It used to be considered that only urinary and bladder troubles were to be traced to the kidturned this morning against forty-five coal neys, but now modern science proves that nearly operators and retailers, charging conspiracy all diseases have their beginning in the disorder of these most important organs.

Therefore, when your kidneys are weak or out of order, you can understand how quickly your entire body is affected, and how every organ seems to fail to do its duty.

If there is any doubt in your mind as to your condition, take from your urine on rising about four ounces, place it in a glass or bottle and let it stand twenty-four hours. If on examination it is milky or cloudy, if there is a brick-dust setling, or small particles float about in it, your kidneys are in need of immediate attention. No matter how many doctors you may have tried-no matter how much money
