MINING IN THE BLACK HILLS Much Development Work Being Done in the Vicinity of Custer City. GOOD PROGRESS IN LILLIAN SMELTER

Deep Snow in the Mountains Has Driven Fractically All the Prospectors Into the TOWNS.

CUSTER CITY, S. D., Dec. 7 .- (Special.)-James Demercau, who has a good prospect on the Copper Queen, a short distance from Custer City, last week put a force of men at work on the ground. The work will be in the nature of assessment, but should the ore body on which he has sunk a shaft for about fifty feet continue to improve he may keep the men at work all of the winter The ore at the present time carries a fair

per cent of copper. They have recently been striking some very rich ore in the LeRoy mine, which is located four miles west of this city, a sample taken from the bottom of the shaft going almost \$1,000 a ton; but this is, of course, an exception. They have some very good ore in the LeRoy, which will run about \$25 to the ton free milling, and it is said that the vein where they are now working is about twelve feet in width. It is the intention to continue the shaft for another 100 feet and then establish a station and begin drifting on the vein. The mine is looking good and there seems to be no rea-

son why it should not soon be a producer. A number of the officials of the North Star Mining company have recently visited the mine and appeared to be very well pleased with the outlook of the property for the future. The North Star is probably one of the best developed properties in this district and has upon it a new tenthe district and has upon it a new ten-stamp mill, which is absent running at the second s stamp mill, which has been running at intervals on ore taken from the workings, a

was started on the Calumet No. 6, another raine of the group, and it will be sunk or a depth of 500 feet and then drifts etarted on the vein. The company has sgun the work of installing a pumping plant and part of the machi ery is on the round to furnish the smeiter with water. his plant will be run by electricity and as there is a big volume of water to draw rom, the company will be well provided in this particular. A great deal of the muchinery for the smelter plant is on the ground, and an effort will be made to have it installed and in running order by the last of next January. The Maloney Blue Lead, which adjoins the Lillian group, is now working two shifts of men daily, drifting at a point 1,600 feet distant from the mouth of the big working tunnel, both ways on the vein. A good quality of copper ore is being taken out and should the ore continue to improve three shifts a day will be worked all of the winter. The grou-d of the Blue Lead has been thoroughly opened up and it is more than probable that in the spring a reduction plant will be built upon it.

will assay about \$12 a ton gold. Should the NO BULL MARKET IN SIGHT present owners not sell the mine it is their intention to develop this vertical, and to hat end will cut out a large chamber at and put in a small hoist, making their shipments of ore from the flat formation pay for the development of the vertical and the cost rock was one of the earliest mines to produce silver-lead ore and make it pay. The deep snow is already driving pros sectors into the cities, the late storm having filled the gulches in the higher parts of the Hills for a depth of several feet. In the district around Custer peak, where a great deal of prospecting has been going on, the snow is at least three feet deep on

the level, and has drifted badly in places. making it almost impossible to get around

the level, and has drifted badly in places, making it almost impossible to get around except on skis or web snowshoes. Miners in from the district, however, say that the signt. An unsettied tone prevais in from the district, however, say that the monetary situation continues unsettied to operations for the rise. While is you in signt. An unsettied tone prevais in the monetary situation continues unsettied to operations for the rise. While is condition continues the buiks are likely to remain under cover and await more is a disposition to wait until for the rise. Call and thirty-day money rates have been especially firm, and there is a disposition to wait until for the monetary site is a disposition to wait until for the monetary site is a several and distinct bona fide controverse between the plaintiff and the device of the wave of jurisiton nover his person by timely plea thereof.

Rich Strike by Trent People.

DEADWOOD, S. D., Dec. 7 .- (Special.)-While driving a tunnel last spring on the ground of the Trent company in Carbontale district, a shoot of exceedingly rich chloride ore was struck, which gave assay returns of as high as 300 ounces of silver to the ton, some of it being very much Ficher. This shoot was struck in the floor of the tunnel, which was being driven in on bit. of the tunnel, which was being driven in on an incline to strike the porphry contact. As water was coming in very fast, the work at the time was abandoned, with the intention of resuming as soon as arrangements could be made to put in a pump. The date of resuming had been postponed until last week, when a force of men was put to work on the mine, but not in the innel where the rich ore was struck. President Haskell of the company, who is in charge of operations, concluded that the shoot of ore struck in that tunnel was but a stringer from the main ore body, so he has started the miners working in another tunnel, 'rom which in his opinion, it will not be so far to go to reach the main shoot. The ore, which occurs in a smail stringer, is identical to the ore which was taken from the Iron Hill mine when that famous property was paying such large dividends on silver ores, and the indications are that there will be struck a large body of it in the Trent. Mr. Haskell will keep the present force of men engaged all of the winter. shoot of ore struck in that tunnel was

The engaged all of the winter. Wasp 2 sent down two bricks for the semi-monthly cleanup of its cyanide plant on Yellow creek the first of the month, and both together weighed something bet-ter than \$10 000.

ity in them vested, bold and assigned the note in question to the plaintiff for a full and valuable consideration is sufficient to raise the presumption of a valid sale and that thereafter neither the extate nor the executors had any interest in the note or the mortgage security.
4. Petition examined and found to state facts sufficient to resist a general demurrer.
5. Held, that the defenses contended for by the demurrer, if they in fact exist, should have been raised by answer.
No. 12613 State ex rel. Prout against Nebraska Home Company. Quo warranto. Demurrer sustained. Judgment of ouster entered. Sedgwick, J.

