

RECEPTION TO GOVERNOR

Arrangements for Made for Social Functions of Inauguration.

ENTIRE STATE HOUSE IS TO BE USED

Governor Savage Issues His Last Military Order Honoring Discharge of Members of His Military Staff.

(From a Staff Correspondent.)

LINCOLN, Jan. 6.—(Special.)—Arrangements have been made for the governor's reception to be held in the capitol on the evening of January 8, commencing at 8 o'clock. All the state officers, senate chamber and representative hall will be open during the reception and every effort made for the convenience of guests, and to prevent the crowding and outside entrance of large bodies of people, as sometimes unfortunately occurs. The outside entrance to the capitol building will be open for entrance and exit and members of the National Guard stationed at all doors and hallways to give directions and instructions.

The reception proper will be held in the senate chamber, where the retiring governor will receive and introduce the people to the incoming governor, supported by the members of his staff and state officers and their ladies.

The west stairway, leading to the senate chamber, will be used exclusively for reaching the second floor and the other stairways for the return or departure of guests. The retiring party will be stationed at the south side of the senate chamber and guests upon entering will pass to the left and then around to the right of the chamber, passing out through the office of the lieutenant governor, thence to the rotunda, and, if desirable, to the house of representatives, where a general exchange of social courtesies may be had.

Announces Two Appointments

After spending a day at Okecho, Governor Mickey returned to Lincoln this afternoon. The governor announced the appointment of A. V. Cole as commander of the Soldiers' Home at Grand Island and Horace Clark superintendent of the Industrial school at Geneva.

James S. Auld Dies

James S. Auld, cashier of the City National bank, died at 2 o'clock this afternoon of pneumonia, after an illness of several days' duration. Deceased was 47 years of age and was a native of Knoxville, Ia. He leaves a wife and two daughters, both grown. None of the officials of the bank would discuss the effect of the death of Mr. Auld would have on the roster of the bank officials. The annual election of directors will occur next Tuesday.

Conflicting Grain Figures

Labor Commissioner Watson has made public the following from his biennial report:

At present there is much interest felt in regard to the outcome of the controversy between the federal census office and the United States department of agriculture, having on the question of accurate statistics.

It is important to note the figures on the acreages and production of the leading cereal crops of the state as reported by different authorities for the year 1932:

	Wheat	Corn	Oats
Acres	2,338,915	1,924,726	1,924,726
Acres	2,338,915	1,924,726	1,924,726
Acres	2,338,915	1,924,726	1,924,726

The federal census office gives its figures as the result of data furnished by enumerators, and the agricultural department were obtained by means of employing special agents and correspondents. The figures next given (Bureau of Labor) were compiled by the deputy commissioner of the census office, who reports that they are largely the result of an estimate based upon the figures of the preceding year, and that they are not as accurate as the figures of the agricultural department. The last figures of the agricultural department, which were reported on January 6, show that the state has a total of 2,338,915 acres of wheat, 1,924,726 acres of corn, and 1,924,726 acres of oats.

The gathering of the agricultural statistics is the greatest importance to Nebraska, since her people chiefly belong to the farming class and her main source of income is based on agricultural and stock raising products. The principal difficulty in the collection of the statistics is the fact that farmers are often reluctant to furnish the necessary information required. The idea has been advanced that the state should employ a large number of men to go into the fields and collect the statistics, but this has been rejected by the legislature.

TELLS OF GRAIN CROPS

American Agent in London Reports on Condition of World's Cereals.

NAVY DEPARTMENT OPENS SHIP BIDS

Cabinet Talks at Length on Cuban Treaty, Deprecating Sugar Magnates' Opposition to Its Ratification.

(From a Staff Correspondent.)

WASHINGTON, Jan. 6.—The report on foreign crops and conditions, compiled by the statistical agent of the United States Department of Agriculture in London, up to December 15 last, says Russia as a whole, harvested fine crops during the year.

The exports of grain, which had been heavy, would diminish, although the stocks of wheat in Black Sea ports at a recent date were estimated to be large as at the corresponding date in 1932.

The Russian railways had been overtaxed in moving the heavy crops of cereals.

The most important of the German bread grains, rye, was, like wheat, below the November condition in any one of nine preceding years. It was, however, little above what was officially regarded as "average."

In Roumania the corn harvest was variously estimated from 41,000,000 to 104,440,000 bushels, but the wheat crop, having been gathered in under the best of conditions, was not expected to be as large as in 1932.

The weather in Turkey had been favorable to newly sown grain, and in Bulgaria unfavorable.

In Italy the weather has been cold, but the winter wheat had been protected by snow.

Throughout the greater part of France the outlook for the young crops was favorable. The French vintage of 1932 had been estimated at about one-third less than that of 1931.

