CINCINNATI, Jan. 22.—The National Base Ball league has concluded its continuous sessions of four days and nights. The closing day was as harmonious as the previous three were discordant. The unanimous vote by which the league ratified the peace agreement before daybreak was continued in everything done today.

Members Rejoice at Result. President Pulliam said: "I declared a few days ago that everything was as clear as the Monday sun. That is just how it turned out—a perfect understanding and all-round acceptance of the peace compact."

President Ebbetts said: "Brooklyn is satisfied. We did not understand the peace compact at the outset as we do now. We have been liberally treated by our associates."

John T. Brush said: "The New York club has always been for peace. I am glad we reached an understanding. Now let us have base ball, not talk."

After ratifying unanimously the peace agreement at 2 this morning, the National league continued its adjourned session. There was some unfinished business from the meeting in New York last month and much more since the peace compact had been reached.

SCROFULA. Is an hereditary disease, and one for which a tainted ancestry or blood poisoned parentage is responsible. It is transmitted through the blood and shows itself in swelling and ulceration of the glands of the neck, catarrh of the head, weak eyes, sores, abscesses and skin eruptions, with a gradual wasting away of strength and vitality. It also attacks the bones and joints, resulting in white swelling, hip disease and deformities of every kind. We see the effects of this awful blood taint every day, but it exists in so many forms that frequently it passes for something else and is treated as another disease.

THE GIFT OF A TAINTED ANCESTRY. S. S. S. cleanses the blood of all scrofulous matter and tubercular deposits, and when rich, pure, health-sustaining blood is again flowing in the veins there is a gradual disappearance of all the dangerous symptoms of Scrofula; strength and vigor return, and a complete cure is effected. S. S. S. contains no strong minerals to further break down and derange the system, but can be taken by the very old, as well as the middle aged and young, without any harmful effect, or the least injury to the most delicate constitution.
