

IN THE DOMAIN OF WOMAN.

GOWNS FOR THE HORSE SHOW.

New York's Smart Set Preparing for Fashion's Great Occasion.

NEW YORK, Oct. 24.—Beauty will more than ever rival the Beast at the coming New York horse show, an occasion which largely settles, if it does not originate, winter styles. In truth, if the shop openings are any indication, fair woman will win the race, as the equine charmer must depend chiefly upon beauty for adornment. On the other hand, Europe, Asia and Africa (and other countries too numerous to mention) have all lent their aid to the glorification of the female form divine.

Magnificent is the only word for the imported gowns shown on all sides. Matching her minerva neck piece was a huge soft muff of the same and a white velvet tongue, with a minerva crown and white aigrette, topped her auburn locks jauntily.

Auburn hair is not nearly so fashionable it once was, so one wonders why the wax ladies so persistently wear it. Pairick Campbell black is the thing, and coming across a young woman in wax with inky

pastel gray cloth. The shoulder portion of the tippet was made of a heavy white guipure over wadded white satin. Bordering this, low over the arms, was a band of Siberian gray squirrel, the pelting finishing with wide stole ends tipped with sable tails. The cloth gown in attendance was of a surpassing simplicity; its only ornament some wide tucks bordering the skirt and open sleeves.

Dearer in price, though simpler in style than the squirrel peltine, was one of minerva (baby ermine) shown over a white cloth frock. A lovely wax lady sported this and the glass cage which surrounded her revealed the fact that her fineries were, and the same material in plum shaped the girdle.

VELVET GOWNS.

Many velvet gowns are seen, some of them, both in black and color, a little too jetted and spangled for good taste. But when trimmed with plain cloth they are eminently desirable, and since some of the English velveteens might almost pass for the real thing a velvet dress seems possible to all.

The revised style of using narrow bands of fur on cloth is eloquently suited to the richly tinted drabs in vogue. For instance, a smart little gown of coral pink cloth was trimmed with narrow rows of brown sable, the bordering the simply-gored skirt, wide sleeves, and a little shoulder cape. Some sort of a deep collar or cape effect distinguished many of the French toilettes, on a number of which a coarse wash lace suggestive of crochet is used. When the frock is white this dentelle course matches, for it never varies in color from the gown. One white cloth costume possessed a treasure in lace—an odd guipure sort of wear, with

right side tends to set and harden the muscles on that side and to harden the features. To the experienced eye the very complexion of the right side of the face differs from the left, the bone framework of the muscles coming nearer the surface, to show their substance, in a measure, through the skin, so changing in appearance the outer color of the face.

WON THE DOCTOR'S PRAISE.

FEMININE INTELLECT NOT ALWAYS THE MOST ESSENTIAL QUALITY.

"I got another glimpse of the 'eternal feminine' recently," said a Washington physician to a reporter, "and I shall never again express surprise that men of admitted intellect should marry women who are not their mental equals. Among my patients for the last few weeks—in fact, until he died—was a man of remarkable ability and character. The case had been in the hands of another doctor, and when I took charge I saw that there was little hope of recovery. The illness was complicated, and, I will confess, difficult to diagnose, and it was not until shortly before the fatal termination that all the symptoms developed."

"The patient's wife was a little woman, whom one could best describe by the term 'sweet.' I never saw greater devotion displayed in the sick room. Her anxiety was pathetic, her watchful care unceasing, and I grew to look up to her." But I never

doubtly separate waist and a model that is as pretty, as it is simple, is formed entirely of net lace. In wide lace plait, with a deep lace band, stood the flogging. "Now, a nice girl! a blouse of this sort is particularly appropriate."

White wool hats are very prominent among the trimming of all sorts of millinery. There are two styles, one of very fine velvet French felt, the other of white cashmere, which is a soft, light weight of the same rough surface, and with silken, boucle cloth and similar hairy weaves.

