THE OMAHA DAILY BEE: SUNDAY, NOVEMBER 23, 1902.

Britain and Germany Will Rigorously Enforce Claims Against Republic.

UNITED STATES PROMISES NEUTRALITY

Armed Intervention is Not Impossible if English and Germans Are Not Better Treated by South American Government.

LONDON, Nov. 22 -- Great Britain is contemplating serious reprisals against Venezuela and according to an official statement issued by the foreign office is acting with Germany in all matters relating to that republic. Whether the contemplated action is to take the form of a joint naval demonstration, accompanied by or following a severance of diplomatic relations, is now being discussed in Berlin and London.

There is reason to believe that the British government has been informed that the United States will not intervene in any demonstration to protect the property rights of British citizens or their interests in Venezuels, and it is pointed out that both Berlin and London have a thorough

price over by the results they have

not grow in strength, the cause of liberty and law is not advanced by the doing of easy things. The harder the task the greater will be the result, the benefit and honor. To doubt our power to accomplish it is to lose faith in the soundness and intength of our popular institutions. We have the new care and cannot shift it. And, breaking up the camp of ease and isolation, let us bravely and hopefully and soberly continue the march of faithful service, and faiter not until the work is done. The burden is our opportunity. The orportunity is greater than the burden." There spoke the man who presched the gapel of hope as well as the goapel of duty, and on the issue thus fairly drawn between those who said we would do our new work well and triumphantly and those who said we would fail iamenably in the effort the contest was joined. We won, And new I ask you, two years after the victory, to look across the seas and judge for yourselves whether or not the profile has been kept. The prophets of disater have seen their predictions so completely fabilited by the event that it is actually difficult to arouse even a passing interest in their failure. To answer them now, to review their attack on our army, is of merely accdemic interest. They played their brief part of obstruction and clamor: they said their say, and the current of our life went over them and they sank under it as did their processors who, thirty-six years before, had declared that another and greater war was a failure, that another and greater struggle for true VENEZUELA FACES TROUBLE

thirty-six years before, had declared that another and greater war was a failure, that another and greater struggle for true liberty was only a contest for subjugation in which the United States could never suc-ceed. The insurrection among the Fültpinos has been absolutely quelled. The war has been brought to an end sconer than even the most sanguine of us dared to hope.

Military Task Well Done.

Leaves Kansas City at 10:40 a. m. daily, and makes as fast time as any other train to Southern California.

### Return of Prosperity.

In 1900 the issues were in part the same, but new ones had been added. Prosperity had returned, the gold standard was as-<text><text><text><text><text><text><text><text>

### Century of Free Government.

"We believe that the century of free gov-ernment which the American people have enjoyed has not rendered them irresolute and faithless, but has fitted them for the great task of lifting up and assisting to better conditions and larger liberty those distant peoples who, through the insues of battle, have become our wards. Let us fear not. There is no occasion for faint hearts; no excuse for regrets. Nations do

## THE VALUE OF CHARCOAL

Fow People Know How Useful it is in Preserving Health and Beauty.

Nearly everybody knows that charcoal is the safest and most efficient disinfectant and purifier in nature, but few realize its value when taken into the human system for the same cleansing purpose.

Charcoal is a remedy that the more you take of it the better; it is not a drug at all, but simply absorbs the gases and impurities always present in the stomach and intestines and carries them out of the system. Charcoal sweetens the breath after smoking and drinking or after cating onions and other odorous vegetables.

Charcoal effectually clears and improves the complexion, it whitens the teeth and further acts as a natural and eminently safe cathartic.

It absorbs the injurious gases which collect in the stomach and bowels; it disinfects the mouth and throat from the po sou of catarrh.

All druggists sell charcoal in one form or another, but probably the best charcoal and ing day. the most for the money is Stuart's Absorbont Lozenges; they are composed of the fincet powdered willow charcoal and other harmiess antiseptics in tablet form, or, rather, in the form of large, pleasant tasting losenges, the charcoal being mixed with honey.

The daily use of these lozenges will spon tell in a much improved condition of the general health, better complexion, sweeter breath and purer blood, and the brauty of it is, that no possible harm can result from their continued use, but, on the contrary, great benefit.

A Buffalo physician, in speaking of the benefits of charcoal, says: "I advise Stuart's Absorbent Lozenges to all patients suffering from gas in the stomach and bowels, and to clear the complex on and purify the breath, mouth and throat; I also helieve the liver is greatly benefited by the pany. daily use of them; they cost but twenty-five cents a box at drug stores, and although in fairs of Chicago society last week was the Miss Bertha Kinkead occurred last evening some sense a patent preparation, yet I be- wolding of Miss Blanche Estabrook, daugh- at the home of the bride's mother. Rev. Heve I get more and better charcoal in ter of Mr. and Mrs. Henry Estabrook, and H. B. Burgess of St. Luke's Episcopal Stuart's Absorbent Lozenges than in any of Mr. Karl C. Roebling of Trenton, N. J., church officiating. The groom is a switch-the other charcoal tablets."

the power and we shall find out the way. We shall not act hastily or recklessly, but we have firmly made up our minds that a solution, and a right solution, shall be found, and found it will be.

## **ADVANTAGES** of SPECIALIZING.

After years of patient search, the wisest have but gathered from the shore of the immeasurable sea of truth here and there a pebble. There are too many things to be mastered and too much to be remembered for one mind. You may bunch together such as chemistry, physiology, pathology, anatomy, bacteriology and the dozen of other branches required in the degree of doctor and call it all "medicine," but it will be none the less difficult to master them all under this head than to be thorough in astromomy and fifty other complex subjects under the head of "science." The great inventions of Edison were not perfected by dividing his time and thought in this manner, but by 'specializing" and centralizing his faculties on electricity. Every great achievement in electricity, in engineering or painting is the result of "single thinking" or specializing. No doctor can cover all the various branches in medicine and be thorough. Realizing this fact early in professional career, I selected for my
