Thomas Kilpatrick & Co.

AFFAIRS AT SOUTH OMAHA

Board of Education's Unusual Method of Receiving Bids for Supplies.

RUNS COUNTER OF RULES GOVERNING THIS

Chairman Kubat of Committee on Supplies is Not Disposed to Talk of Number of Bids Received.

"The members of the Board of Education has an unusual method of receiving bids man to a Bee reporter last night. "For a number of days past advertisements have been inserted in one of the local papers for 200 No. 6 school desks and for the placing of slate blackboards in four rooms at Lowell school. These bids were to be handed in to J. L. Kubat, chairman of the committee on supplies at his place of business, at noon yesterday. Such action as this is against the rules of the board. One of the important rules of the board reads that all bids for the construction of buildings, repairs and supplies shall be presented at the board meeting at 8 p. m., and by the person making the bid. All advertisements shall conform to this rule."

This rule was not complied with yesterday when bids were filed with Chairman Kubat of the supply committee at his place of business. When called upon by the telephone yesterday afternoon by representatives of the press, Mr. Kubat positively declined to give the number of bids received. All that was asked was that he tell how many bids for desks had been received. He positively declined to give any definite information.

Another Paving Petition.

Property owners on O street are now circulating a petition, asking the city council to pass an ordinance providing for the paving of O street from Twenty-fourth street on the east of Twenty-sixth street on the west. Some months ago a similar petition was started, but it did not secure signatures enough to the matter was dropped. Now those interested assert that there will be no difficulty in securing all the signatures needed, as an agreement had been reached as to the kind of paving. At the former trial some of the property owners wanted asphalt, while others wanted vitrified brick. It is understood that those who will sign the petition now in circulation favor vitrified brick.

Temple Corner Stone.

In case the weather is clear this afternoon it is expected there will be a big

Things We Like Best

Often Disagree With Us

Because we overeat of them. Indigestion follows. But there's a way to escape such consequences. A dose of a good digestant like Kodol will relieve you at once. Your stomach is simply too weak to digest what you eat. That's all indigestion is. Kodol digests the food without the stomach's aid. Thus the stomach rests while the body is strengthened by wholesome food. Dieting is unnecessary. Kodol digests any kind of good food. Strengthens and invigorates.

Kodol Makes Rich Red Blood.

SETTLES ON A POSTMASTER

Congressman Hull Will Recommend John McKay for the Position.

BOARD CONDEMNNS A COUNTY HOSPITAL

Police Judge Orders Arrest of Chief of Police on Charge of Contempt for Failure to Obey Orders of Court.

(From a Staff Correspondent.)
DES MOINES, Nov. 15.—(Special.)—The controversy over the Des Moines postoffice reached a culmination today after Congressman Hull had been besieged for a week by hundreds of the politicians who were urging one or another of the many candidates. Congressman Hull today announced that he would recommend for appointment John McKay, present county treasurer and formerly an alderman of the city. McKay had been a leader in the fight from the start, but others who were also candidates were George L. Dobson, former secretary of state; W. V. Wilcox, an insurance man and old soldier; Dr. Scholten, present postmaster; Norman Lichty, manufacturer, and G. L. Godfrey, an old resident. The fight finally narrowed down to a contest between Wilcox and McKay. The latter will immediately resign as county treasurer, as it is expected the appointment as postmaster will be made very soon. Captain Hull had a hard time deciding the case, as all the candidates had been strong supporters of him for congress and were well backed by local politicians.

Horticulture and Forestry.
The annual meeting of the Iowa State Horticultural society will be held in this city at the rooms of the society in the city hall, December 15 and 16. The meeting will be held in connection with a meeting of the State Park and Forestry association. Both programs have now been prepared and they include a large number of papers and reports and addresses by horticulturists and specialists in forestry and fruit growing in this and other states. Samuel B. Marshall of Madison, Wis., and J. C. Whittier of St. Louis are on the program from outside the state. A large number of women who are interested in horticulture are also on the program.

Orders Hospital Abandoned.
The State Board of Control today ordered the transfer of all the patients in the county insane hospital in Buchanan county to the state hospital in Independence. This was in accordance with the plan of preventing the occupation and use of county or local hospitals unless they comply with reasonable regulations in regard to the comfort and safety of the occupants. The board has appointed a committee, who are making a thorough investigation of the conditions in the different local hospitals, and a number have been found that are not coming up to the requirements. In Buchanan county the closing of the hospital at the state hospital, which the people could vote on a proposition to build a new county hospital, but at the last election they defeated that proposition.