Tailor-made costumes of military blue silkine have flat blouse bodices trimmed with bows, flat collars and piping in stripes of gold and blue enamel. Suits in silver-blue faced cloth are silk-stitched and have a wide lace band. The coats have mink-trimmed Louis XV jackets with vests of Persian brocade that show color mixtures of blue, red, fawn, brown and gold.

FOR AND ABOUT WOMEN.

Miss Mary Morton, youngest daughter of Mr. and Mrs. John C. Morton, physician to the Emperor of Hungary, and is said to have so much talent that she will soon be heard in the great capitals.

The composer Anton Dvorak's daughter, Maria, has just married to Dr. J. W. Campbell of Orange, N. J., has been appointed president of the division of Illinois of the International Sunshine society and is shortly going to Chicago to assume her duties.

There are now in the United States forty-five feminine locomotive engineers and firemen and seven female conductors. Add to these the drivers, engineers, telegraphers, correct, brakewomen—ten baggage women. It was a woman who invented the track-puller, which is now so widely used in this country.

There is no such as "Swanson's 5-Drops" is an infallible cure for KIDNEY TROUBLE.

It not only gives quick relief from those awful backaches, but goes directly to the seat of the trouble and removes the cause, thereby effecting a permanent cure. When the kidneys and bladder are diseased the whole system is affected, and the sufferer becomes nervous, irritable and out of sorts generally. To cure this malady, the cause must be removed. "5-Drops" will do it. Taken internally it acts on the blood, purifying it and at the same time cleansing the kidneys of all impure matter. This is the only way in which a permanent cure may be effected. Swanson's "5-Drops" will drive the poisonous matter out of the system and restore the kidneys and bladder to their normal condition. No other remedy ever discovered has been so successful in the cure of all diseases of the blood and kidneys as "5-Drops." An application of "5-Drops" to the painful part will give instant relief. If you are suffering from kidney trouble, get a bottle of "5-Drops" and send to you. Your kidneys are not in a healthy condition, are backache, too frequent passing of the urine, sleeplessness, nervousness, irregular heart action or bad complexion. Any of these are proof that your kidneys are not acting properly, and that they require immediate attention.

RHEUMATISM AND NEURALGIA.

SWANSON'S "5-DROPS" is a positive cure for these diseases. It is an internal and external remedy, which acts quickly, safely and surely. "5-Drops" taken internally will dissolve the poisonous acid, remove it from the system and cleanse the blood of all impurities, thereby effecting a permanent cure. An application of "5-Drops" to the affected parts will stop the pains almost instantly, while the cause of the disease is being surely removed by its internal use. Aches, pains and soreness disappear as if by magic when "5-Drops" is used.

"5-DROPS" NEVER FAILS TO CURE

Kidney Trouble, Rheumatism, Neuralgia, La Grippe, Golds, Coughs, Bronchitis, Lumbago, Sciatica, Gout, Asthma, Catarrh, Nervousness, Backache, Dyspepsia, Indigestion, Group, Nervous and Neuralgic Headache, Heart Weakness, Paralysis, Creeping Numbness, Sleeplessness, Eczema, Scrofula and Blood Diseases.

All that is required to keep in perfect health is to have the disease germs destroyed, the blood purified and the nerves and muscles restored to normal condition. That is what "5-Drops" does, and that is the reason why it will give immediate relief and cure so many different diseases. A test of "5-Drops" will prove all that we claim.

NOTICE. "5-Drops" is perfectly harmless and can be taken by a child as well as an adult.

It is entirely free from alcohol, opium, salicylates or other injurious drugs. If "5-Drops" is not obtainable in your locality order direct from us and we will send it prepaid on receipt of price, \$1.00 per bottle.

SENT FREE. A trial bottle will be mailed free of charge to every reader of this paper upon request. Cut out the coupon and send to us with your name and address. Write today.

Large Size Bottle (300 Doses) \$1.00 For Sale By Druggists.
Ask Your Druggist for the "SWANSON PILLS," a sure cure for Constipation. PRICE 25 CTS.

SWANSON RHEUMATIC CURE CO., 160 LAKE STREET, CHICAGO.

