great engine in one of the mills, Mr. Fritz Mr. Church's inventions, from the very nature of the business which they have were two great iron "dog irons," used for "When I get a contract for a new engine revolutionized, are infinitely more delicate I always want to have all the educated in adjustment than those of Mr. Brown. brains I can get to help me. You know While a plece of Mr. Brown's mechanism double purpose of cooking and heating, there will lift a ton of coal, a piece of Mr. Church's mechanism will pick up a hair. "I want the best trained draftsmen I It has been said of Mr. Church's machines

Most men of science know about Prof. Albert A. Michelson of the department of most unknown to backwoods people, being get to set it up. Then, after all the work physics in the University of Chicago. If scarce and very high priced. If by bad one were to walk up Broadway, however, luck or mismanagement the fire did go out and Twenty-third street if he or she had begged a few live coals for a starter. When thing is all right. I ask the mathematicians ever heard of Albert A. Michelson, it is the wood was damp and there were no pine if they are sure their figures as to stress probable that the great physicist would be knots to light the cabin at night a small found to be an unknown personality to 999 iron lamp with a cotton strip for a wick, lutely sure. The draftsmen are sure that out of every 1,000 of whom the question filled with lard or turkey oil, furnished

And yet Prof. Michelson has measured very small and flat, holding not more than the speed of light, investigated the effect two tablespoonsful of melted lard or turkey of the motion of the earth through space oil, and suspended by a chain attached to a on that speed, showed how many waves small flat fron bar that was sharp at one of light could be utilized as an exceedingly | end, that it might be conveniently inserted delicate and accurate method of measure- in the cracks between the logs. ment as well as a powerful instrument of research, devised a method whereby a light wave may be made an absolute and invariable ultimate standard of length and than any hitherto known.

The fact that they are generally unknown other illustration is furnished of the truth Of his inventions it has been said that of the saying of Hon, Tody Hamilton: "If they have so reduced the cost of transpor- you want to let folks know you're living, The foreign steel makers laughed at such tation in this country by water and rail, you must paint it across the sky."

Lore of Rare Coins Some Freakish Mintage by the United States.

The coinage of an American \$4 goldpiece coins of certain dates will sell for 100 times in Ireland, but the king was finally com-United States. The minting of the coin, price than a goldpiece of the reign of Traposed of one part gold and twenty-four ern times, large quantities of the same profits of the undertaking were too small of obtaining it fifteen miles distant. parts silver, making a total of twenty-five issue or mintage are obtained at one time.

ing. Today these two vocations are far in The gold metric dollar (of 1878) is also value is destroyed by the quantity found. of desirability. Even manicuring stands ahead of dressmaking in the favor of girls parts silver and 1.9 part 14.2 grammes, while the standard metric or Bristol" is worth \$300. dollar of 1879 contains 895.8 parts silver, 4.2 The fancy prices paid for rare coins betypewriter, at first taken as a joke, in regrammes ality opened the door of the strenuous life

to this authorized series contains 6 grammes of pure gold, three parts silver metropolis in search of work has been very and seven parts copper, making a total of seven grammes. There were but 450 of girls themselves, bushels of letters arrive each of these coins struck, and they were each day to editors and writers, asking for distributed among the members of congress and a few officials, the price for the series being \$6.75 coin of the realm. It is easily inferred that none of the coins are in circulation, nor will the United States pay their face value for them, as stated by Director Preston. The presentation of these coins by their several holders in different parts of the country accounts for the numerous mail inquiries addressed to the director of the mint as to their genuineness and also by numismatists, who desire to purchase

specimens for the collections. In fact, it is from this latter class that the greater part of the inquiries come, as but few people outside the students or devotees of numismatics know aught of the coinage in question. It is presumed that some of the original holders of the pieces parted with them to friends as presents, and these presents or souvenirs being exhibited by the grateful recipients, has given rise to the supposition that the mint issued cult to obtain work. These bright young them in large quantities as a circulating

last! Nothing can change it, and the girl who realizes this and keeps that star in view seeks the best career. The women who achieve are the first to admit this truth. The girl feverishly striving to leave her home and its environments to pursue a will-'o-the wisp that in reality she knows nothing of will always seem like a butterfly beating out its life against a wheel.

BACK WOODS CHRISTMAS.

