WHEAT OPENS FIRM, BUT CLOSES EASY

Oats and Provisions Both Drop, but Brokers' Free Buying on Decline Causes Latter to End Firmer.

CHICAGO, Nov. 12.—Trading on the Board of Trade was rather inactive today, and though wheat opened firm, the close was easy, with December 1445 to lower. December corn closed a shade higher and oats 14c lower. January provisions closed

oats \$4c lower. January provisions closed 25c to 10c lower.

Wheat, though active at times, was generally dull and there was a disposition on the part of local traders to await the action of a prominent long, who has been buying heavily of late, but for whose account very little was taken today. Small receipts and unsettled weather created some strength early in the day, but there were tree offerings on the advance and prices reacted. The market on the whole was narrow and susceptible to the least influence. The close was easy. December opened uneasy to a shade higher at 725c, and after sales at 725c there was a decidine to 725c, and after a slight advance another reaction followed, the market oropping to 715c. The close was \$465c lower at 725c. Clearances of wheat and flour were equal to 270,000 bu. Primary receipts were 1,314,000 bu., against 1,086,000 a year ago. Minneapolls and Duluth reported receipts of 70 cars, which, with local receipts of 70 cars, which, with local receipts of 205 cars, 11 of contract grade, made total receipts for the three points of 55 cars, signingt 2,350 (two days) last week and 671 a year ago.

Weakness in May and comparatively firm

275 cars, against 2.355 (two days) last week and 671 a year ago.

Weakness in May and comparatively firm tone to the nearby futures were the features to corn. December was relatively firm on small local receipts and predictions of unfavorable weather and there was quite a good demand early, but offerings were limited. There was moderate commission house selling, but the market lacked material support. The close was steady, with Lecember a shade higher at 51c, after ranging between 50%c and 51%c. Local receipts were 84 cars, with 16 of contract grade.

receipts were 84 cars, with 16 of contract grade.
Oats ruled dull, with no special features to trade. The market was given some support by shorts and commission house buying, but the weakness in wheat late in the day caused an easy close. December closed '4c lower at 29/4/29%c. after selling between 29/4c and 29/4c. Local receipts were 114 cars.
There was early selling of provisions due to lower prices at the yards and heavy receipts of hogs and opening figures were lower. Brokers bought freely on the decline, causing a firmer feeling. The close was easy, with January pork 24/c lower at 35.50, January lard closed 10c lower at 39.06 and ribs 5c lower at 37.35.
Estimated receipts for tomofrow: Wheat, 100 cars; corn, 150 cars; oats, 190 cars; hogs, 20.000 head. The leading futures ranged as follows:

NEW YORK STOCKS AND BONDS. Over Million Shares Sell in Feverish

NEW YORK. Nov. 12.—Transactions in stocks ran weil over 1,000,000 shares again today in a remarkably feverish and irregular market. The action of the market gave warrant for the presumption that powerful innancial interests had set themselves the task of supporting the market. It was assumed in Wall street that the selling of stocks had taken on an indiscriminate character, that threatened substantial interests. There was a further threatening break this morning which was not unnatural in view of the rapid decline in progress at the close of yesterday's market. The anxiety aroused among outside holders of stock who were not within immediate reach of their brokers yesterday afternoon brought in heavy selling orders to commission houses this morning as a result of which opening prices were from one to three points lower for practically all the leading stocks. These prices were the lowest of the day, although the level was approached again on one or two subsequent dips. It became quickly mailtest that the leading stocks. These prices were the lowest of the day, although the level was approached and prices were vigoralistly and the leading stocks. These prices were were underly about the selling had been brought almost to a standatill and substantial recoverles were established all through the list. The support centered in St. Faul, Amalgamated Copper and the United States Steel stocks. The buying of these stocks had a notable effect in the depression.

There were several special influences which helped to encourage sentiment. Chicago & Northwestern, after a drop of 3 points, recovered 5 points on the issuing of stock with the right to stockholders to subscribe at par. The issue of a circular to the Colorado stockholders asking for proxies on behalf of the interest control of that to subscribe at par. The issue of a circular to the Colorado stockholders asking for proxies on behalf of the interest control in the depression of the countrol of the countrol of the country of the country of the country of the country o and Irregular Market.

Upon the first recovery after a temporary pause attempts were made to renew the advance, but the selling increased at the higher level and prices fell back again. Throughout the day whenever prices decilined effective support was forthcoming and on the other hand any considerable advance invited renewed selling. The closing was firm, however, and at about the top level. Missouri Facific offered effective resistance to reaction throughout the day.

Money showed a rather easier tone, owing to the extensive liquidation, and New York exchange at Chicago rose again to par, but sterling exchange was firmly held again and it was considered possible up to late in the day that gold might go out on tomorrow's steamer for France. The market closed without any announcement being made of a gold engagement.

Bonds were not as well supported as stocks and were rather weak throughout.

NEW YORK, Nov. 12.—COTTON—Opened steady at an advance of 264 points. Cables were better than looked for and there was less liquidation pressure. For a time the market ruled steady, then there came a break of 7010 points on the more active positions, caused by renewed unfavorable stock market conditiors. After the renewed selling pressure called out by this phase of the situation the market once more developed inherent strength. Orders for spot cotion to the south turned up the fact that the New York market was 4614. for spot cotton to the south turned up the fact that the New York market was \(\lambda_{\text{2}\text{4}}\) below the southern spot parity. On information of this character local sentiment became very strong. Large freight engagements were reported, notably at New Orleans, but also at Atlanta and guif ports, suggesting the probability of renewed exports upon a large scale. The evidences of a strong spot position started active speculative buying, and on this the market closed firm at a net rise of 7614 points. Throughout the session trading was very active and the transactions in future deliveries are estimated at \(400.000\) bales.

Importors also figured as sellers and the weight of offerings from these sources reduced prices 56210 points before the close, final figures being at that level. The tone was steady.