Police Chief Under Arrest.
Chief of Police Brackett was arrested on order of Police Judge Silvaras today for contempt. A young man arrested last night for being found in a disorderly house made affidavit as to the character of the house and that the police chief had been in the house and left it with the court. The judge directed that a policeman file information against the house and proceed against it for violation of the laws. The policeman refused to do so, excusing himself by saying that he had been directed by the chief of police not to do so, especially when the information came through the police court. There has been a standing feud between the police judge and chief of police for some months, and the chief has been arrested several times. The judge directed that the policeman file information against the house and proceed against it for violation of the laws. The policeman refused to do so, excusing himself by saying that he had been directed by the chief of police not to do so, especially when the information came through the police court. There has been a standing feud between the police judge and chief of police for some months, and the chief has been arrested several times.

Prosperous Short Railroad.
The report of the officers of the Manchester & Oneida railroad, made to the State Railroad commission, which is the first report made by that company, shows that the day of the little but important railroad has not yet passed. This road is only eight miles long, has 253 stockholders, holding stock to the amount of \$33,378. The number of passengers carried during the eleven months for which the report is made is 11,443. The receipts from passenger business amounted to \$4,772.29, and the receipts from freight business to \$7,892. The operating expenses were \$8,611.42, leaving \$4,053.75 as net earnings. The business was managed without any accident. Reports were received this year from forty-two different companies operating in Iowa, but several have been merged in other companies since the reports were made.

Company is No Physician
Court Rules that Corporation Cannot Be Licensed to Practice Medicine.

Attorneys and doctors are following with some interest the suit of the State Electro-Medical institute against L. N. Platner, which now is in district court and in which Judge C. W. Stubbs, now presiding over Judge Fawcett's docket, has made a preliminary ruling, in error in proceedings, that the institute, being a corporation, could not under the law render or contract to render medical services and could not be licensed to practice medicine in the state of Nebraska.

October 2, 1901, Platner is shown to have entered into a contract with the institute by the terms of which he undertook to pay \$75 in weekly installments of \$2.50, in consideration of which the institute agreed and contracted to render professional services to him until he should be cured of a certain disease. Last March the institute, alleging failure on his part to fulfill the contract, sued him in Justice George A. Fritchard's court for \$75 and interest and secured judgment for \$72.50.

Platner carried the case into district court on error in proceedings, appearing as the plaintiff, and Judge Stubbs has found that the institute, "being a corporation, could not render or contract to render medical services, and that the contract set out in the bill of particulars was void for the reason that the defendant in error was not and could not be licensed to practice medicine in the state of Nebraska;" also that the bill of particulars does not state facts sufficient to constitute a cause of action. Such judgment was accordingly reversed, and the case retained for trial and judgment.

The Black Diamond Express
leaves Buffalo at noon via the Lehigh Valley Railroad, for New York. A cart-drawing car service and luxurious parlor and day coaches.

Stop-over allowed at Niagara Falls on all through tickets to New York and Philadelphia.

Iron Molders Ball.
The iron molders of Omaha will give their thirty-fifth annual ball in Washington hall Thanksgiving eve, November 28. Efforts will be made to attract to this ball the largest attendance that any such occasion has ever drawn. The iron molders are the first trades lodge organized in Omaha since its earliest days. Thanksgiving has been an occasion of special interest to this lodge. It has always observed this annual event with a grand ball. In fraternal society circles these balls have attained a conspicuous place and it is the desire of the molders and their wives that this 1902 shall surpass any of its thirty-four predecessors.

A COMMON SENSE TALK TO WOMEN ABOUT THEIR "CROWNING GLORY," TOGETHER WITH A FEW REMARKS UPON THE NEW ANTISEPTIC HAIR DRESSING,

Newbro's Herpicide

HER CHIEF ATTRACTION. Woman's chief attraction is her hair; yet how often does she fail to appreciate nature's charming adornment, or to realize its aid to personal beauty until it is too late. Day after day her comb makes its mute appeal by exposing the hairs that are sacrificed to thoughtlessness and neglect, and later when the switch or "false front" becomes necessary, she is sure to be filled with envy and disappointment. All this is unnecessary; the foundation for a good head of hair should be laid in infancy, and by continuing the proper care and attention, an abundance of luxuriant hair will always be assured.