SOME OF THE FASHIONABLE GOWNS MADE FOR NEW YORK'S HORSE SHOW,

coarse, I welcomed her as a woman of knowledge.

"And Paris your gown comes from, my dear?" I said to her, for there was no doubt the cunning which could achieve such superlative simplicity.

Azur silk soles was its foundation substance, with this blue silk embroidery, "lingerie" tucks (something very fine), a bodice drawing of black chintz with a lace front. This ran through a narrow entremet of brown-yellow lace, a similar band bordering the tucked upper portion of the sleeves. The yoke was likewise on the embroidered skirt bounce, attached with tucking, there was another lace band.

This wax lady showed as much sophistication in her headgear as in her frock and coiffure. Her hat was what the matine girl might call "perfect love"—a very flat shape made almost entirely of green velvet grape leaves. Bunches of the white and blue fruit massed it evenly at the two sides.

Still a third wax lady—another beauty of the glass cage aristocracy; for there are classes even in wax people, you know—a velvet frock, deep plum in color and spotted scattering with white. Narrow bands of plum cloth trimmed this effectively, the bands shaping on the skirt a novel border and hip yoke. This stylishly imitated a tail for the bodice, which, likewise trimmed with the cloth, opened over a white lace vest with a bunchy cravat. White panne, worked with gold, covered the bottoms flowing.

Pictoresque Sleeves.

More and more picturesque become sleeves every day, though the puffed model, which fits the top of the arm very closely and bulges hugely at the bottom, is still the favorite.

With loose coats, and especially those for evening wear, sleeves are unusually flowing, with straight turnback cuffs more or less wide. The collar of the coat matches these, the broad running kimono fashion to the edges of the garment.

A gown seen for afternoon Horse Show wear combined a stunning fur tipped with the bottoms flowing.

MARKED DIFFERENCES NOTED IN THE SIDES OF A WOMAN'S FACE.

It is a physiological fact that the two sides of a woman's face are seldom in agreement. It would be, perhaps, uncharitable to call the sex Janus-faced, but notwithstanding the fact remains that a person viewing but one side of a fair one's face has no conception of what the other side looks like. One side shows certain characteristics which the other does not, and each conceals the other.

The left side is nearly always the prettier, although it would take a very keen eye to discern any difference—but it is worth while to remember this when posing for one's photograph.

The cause of this difference in the two sides of the face is explained by scientists, who tell us—that we already know—that the brain is made up in two sections, or hemispheres, as they are called. Those sections operate quite differently because of the varied functions they perform. The hemisphere on the right has to do with the physical life; that on the left is concerned with the mental qualities. As the brain is in close communication with all parts of the body, it is natural to understand that its workings can be easily read once its effect on any given muscle is understood.

The physiologists have learned to read these muscles. Ordinary folk cannot go so far as to do this, but the physiologist can, and the result of muscular development in the face. Through the varied and different workings of the two brain sections the facial muscles are developed or retarded in growth.

For example, the physical characteristics of the right hemisphere of the brain produce an effect on the right side of the face much more quickly than the workings of the left hemisphere. This effect on the

could explain to her what was the matter with her husband, although after I really found out I made the most earnest efforts to do so.

"How is he today, doctor?" she would say, with the most pathetic fashion. The first time she cut the query I went into details by way of explanation.

"The danger from pneumonia has diminished to a certain extent," I said, "but from the heart action I notice certain symptoms of carditis, which give very little grounds for hope." Then I would go on and explain the trend of the disease, so simply, I thought, that a child could understand it. When I concluded she nodded intelligently and said in a manner so pathetically sweet that my heart went out to her: "I understand. But, doctor, how do you think he is?"

"I groaned inwardly and made some reply, holding out little hope, and never again attempted to go into details. But as I watched her during the long days until the end, I forgot all failure to comprehend my explanation. I forgot everything, in fact, except that I was a witness of that wonderful depth of affection of which the feminine nature alone is capable, and it would have made no difference to me if she had not been able to say her alphabet. I honored her as my equal, if not my superior."

"I understand. But, doctor, how do you think he is?"