The Danish crops of 1932 were a good average.

In northern Sweden the crops of grain, hay and potatoes were destroyed by rain and floods throughout an extensive region, but fair crops had been harvested elsewhere in Sweden.

In Great Britain the early grain sowings had made a thrifty growth.

Favorable weather conditions were officially reported from India. The deficiency in the New South Wales wheat crop had been estimated at 11,000,000 bushels, while official advice from South Australia said harvest prospects were considerably improved.

Open Bids for Warships.

Bids for building \$9,000,000 worth of warships were opened at the Navy department today in the presence of representatives of nearly every ship building concern of note in the country, together with a host of subcontractors, who supply structural material for the big ships.

The bidding was close and exciting.

A feature of the event was the submission of a proposition to supply the horse power required to drive Tennessee and Washington, the speediest ships of the United States navy will have on its list, with the new turbine motors.

Another feature was the submission of a statement from one of the largest bidders to the effect that they had satisfied themselves that no less than 25,000 horse power would be required to drive the big ships at the calculated speed.

The bids were as follows: Newport News Ship Building company, one ship in forty-two months on department designs for \$4,232,000; Forster Works, one ship in forty-two months, \$4,232,000; Iron Works of San Francisco, one ship in forty-two months, \$4,232,000; New York Ship Building company of Camden, N. J., one ship in forty-two months, department's designs, for \$4,232,000; two ships, same class, for \$4,150,000 each, to be delivered in forty and forty-two months; same company, on plans of its own, providing for twenty-two knot ships, to be delivered in forty and forty-two months, \$4,232,000 each; Morn Bros. & Co. of Seattle, one ship in forty-two months, for \$4,232,000; William Cramp & Sons, Philadelphia, one ship in forty-two months, \$4,232,000; one ship, department's designs, for \$4,232,000; same company, on its own designs, ships to be delivered in thirty-six and thirty-nine months, to be of twenty-two knot speed, one ship for \$4,100,000; two ships on same plans, \$4,000,000 each; same company, on plans of its own, providing for the use of steam turbines and water tube boilers, \$4,100,000 for one and \$4,000,000 each for two.

The judgment of the board of bureau chiefs will be necessary to determine the awards.

Presidential Nominations.

The president today sent the following nominations to the senate: Raymond B. Frazier, Wisconsin, consul at Copenhagen.

Army—Promotion, artillery corps: Lieutenant Colonel William P. Voss, to be colonel; Judge advocate general's department: Captain Louis B. Lawton, Twenty-sixth infantry, to be judge advocate; rank of major; to be a second lieutenant of infantry, Lewis B. Mosely, at large.

Discusses Cuban Treaty.

At the cabinet meeting today all the members were present. Serious consideration was given to the status of the Venezuelan embargo. The status of the Cuban reciprocity treaty in the senate also was considered. Confidence was expressed by the president and the cabinet members that the treaty would be ratified, but the disposition of some of the advocates of the treaty was to couple the Cuban treaty with the pending Philippines tariff bill.

General Wright, vice governor of the Philippines, was in the executive office today with the president and during the cabinet meeting was in an adjoining room the greater part of the time. He is interested in the pending legislation for the Philippines and is being consulted with regard to it. Secretary Root and Postmaster General Payne remained with the president a considerable time after the adjournment of the meeting.

Dennis O'Connell to Be Rector.

It is stated at the Catholic university that the report from Rome expressing the belief that Mgr. O'Connell, bishop of Portland, Me., will be appointed rector of the Catholic university at Washington, undoubtedly refers to Monsignor Dennis O'Connell, who was at one time rector of the American college at Rome and who is at present in that city, and not to the bishop of Portland.

Message from Honolulu.

The secretary of the navy received his first cable message from Honolulu today. It simply announced that the cruiser Solace sailed from that port yesterday for Guam and the Philippines.

Roosevelt Going to Canton.

President Roosevelt has accepted an invitation to attend the banquet to be given by the Canton Republican league in Canton, O., on Tuesday evening, January 7.

The banquet is to be the birthday of the late President McKinley. His birthday falls on January 23, but on account of a state engagement of the president the banquet was arranged for the earlier date.

Plate Glass Men Testify.

Representatives of the Pittsburgh Plate Glass company testified before the Interstate Commerce commission today in substantiation of the charges that the railroads are discriminating against American manufacturers in their import and domestic freight tariffs.

J. M. Belleville, general freight agent of the Pittsburgh Plate Glass company, said that within four years it had been possible to convey glass of any size in carload lots from Antwerp to Chicago for 43.25 cents per hundred pounds, although the domestic rate from Philadelphia to Chicago was 57 cents. A statement was submitted showing in detail the rates in 1902 on plate glass from Antwerp to various cities and the rates to the same cities on domestic shipments, showing that rates to be from 1 to 5 cents lower than domestic rates.