MODERN MODES VENTILATE THE HAIR. As the scalp should have plenty of air and sunshine, the present popular style of hair dressing is highly beneficial. It also calls for an abundance of rich, luxuriant hair. If your hair is deficient, the advice we have given, coupled with the use of Newbro's Herpicide, will give surprising results in every case. Even the first thorough application of Newbro's Herpicide causes the scalp to tingle and glow with new life and vigor. It forces the hair to grow faster, giving it snap, resiliency and charm.

THE SHAMPOO. The scalp should be thoroughly washed, at least once a month and oftener if necessary, but excessive or too frequent washing is harmful. The soap should be as free from alkali as possible, and a strictly pure tar soap is perhaps preferable, as the tar is wonderfully healing and leaves no suggestion of odor. Do not rub the soap on the hair, as in this way many hairs may be broken. Put the soap into a suitable vessel and pour over it about a pint of boiling water; stir until a creamy lather is produced, then remove the soap. When it has cooled sufficiently apply this soapy liquid plentifully to the hair and scalp. Rub the hair—always at right angles—between the hands, and manipulate the scalp thoroughly. The rinsing is most important, as the last trace of alkali must be removed. Just after shampooing, the scalp is in prime condition for the application of Newbro's Herpicide. It enters the follicles, and if the sebaceous glands are harboring vegetable parasites they are promptly destroyed. It makes the hair quickly manageable, and its alcoholic nature prevents one taking cold after the shampoo. After a shampoo the hair should be thoroughly dried, and sun drying should be practiced whenever possible.

THE HERPICIDE POMPADOUR. Many ladies experience difficulty in producing the more fashionable coiffure effects, for which the hair must not be oily or stringy. Any of the very newest modes are easily possible, if the hair is fluffy, light and wavy. Following is the effective Herpicide pompadour that is not affected by dampness: Part the hair into four strands, moisten with Herpicide and pin in suitable waves. After the hair is dry, take down, brush moderately and stroke the back of strands with comb from tip to roots just as few times as necessary to "fluff" the hair, then pin to suit.

OIL AND GREASE STOP THE HAIR GROWTH. With proper care nature supplies a suitable amount of oil to the hair, therefore never apply oils or grease, for they become rancid, clog up the pores of the scalp, catch the dust and furnish an inviting field for microbial activity. A thorough application of Newbro's Herpicide will cleanse the hair and scalp of grease and oil.

BRUSH, COMB AND MASSAGE. The head should be brushed daily with a good bristle brush, the force of which should be upon the scalp rather than upon the hair, as this induces a proper blood supply to the hair follicles. The comb should be selected with great care to avoid injury, and a sharp or fine toothed comb should never be used. A careful and gentle massaging of the scalp is of inestimable value and should be practiced even though there are no signs of disease.

Worry and Overwork. Worry and overwork seldom fail to make serious inroads upon the hair, and the general health should be carefully looked after by those who would retain their beautiful tresses. A never-failing method of causing hair loss is to crimp it closely to the head, or bind it tightly in solid coils. This causes a constant tension on the hair root, severing, wholly or in part, the bulb from its living papilla, in which event death of the hair is sure to follow.

DULL, BRITTLE OR LUSTERLESS. If the hair becomes dull, brittle or lusterless, accompanied by dandruff and itching of the scalp, it shows that the dandruff microbes have entered the sebaceous glands, and falling hairs is sure to follow. The curative action of Newbro's Herpicide in such cases is little short of marvelous. It promptly cures dandruff and arrests falling hair. It stops itching of the scalp almost instantly, and by destroying the cause of the trouble, it permits the hair to grow abundantly and luxuriantly, as nature intended. It also imparts that beautiful gloss so characteristic of well kept hair. We have thousands of letters from ladies, expressing heartfelt gratitude for the good our preparation has done them, and its phenomenal sale wherever introduced fully attests its merit. Read what Mrs. Dr. Bispham says about it: "I had not used one-half bottle of Newbro's Herpicide before I noticed that my hair was not falling out so badly, and the terrible itching of my scalp was relieved—in fact, stopped, after the third treatment. I recommend it to everyone who has trouble with the scalp." (Signed) MRS. DR. BISPHAM, Hotel Oaks, 8 Broadway, Los Angeles, Cal.

WARNING! Don't expect satisfactory results from something that the druggist told you was "just as good" as Newbro's Herpicide. Remember, too, that the success of Herpicide has caused the market to be flooded with so-called dandruff germ destroyers. There is but one genuine scalp germicide and that is Newbro's Herpicide. Applications at hairdressers. Sold by druggists, \$1.00 per bottle.
