HIGHER PRICES PREDICTED FOR SUGAR

Retallers Report Thanksgiving Trade as Being Very Liberal in Spite of High Prices that Prevailed on Most Lines of Goods.

gation goods, which included peaches, pears, cherries and plums. On apricots there was an advance of 50c per dozen, which makes the price 50c per dozen higher than on peaches. The scarcity of these lines of goods and the active demand for them is the reason given for the higher prices. Other changes in canned goods are of little importance.

little importance.

A very active demand developed last week for foreign dried fruits, including dates, figs, currents and raisins of all kinds. Stocks of fancy layer raisins are said to be practically exhausted and seeded raisins are moving out very raptdly, so that the market is very strong for this class of goods.

goods.

The market on oatmeal in barrels de-clined 90c per barrel from the high time, but reacted and now manufacturers are asking 15c per barrel and 15c per case of asking 15c per barrel and 15c per case of five packages more than at the low time. Jobbers think that present indications are favorable for still higher prices.

Persistent reports are coming from Louisiana regarding the great damage done to the rice crop. It will be remembered that the crop was considerably damaged during the summer and now it is claimed that owing to recent rains all the rice that was not under cover was more or less damaged. It looks now as though there will be very little cheap rice until the new crop arrives and an advancing market is expected from this time on, particularly on the high grades.

Dry Goods Moved More Freely.

Dry goods jobbers also report the volume of business for last week as being con-siderably in excess of the previous week. There were not many buyers in the city, owing probably to the fact that Thanks-giving kept most of the merchants at home. Mail orders, however, came in quite freely and jobbers say that as soon as winter weather sets in there will be a big

winter weather sets in there will be a big reorder business.

There has been no particular change in the market on leading lines of goods, but those who are posted quote prices firm all along the line, with prospects favorable for their remaining that way for some time to come. Each week it becomes more apparent that popular lines are getting scarce and that retailers in a great many cases will be disappointed when they return for more goods.

CONDITION OF OMAHA'S TRADE | primes are still firm and in good demand at the old prices, which range from 24474c for all grades. Apricots are in moderate demand and steady, with boxes at 746712c and bass at 1870c. Peaches are quiet but steady, with unpecied quoted at 64670c.

The Slower all Slightly The sheep market at this point has been in pretty good shape all the week. As compared with the close of last week prices on fat sheep and yearlings may be quoted a little strenger, with the demand active. Fat lambs, however, are no more than steady, as the demand for them has not been as good as for sheep.

The feeder trade has also held up in good shape and desirable grades of both fat sheep and lambs have sold at good strong prices. Lambs if anything, have sold to better advantage than sheep. Common stuff, though, of all kinds has been neglected.
