THINKS TOWERS WILL GO

Alderman McDonald Expects Majority of Council to Be with Him.

LIGHT COMPANY MAY OPPOSE THE MOVE

Some Councilmen Favor Their Retention, but Leader in the Movement Thinks He Will Win

At the meeting of the city council tonight Alderman McDonald of the Fourth ward will present a motion calling for the removal of the electric light towers throughout the city and the distribution of these lights. Mr. McDonald is of the opinion that he will receive sufficient support carry the motion and that before long the antiquated light towers will be con-signed to the junk pile. While he believes he will have a majority of the councilmen has been prominent in G. A. R. circles for with him, Mr. McDonald expects some opposition from certain quarters but feels that It is the desire of the people at large that the towers be taken down and by so doing remove a constant source of danger to the public and the men compelled to work on them.

It is expected that the Electric Light ompany will make more or less objection to the removal of the towers and being put to the expense of relocating the lights at street intersections but Alderman Mc-Donald is determined to push the matter, he believes the interests of the public at large should be considered by the city council before those of the corporation.

When the new contract between the city and the Electric Light company was entered into two years ago, it was suggested that the towers be dispensed with but certain aldermen were opposed to the proposition, believing that a greater area could be lighted by the towers than by the distribution of the lamps. Experience, it is said, has proven that this was a mistaken idea and that better results can be obtained by hanging the lights at the street intersections or wherever decided upon by the committee on lighting. It is contended that during the greater part of the year when the shade trees along the avenues and residence streets are in follage the light from the towers is practically useless, whereas if the lamps were distributed and hung at the street intersections far

better results would be obtained. In presenting his motion at the meeting of the city council tonight Alderman Mc-Donald will have the support of Alderman Lovett, who is an experienced electrician and chairman of the committee on light-

Several Bids for Fire Escapes.

At the meeting of the Board of Education Tuesday night Chairman Cooper of the committee on buildings and grounds will submit several bids for the construction of the fire escapes which must be placed on the Washington Avenue, Bloomer and high school buildings. At the last meeting of the board Chairman Cooper had received but one bid and no action was taken in the matter. The time within which the board must comply with the state law in this respect is nearly up and Chairman Cooper will insist that some definite action be taken Tuesday night. As the school district is short of funds at the present time, only one fire escape will be placed on each school needing them, this year and the remainder will be erected next year.

Iowa Bureau Will Secure More Complete Data Than Ever Before. VALUE OF SOFT CORN TO BE ASCERTAINED

Reports Will Therefore Be Late-Stock Judging Team Has Been Selected for Chicago-Paroled Boy Would Wed.

(From a Staff Correspondent.)

DES MOINES, Nov. 16 .- (Special.)-The question of the value of the crops of lowa is one which the experts and investigators are trying to solve now more carnestly than ever before, for this year not only is the lows crop small but much of it is of a quality that renders it unfit for the market. The annual report of the State Crop and weather bureau on the yield and acreage and value of Iowa crops will be due in a few weeks. Director Sage is engaged in securing the data from which to prepare the report. He says that it is far more difficult to secure this information this year than in others for the reason there is so much uncertainty about the actual value of the crops. Some time ago the State Agricultural college people entered upon an investigation to determine the feeding value of soft corn, because there is such a large amount of it in Iowa this year. Prof. Weems of the state college, conducted analysis to show that the amount of food in the corn is substantially the mous for "Uncle Joe" Cannon for speaker, same as when it is very dry but it must but it is discovered that they have no vote be fed soon to save this nutriment. Mr. same as when it is very dry but it must Sage has conducted an extensive inquiry among farmers and feeders and finds that mediate use is the same as for dry corn. He therefore proposes to make inquiry as to the proportion of grain which is marketable and that which is fit only for immediate use in feeding and to embody this in the report for the first time. The dealers in grain are interested more in the marketable grain than in that which is fit only for feeding on the farms, but the latter will be included in estimating the total value of Iowa crops. The inquiry as to all manner of farm crops covers a wider field than ever before and the results protains to be more valuable than usual. The statistics will not be given out until late because of the importance of waiting until the crop is all gathered. It is regarded as entirely possible that much damage may yet be done crops by unfavorable weather most of the corn remaining in the fields.

Stock Judging Team

The stock judging team which will represent the Iowa State college in Chicago during the first week in December at the a day. international live stock show has been picked, and is made up as follows: Dinsmore, Newcomb and Gray, of the juntor class: Linklater and Wilson of the senior class, with Ritzman as alternate. The men have worked hard for their places, and still have a great deal of hard work ahead of them as there are ten colleges entered in the contest and there is sure to be a warm fight for the places.

Paroled Boy Would Get Married.

LEHIGH MINERS' LIFE

(Continued from First Page.)

from five to seven hours a day and the real difficulty in the region is that contract labor prices are too high, as the men get an amount sufficient for their wants by an amount sufficient for their wants by working less than three-quarters of a day. The men employed by the day work, as a maximum, only nipe hours, and as many of them consume from half an hour to an hour in going and coming from their work to the foot of the shaft they do not work even nine hours. As illustrating the influence of the excessive rates paid for contract work, it may be said that during normal conditions in April of this year the men working by contract earned only an men working by contract earned only an average of \$3.02 a day, but when it became probable that a strike would be ordered the same men earned an average of \$4.66

Basis of Payment.

The company asserts that payment by weight is impracticable at its mines, as each mine constitutes a distinct problem and the conditions vary from month to month. The only method which has ever given satisfaction at the company's workings, it is said, is payment for cutting coal by the lineal yard. The rate of payment can be determined only in each particular case between the superintendent and the miner. Some influence, believed to be that queer request, that of permission for a of the union, has led the men to reduce the paroled colored youth who wants to get production, but notwithstanding this diffimarried. William Young of Sloux City, who culty it remains true that the only way in mission of the legislature last winter, is is by contract for the work done which the House of the Good Shepherd. which wages can be satisfactorily measured necessarily varies from mine to mine, and to get married. As the governor made it some times between breasts upon the same future arrangements. It is likely the entire gangway, and even upon the same breast from day to day.

Objects to the Union.

The company emphatically protests against the miners' demand that there shall be an agreement with the United Mine both sides at Scranton. Workers of America, and in this connection

the answer says: The conditions of mining in the Lehigh and Schuylkill regions are different from those which exist in the Wyoming and Scranton districts. While this company Scranton districts. While this company has no objection, therefore, to its own emhas no objection, therefore, to its own employes organizing among themselves, it has always objected and does object even to an organization which includes other anthracite fields working under different systems of compensation, as a result of which its men are ordered upon strikes by reason of controversies in which they have no interest.

It would be still more inexcusable that any outside authority should assume to in-terfere in the discharge of an employe. Every free man has the right to quit work when and as he chooses and the employer must possess and be able to exercise the reciprocal right of discharge if he is to maintain discipline.

COMMISSIONERS TAKE A REST

Members of Arbitration Board Spend Sunday at Church and in Long Walks. SCRANTON, Pa., Nov. 16 .- The mem

bers of the arbitration commission observed the Sabbath today and refrained from doing any work whatever. Most of them, as is their rule, attended services at churches of their denominations in the forenoon and this afternoon they took either long walks or drives through the valley. Tonight they listened to Bishop Spalding deliver a lecture on the subject of "Success,"

"Follow the Flag."