With Christmas in the near future, I go back in memory to the first Christmas spent in "Yankeedom." It was in 1847 at the home of my uncle In the backwoods of

Uncle's house, or cabin, was built of round logs just as they were cut from the forest. Not many settlers had attained to was called, was attached chains and hooks on which were hung iron pots and kettles used in cooking. Back in the fireplace there supporting the logs of wood of which the fire was made. This one fire answered the being no other one in the house. It rarely went out at night. The chunks being covered at bedtime with ashes, were usually in good condition for starting the morn-

In this far back time matches were alduring the rush hour and ask every man some members of the family took a shovel and woman he met between the city hall and went to the nearest neighbor and light. These lamps were queer little things,

The day before Christmas uncle set out

to find a turkey for the next day's feast. Not to any market, or well-filled coop made a new spectroscope more powerful did he go, but into the dense forest that surrounded his cabin. After a few hours These are only a few of the men who tramping through the deep snow he rehave lived and worked for the advance- turned with as fine a specimen of wild turment of civilization and the making of key as ever gladdened a hunter's heart, progress, and the world, while using the Early on Christmas morning the turkey products of their brains every day, has was prepared and suspended by a strong labor-saving machinery than any other man known little or nothing of the personalities | was prepared and suspended to the mantle shelf, so that it hung in front and quite near the fire. The heat soon set the turkey to revolving and kept it so until it was cooked brown and tender, requiring no cave only an occasional basting from the pan of drippings below. In due time the vegetables, potatoes, turnips and beans, that were cooking in the pots suspended over the fire and the nice brown ring of sausage from the dutch oven on the hearth were lifted from their respective places and transferred to the table made ready for its savory burden. The turkey was taken from its conspicuous position, the gravy made and all present invited by aunt to "set up." To the already mentioned substantials were added golden apple sauce, apple butter, cucumber pickles, pumpkin pie, doughnuts and wild grape preserves. Home made bread, butter and biscuits, with sweet relates the Washington Post, was author- jan, Hadrian or the Antonines. This is and endeavored to circulate his shillings, cider, milk, coffee and real cream made the meal one worth remembering. The coffee served was a luxury, as it was only termed the goloid dollar and gold metric their hoardings in the ground, and when- Charles to aid Mr. Newby, but the coin used on very extra occasions, being 50 dollar. The goloid dollar, so-called, is com- ever these hoardings are discovered in mod- circulated under such protest that the and 70 cents a pound, and the nearest place for a profit all round, and the Newby

Maple sugar of home manufacture was The Newby shillings bear on the obverse | the sugar in general use in those days. If kept for babies and sick folk, as it was expensive. One pound of it put up in coneshaped, heavy, purple paper cost \$1. The table on which this dinner was served was a stiff home made affair and benches of the same workmanship were used for low. There was no use for waiters, everything being set on the table. Uncle "cut up" the turkey and helped the plates as they were passed to him. When it was time for dessert Aunt cut the ples and handed them to the one nearest her and they passed them to the next. The doughnuts and preserves were served in the same manner. There were no change of plates and no dessert dishes. The coffecups had saucers which were freely used both for cooling and drinking the coffee from. The steel table knives and forks were very small, especially the two-tined forks, so in eating many kinds of food it in New Orleans will bring a higher price. was necessary to convey it to the mouth

I cannot do justice to this oldentime Christmas feast without making mention The federal government captured the coin- of the table cloth, which added much to age at the outset, so that not a single piece its attractiveness and gave a delicate finish of refinement to the whole. It was not Uncirculated coins-that is, coins minted satin damask nor even Irish linen, but for numismalologists or coin collectors-are simple home made linen of the huckaback worth only their face value if worn, but if pattern, edged with knit lace, the work of kept bright and clean will bring fancy my aunt and her daughter. With their own planting and pulling the flax, binding it into sheaves, spreading it on the meadow scutching, hackleing, spinning, then boiling and bleaching the thread, and afterward weaving the linen and knitting the lace that composed the table cloth that the very daintest lady in our land would be

proud to own.

The plain way that my uncle and his family lived in those days, "away back in the forties," was a wonderful revelation to me, a young girl, reared in a southern state where there was no lack of colored servants ever ready to do the bidding of the "young missus." Since that far back day I have dined at many fine tables in fine houses with fine people, but to my notion the excellence of that dinner served so plainly in a log cabin has not been eclipsed by any modern style. As I write this simple story I wonder if any who read it will