The witnesses said nothing was known positively as to the ocean proportion of the rates on plate glass, but it was understood generally to be 15 cents per hundred pounds. From this figure they made deductions to show what they believed the domestic rates should be. The hearing was then closed.

Morrow to Be Major.

First Lieutenant Harry M. Morrow of the Ninth cavalry, stationed at the Presidio, San Francisco, will be appointed a major in the judge advocate general's department on the retirement of Major J. L. Lawton of the Twenty-sixth infantry, just promoted. Major Morrow is a graduate of the law department of the University of Michigan.

RAILROADER COMMITS SUICIDE

Is Despondent on Account of Having Lost His Position.

BEATRICE, Neb., Jan. 6.—(Special.)—A. W. Hamblin, freight conductor on the Burlington road, committed suicide at his home in Wymore this evening by swallowing carbolic acid. He took the drug some time this afternoon and died at 6:30. Hamblin lost his job a few weeks ago on account of excessive drinking and since that time he has been displaying considerable despondency. He was 30 years of age and leaves a wife and one child, who are at present visiting relatives near Lincoln. The family have been residents of Wymore for about three years. Coroner Walden of this city was at once notified and has gone to Wymore to hold an inquest.

Woodmen Install Officers.

BEATRICE, Neb., Jan. 6.—(Special.)—Washington Camp No. 8, Woodmen of the World, held a largely attended meeting last night at which officers were installed. The following were chosen delegates to the district convention which convenes at Kansas City, Mo., next week: H. W. L. Jackson, D. W. Carre and William Hilborn.

Gage County Mortgages.

BEATRICE, Neb., Jan. 6.—(Special.)—Following is the annual mortgage report for Gage county for the year 1932: Number of farm mortgages filed 377, amount, \$694,488; number of city mortgages filed 475, amount \$630,577; number of city mortgages filed 236, amount \$119,286; number of city mortgages released 279, amount \$175,223.

Lecture Draws a Crowd.

GENEVA, Neb., Jan. 6.—(Special.)—Adrian M. Newsum, monologist, delivered "The Sky Pilot" last night to an attentive audience. This number of the High School lecture course was given in the new Methodist Episcopal church, the opera house being too small to hold the crowd.

Valuable Farm Is Sold.

BEATRICE, Neb., Jan. 6.—(Special.)—The G. A. Murphy farm, located four miles north of this city, was sold yesterday for \$3,000 cash, or \$50 per acre.

Old Soldier Is All Right.

HOT SPRINGS, S. D., Jan. 6.—(Special.)—David Kaiser, who last year wandered away from the Soldiers' home at this place and for whom his friends and the authorities have been hunting all over the union, has turned up again in Cheyenne, Wyo., and has written to friends that he will return to the Hills in a short time.

FORECAST OF THE WEATHER

Fair and Much Colder in Iowa and Northern Nebraska Predicted for Today.

WASHINGTON, Jan. 6.—Forecast: For Nebraska—Fair Wednesday and Thursday, colder Wednesday, with a cold wave in the north portion.

For Iowa—Fair and much colder; Thursday, fair; high north winds.

For Illinois—Fair in south and colder in north portions Wednesday; Thursday, fair; break to high northwest winds and rains.

For Kansas and Wyoming—Fair Wednesday and Thursday, with a cold wave; high northwest winds, diminishing.

For Colorado—Fair Wednesday in east portion; Thursday, fair.

For Montana—Fair and colder Wednesday, with a cold wave in the east portion; Thursday, fair.

For Missouri—Fair Wednesday and Thursday, colder Wednesday in north portion.

Praise Pe - ru - na as a Cure for Colds and a Preventive of Catarrh

First symptoms of catching cold he should at once begin the use of Peru-na according to directions on the bottle, and the cold is sure to pass away without leaving any bad effects.

Unless this is done the cold is almost sure to end in the second stage of catarrh, which is making many lives miserable. If Peru-na was taken every time one has a cold or cough, chronic catarrh would be practically an unknown disease.

Miss Elizabeth Uber, No. 57 Bassett street, Albany, N. Y., writes: "I have always dreaded unsettled weather because of my extreme liability to catch cold when it starts. I have always been very nervous and have trouble with my entire system, which it would take weeks to get me back to normal. I am glad to say that since I have taken PERUNA I do not have any reason to dread this any more. If I have been at all exposed to the damp, wet or cold weather, I take a few bottles of Peru-na and it throws out any hint of sickness from my system."—Miss Elizabeth Uber.

Mrs. M. J. Brink, No. 830 Michigan avenue, St. Joseph, Mo., writes:
