## Brandeis Millinery

This department is the display feature of our immense establishment and is the largest in the United States west of Chicago, and the fifteenth in size in the union. It employs 150 persons in its manufacturing and selling sections and carries a stock of merchandise which for comprehensiveness cannot be excelled anywhere. Our merchandise is brought to our counters at as low a figure as that of any wholesale dealer in America, and, consequently, we sell our goods at prices which have been demonstrated to be from 37 1/2 to 50 per cent lower than those of other dealers and as low as millinery can consistently be retailed at. We sell the right goods at the right time, at the right prices, and make it a study to distribute such millinery merchandise as will be a recommendation and an unfailing solicitor for the continuance of patronage. We want the customer spending money with us to feel that she is receiving benefits beyond those possible to receive elsewhere. That we have succeeded in demonstrating this thoroughly is proven by our immensely increased patronage, which is more pronounced this season than ever before.

Our organization and facilities for handling our business are probably as perfect as it is possible to make them. We are importers, manufacturers, jobbers and retailers, and as such are continually in the markets of the east, and also send a personal representative to the European style centers each season. It is known by the trade generally that we expend more money than any house in the west to furnish the latest styles and novelties, which always appear in our sale rooms within three weeks of their appearance in Paris. A stroll through our magnificent millinery section is indeed a study and will easily convince you as to our millinery importance in the western commercial world.

Tomorrow's special price announcements should prove very interesting, as the values are exceptional.
