreased profits. Gross earnings continue large, generally in excess of last year's big totals, but expenses are rapidly growing to advances in wages and the increased cost of materials. The same tendency has repeatedly been noticed in regarding the future status of the security market. If the rates of profit are beginning to decline, as the facts very strongly suggest, that is not an argument in favor of higher prices. Managers will be obliged to take into consideration the increasing cost of doing business and aggressive attitude of organized labor. In fact, if the latter continue their demands it is evident they will meet with increased resistance, for the simple reason of diminished ability to meet such demands.

Sharp fluctuations mine time and the second properties. The company of the post of the control o LONDON, Oct. 19.—The continued abundance of money, combined with the easing of monetary conditions in the United States and the news regarding the settlement of the coal strike caused a cheerfulness on the Stock exchange last week such at 15.50% as has not been known for months past.

The plentifulness of money is largely explained by the fact that the government has disbursed nearly \$0.00.000 within the last ten days. It is expected, however, that the present superabundance of money to loan will disappear this week, thus bringing the market back to the bank, which will resume its customary control, a consequent general hardening of money disely approximate the bank's off money closely approximate the bank's exercise. Which is already rather low, will be considerably decreased by foreign demands for gold, which may possibly necessitate a further rise in the rate.

The upward movement of prices on the strike in the United States has continued. arket first in the United States has continued. Final figures show practically an all around \$7.15; 076-09.

Business, however, needs to expand con-

Coal shares showed considerable resisting power during the week, owing to increasing coal exports to France. This increase brought the daily loadings in the Essen district to the highest figure for several years. Nevertheless, coal shares were several points lower.

General industrials were weak, especially machineries and some electrical shares Shares of the Hamburg-American line fell to the lowest point in several months as the result of heavy sales for Hamburg and Bremen account in connection with the

Bremen account in connection with the rumors of reduced dividends. rumors of reduced dividends.

Foreign railroads were mostly neglected last week, but Canadisn Pacifics were bought actively after the receipt of the coal strike news. Foreign rentes were inactive. Domestic loans were weak upon higher money rates and because of the plan for the nationalizing of Prussian railroads, which recessitates an increased laste of which necessitates an increased issue of

money is expected toward the end of the year. New York bought Paris and London exchange heavily here hast week.

MADRID. Oct. 19.—The report of the Bank of Spain for the week ended yesterday shows the following: Gold in hand increased 154,000 pesetas, silver in hand increased 2,461,000 pesetas and notes in circulation decreased 3,252,000 posetas. Gold was quoted yesterday at 20.85.

MANCHESTER, Oct. 19.—Business in the cloth market last week was quiet and hand to mouth. The receipt of the news concerning the American coal strike had little influence and was apparently counterballanced by the dull demand for cloth from the more important outlets and by the general inquiry was difficult to execute. In order to keep looms running unreinunerative prices were accepted on goods suitable for India. Nevertheless, the differences between buyers and sellers are slowly narrowing and there was a slightly firmer general tone. The inquiry from China was unimportant; there were some sorting uppurchases. The Levant and South American demands were fair and there was moderate miscellaneous business.

Inquiry for yarns was disappointing and business was not up to the average. There were some forward sales of twist at favorable rates. Spinners appear to be in a fairly strong condition.

Provisions Close I we and Onc-Half to

cars, against 968 cars last week and 778 cars a year ago.

There was a large trade in cern, with most of the buying being done by the samiliterests that have been active in the market during the last few days. Realizing at the start caused an easy opening, but with predictions of unfavorable weather commission houses bought freely with covering by shorts and the market advanced rapidly. Firmness prevailed throughout the session and the close was strong and higher. December closing see higher at 53%c. Local receipts were 340 cars, with 40 of centract grade.

ceipts were 340 cars, with 40 of centract grade.
Oats were extremely dull and fluctuations were confined within a narrow range. There were no features to trading and the close was irregular—a shade higher for December, with May slightly lower. December closed at 31%c. Local receipts were 243 cars. Provisions ruled easier. There has been an active demand of late from shorts and in consequence there was less buying from that source. Demand was only moderate, with offerings quite free. Higher prices in corn and steadiness of hogs at the yards prevented a sharp decline. As it was January pork closed 7½c lower at \$15.55, January pork closed 7½c lower at \$15.55, January park 5c lower at \$2.50 and ribs were 2½55c lower at \$4.2538.45.
Estimated receipts for Monday: Wheat, 115 cars; corn, 250 cars; eats, 250 cars; hogs, 28,000 head.
The leading futures ranged as follows:

A NEW COPPER PRODUCER

ducers in the world today and for two of them-the United Verde and the Greene Consolidated-Professor George A. Treadwell is responsible. He is about to present the world with a third, which he thinks

will surpass both of the others. The GEORGE A. TREADWELL MINING COMPANY, which bears the Professor's name, owns a vast aggregation of wonderfully rich mining properties near the famous United Verde on the Verde Copper Belt and in the Big Bug District in Yavapai County, Arizona. Its first smelter, of one hundred tons daily capacity, is ready to start up, and it will be followed by other furnaces until a capacity of a thousand tons

The ore is rich in gold as well as copper and gives a net profit over and above the to entire cost of mining and smelting of at least \$10 a ton. In some of the mines the gold itself will pay the entire cost of producing the gold and copper, leaving the

The mines are already producing more than enough to supply the present furnace, and the ore production will increase faster than it is possible to increase the furnace

The company has a very low capitalization considering its rich and extensive properties-three million deliars, in shares having a par value of ten dollars-and it

Make checks payable to the order of the GEORGE A. TREADWELL MINING COMPANY, and send to 27 William street, New York.

MYRA B. MARTIN, Secretary.
