Wheat Moves More Rapidly Than for Some Time Past.

ALL GRAINS CLOSE SOMEWHAT HIGHER

Weak Hogs Cause Provisions to Fall During Day and Close Five to Seven and One-Half Cents Lower.

CHICAGO. Nov. 7.—More activity was manifested in wheat on the Board of Transforday than for some time past and higher prices ruled. December closing "Miles in higher. December corn closed \$670-ic higher. December corn closed \$670-ic higher. January provisions closed \$670-ic lower.

Evidence of a better movement abroad was the leading feature in wheat and caused a firm undertone throughout the day. There was considerable seiting early by locals, due to good weather and large receipts in the northwest, and prices had a slight set-back. Commission houses were good buyers, and it was rumored that a prominent bull was buying May, both of which tended to strengthen the market. A good cash demand and predictions of uniavorable weather for the movement were built factors. After a decline late in the day due to commission house selling there was another rally and the close was near the top. December opened unchanged to lice lower at 714-69714c and after selling off to 703-6970-ic the price advanced to 77-ic, had for the firm and 3-694c higher at 714-6913c. Bradstreet's report for the week showed total exports of 5.715,000 bushels, compared with 5.479.000 bushels he same week a year ago. Clearances of wheat and flour were equal to 471,000 bushels. Primary receipts were 1.595,000 bushels, against 1.035,000 bushels elia a year ago. Minneapolis and Duluth reported receipts of 800 cars, which, with local receipts of 237-17 of contract grade—made total receipts for the three points of 1.083 cars, against 1.013 cars last week and 825 cars, against 1.013 cars last week and 825 cars, against 1.013 cars last week and 825 cars a year ago.

HOGS—There was a liberal supply of hogs here today for a Friday, and as all other points were quoted fully lower the market here declined about a like amount. The local demand, though, was in good shape, so that the market was quite active, and practically everything offered was disposed of in good season. There was very little change in the market from start to finish and the trains arrived in better season than usual. The bulk of the sales went from \$6.52½ to \$6.57½ with the long string at \$6.56. Choice light and butcher weight hogs sold from \$6.60 to \$6.00, while the common and heavy packing grades sold from \$6.52½ down. down.

Along toward noon a few cars arrived after buyers had their orders well filled, so that the late sales were hardly as good as those made earlier in the day.

Today's decline carries the market back to just about where it was at the close of last week. Representative sales:

Secretary Hester's statement of the world's visible supply of cotton gives total visible as 2.85, 477 bales, of which 2.383.477 is American cotton. The New Orieans Cotton exchange today inaugurated a movement to stamp out curb trading, when it posted a notice to enforce the rule which outlaws future contracts made outside of exchange hours and to fine members who violate the rule.

NEW YORK, Nov. 7.—COTTON—Market opened firm at an advance of 32g points, following the unexpectedly strong showing of the Liverpool cables. This was followed by further cables showing still greater improvement, and houses with foreign connections were also heavy buyers during early trading. In addition to this it was noted that the receipts were showing a decided falling off; that the end-week statements were sure to prove decidedly buillish, and that sentiments which had become very bearish were consequently showing a material change. Toward noon, however, the bears made a fresh raid on values, led by a prominent Philadelphia party. Their operations proved somewhat successful for a time owing to the continued favorable weather reports from the beit and rumors that the failing off in receipts was likely to prove nc more than temporary. The statistical position when finally published proved quite as buillish as anticipated, but for a time exerted no appreciable effect on the trading. From the opening advance prices at one time showed a decline of 7g12 points. Following this there was a final rally, due to fears that the market had been oversoid and to a general m Today's decline carries the market back to Just about where it was at the close of last week. was one string of four cars of Mexican feeder yearlings that sold for \$3.25, which was considered a good, strong price. Other sales of feeders also looked fully steady with yesterday. The few bunches of fat at just about yesterday's quotations, but there was not enough with which to make a test of the market.

For the week the tendency on killers has been downward, but still the decline does not amount to over 10@15c. Feeders, on the other hand, have sold a little better than they did last week, and practically no desirable grades will be carried over Sunday. Wool Market.

BOSTON, Nov. 7.—WOOL—The Commercial Bulletin will say in tomorrow's report on the wool trade of the United States; "The market is very active. Buyers, large and small, have bought heavily of about everything for the use of the mills. There has been some speculation also on the part of the local dealers. High prices have been paid in the west by Boston buyers. Values here are stiffening all along the line and advances of 4c to a cent have been obtained. South American markets continue firm, but at Melbourne prices have declined a per cent from the top, making the net advance since the season opened about 15 per cent. The receipts of wool in Boston since January 1, 1902, have been 28, 284, 205 pounds, against 233,617,978 pounds for the same period in 1901. The Boston shipments to date are 243,253,434 pounds, against shipments of 230,310,636 pounds for the same period in 1901. The stock on hand in Boston January 1, 1902, was 77,340,463 pounds; the total stock today is 119,395,334 pounds; the stock on hand November 9, 1901, was 89,275,817 pounds."

Coffee Market.

NEW YORK. Nov. 7.—COFFEE—Spot Rio, nominal; No. 7 invoice, 53-16c. Mild, quiet; Cordova, 7%gilc. Futures opened steady, with prices 5 points lower. The feature of the day was the heavy liquidating movement of long itnerests, brought on by the continued weakness of both the primary and European markets and by indications that the movement will keep up to its present fall level for some time to come. Europe was a seller here and bull leaders also seemed to be selling moderately. A dull and asier spot market also exerted a bearish influence on the futures market, which closed quiet, with prices net 56:18 points lower. Sales amounted to 37,000 bags including: November, 4.85c; December, 4.85c; January, 56:5.66c; March, 5.15 g5.20c; April 5.25c; May, 5.30c; July, 5.40p 5.50c; Septen per, 5.55g; 60c; October, 5.60c.