entered. Sedgwick, J. 1. To constitute a lottery it is necessary that a prize be offered, and something of value be given for a chance to obtain the 2. The prize may be anything of value; a

Gold for Argentine. Gold exports to Argentine attracted some amount, which was small, as for the amount, which was small, as for the fact London was able to shift the demand from that point upon New York. It is for-tunate that payment to British holders of White Star steamship stock on behalf of the steamship combination was financed without gold shipments. In spite of this transaction it is now believed, however, hat American indebtedness to Europe has been largely reduced during the last two months, and that some of the loans held in-ferred to New York. If this be true the mancial situation may be better than it ap-pears to be; still there is so much mystery connected with these bugs and secret ito spolicy until the outlook is more clear. The future is not unpromising by any upon a lower level. Speculative opinion on the market is about evenly divided, and as both sides are confident in their views the opportunities for trading should be ample, proportunities for trading should be ample, proportunities for trading should be ample, proportunities for trading should be ample.

 The prize may be anything of value; a preference or privilege in the distribution of a common fund among those entitled thereto may constitute a prize.
 A scheme whereby a common fund is to be produced by the contributions of various parties, and afterward distributed among the parties contributing thereto, and a valuable preference or privilege in the distribution thereof is made to depend upon chance, is a lottery within the meaning of our statute prohibiting lotteries.
 Contracts in which a corporation, in consideration of stated payments made to it, makes promises, which are the main inducement to such contract, and are impossible to perform, are unlawful, being against public policy.
 A corporation, organized under the laws of this state, which is engaged in a business forbidden by state, or unlawful, as against public policy. Foreign Financial. LONDON, Dec. 7.—Inactive and feature-less markets characterize the situation on the Stock exchange last week. The rates for loans were easier during the earlier part of the week, the supplies of cash being increased by the payments by the Interna-tional Mercantile Marine company and by government disbursements. The market, however, paid back to the Bank of Eng-land \$5.000,000 and another \$5.000,000 went abroad and to the provinces, so that the mersage of President Roosevelt and the re-porta of Secretarice Long and Shaw gen-erally answered expectations, and there-fore did not exercise a wide influence, es-pecially as Wall street owes less in Lon-don today than for a long time past. It is believed that western speculators, rather than Europe, are likely to disturb Wall street first.

n quo warranto. 12218 Shustor

in quo warranto. 12218. Shuster against Shuster. Appeal from Otoc. Affirmed. Pound, C. Division

gree of cultivation and refinement they ex-nibit. 2. Where the testimony in a suit for divorce tends to show that each party was addicted to the use of profane language about the home and in addressing the other, the court is justified in refusing to grant a divorce to either on that ground. 3. Whether the alleged improper ianguage of the husband was provoked by indiscreet actions of the wife, unless the language used was entirely disproportionate to the occasion, is a question for the trial court. 1223. Dunten against Barber. Error from Franklin. Affirmed. Duffle, C. Division No. 2. Unreported. 1. A judgment entered on conflicting evi-dence will not be disturbed unless clearly wrong.

believed that western speculators, father than Europe, are likely to disturb Wall street first. BERLIN, Dec. 7.-Business on the bourse hast week was unusually stagnant, but values were fairly firm. On some days many standard securities failed to get a quotation owing to complete lack of any Tractions. Domestic 3s were somewhat more active, but were fractionally lower. Other denominations were slightly higher and foreign rentes were also generally nigher. All classes of industrials improved moderately. Coal shares were on an aver-age 2 points better upon the protracted cold weather, and in spite of declining ex-ports to France iron shares showed frac-tional gains. Electrical shares improved notwithstanding the pessimistic views re-garding the industry expressed at the an-nual meeting of the Allegemeine Electric-stage Specific action against Vene-selischaft being the strongest because of Germany's expected action against Vene-sula, that bank having large interests there and being the chief claimant in the pending German demands.

Dry Goods Market.

Dry Goods Market. MANCHESTER, Dec. 7.-DRY GOODS-A generally confident tone prevalled in the cloth market last week, although the ac-tual business done was not important. There was a growing feeling that there will not be a superabundance of cotton and any substantial decline in values in the bear future is not likely. Buyers, however, are not inclined to purchase beforehand. The turnover was moderate and a fair India inquiry, chiefty from Calcutta, in some lines of light cloths and dhoottes was ne-gotiated. Transactions for China were meager and limited to low qualities. A few lesser eastern outlets were active, but elsewhere the markets were quiet. Yarns were quiet, inquiry irregular and difficult to arrange.

CORN-New 40c, OATS-32c. RYE-No. 2, 45c. BRAN-Per ton, \$12.50. HAY-Prices quoted by Omaha Whole-sale Hay Dealers' association: Choice No. 1 upland, \$5.50; No. 1 medium, \$7.50; No. 1 coarse, \$7.60. Bulls, veal calves and stags are also fully as high as they were a week ago, with the better grades in good demand. The receipts of stockers and feeders were light all the week, so that although the demand from the country was rather lim-ited, prices novanced all the way from 16c to 25c. The greatest advance was on the better grades, as the demand was con-fined mostly to that class of cattle. Com-mon stuff was slow sale, but still the prices paid were fully as good as those in force a week ago.

1...... 460 1 40 BULLS. Copper was more or less nominal and very dull. Standard was quoted at \$10.75; lake, \$11.85; electrolytic and casting, \$11.45. The feeling in the lead market was steady and spot prices remained \$4.12%. Spelter showed a declining tendency, closing casty and nom-inal at \$5.10 for spot. Iron, nominal, but unchanged. HOGS-Today's general market was 5@100

mchanged.
