Wheat Alone Remains Steady, with May Delivery Closing One-Eighth Higher on Small Demands and Contradictory Cables.

CHICAGO, Jan. 10.—Dullness prevalled in all markets on the Board of Trade today and wheat closed steady, with May be higher. May corn and outs were also up ac, while provisions closed from a shade to 5075c lower. inc, while provisions closed from a shade to 50714c lower.

Wheat ruled quiet, but there was a firm undertone the greater part of the day, although the early traders experienced a little sastness on favorable weather for the movement. The news was rather favorable to the bull side and there was some covering by shorts and more or less buying for long account. Reports of heavy rains in Argentine were the main strengthening factor, although firm Liverpool caoles had some effect at the start. The market was a very narrow one and there was little change in prices. May opened inchanged to be lower at 764-67-64c and ranged between 164c and 1650c were good but the start of the firm of the start of the firm of the start of the start of the firm of the start of the start

Provisions were irregular and the trading was light, the feature being in buying of May ribs and the setting of May lard by a local packer. There was some covering by shorts, which helped the market. The close was steady, with May pork light lower at \$16.124, May lard was 24.435 lower at \$8.714.28.80.

Cotton Market.

NEW YORK, Jan. 10.—COTTON—The market opened steady at unchanged prices to a decline of 1 point and for a time ruled quiet, cables being disappointing. The weather in the cotton belt was considered favorable for an increased movement and selling was free until it became apparent that wall street parties were absorbing the offerings. A buying movement set in and prices were soon 253 points up from the opening basis. A firm undertone developed toward moon on the disappointing volume of receipts, estimated for the day at 20,000 bales, against 25,000 last year. The fact that the world's visible supply of cotton is now 207,000 bales less of all kinds than held last year led to considerable buying on the investment basis, as the absorption of cotton continues to show a record demand from spinners in this country and Europe.

Persistent Selling of Reading Cause NEW YORK, Jan. 10.—There was evidence of some confusion of sentiment in the movement of prices of stocks today. The persistent liquidation in Reading had an unsettling effect. The strength of Atchison was in strong contrast. The prehase of 20,000 shares of this stock within the first few minutes of the trading lifted it strongly and had a simulating effect elsewhere. There was some show of positive strength in New York Central and Pennsylvania, on the strength of the Reading deal having a tendency to harmonize the whole railroad situation. Elsewhere the market was inclined to be dull and fluctuations were narrow until the appearance of the bank statement. The cash item was a disappointment. In place of the predicted increase of \$3,900,000 to \$11,000,000 the week's gain amounted to only \$4,740,100. The only plausible explanation to account for this discrepancy was that the heavy flow of cash into Chicago the laster part of the week had been arrested there and not forwarded to New York, as had been supposed. Sterling exchange was inclined to harden and discounts advanced in London. The market closed weak. The only explanation of the movement in Atchison was an unconfirmed rumor of a plan for a combination of the Rock Island.

Receipts of stockers and feeders have been extremely light all the week, and while the demand was not large, it seemed to be in excess of the supply, so that prices have ruled higher all the week, but so few have been sold that it is difficult to quote a definite advance. As high as \$4.25 has been paid, Representative sales:

SHEEP—There were several cars of sheep and lambs here this morning, but part of them were bought to arrive. Those that were on sale brought fully steady prices and packers seemed to be anxious for the better grades. As high as \$5.50 was paid for some prime lambs, which was pronounced a good strong price.

For the week receipts have been fully as heavy as they were last week and there is a big increase as compared with the same

One of the note worthy moves in the financial world that is attracting a great deal of attention, is the pooling of interests by small investors. A St. Louis firm, the National Securities Company, is the orime mover in the plan. This company receives the money of thousands of small investors, and, combining them, form gigantic sums, which enables them to succonstully transact enormous deals that pay hunderme profits to the individual members of the pool. This is another phase of the Community of Interes; Idea made so popular by J. Pierpent Morgan, the only differonce being that this company is composed of an unlimited number of small investors, Receipts, Shipments, while Mr. Morgan's companies are composed of a limited number of rich men.
