NO BIG DINNERS FOR SUNDAY

People Who Depend on Gas Stoves Must Eat Cold Lunches for One Day.

CHANGE IN GAS PLANT IS THE CAUSE

All Gas to Be Turned Off from Mains Between 7:30 A. M. and 9:30 P. M. in the Evening and Possibly Longer.

Citizens of Council Bluffs who depend on gas stoves for cooking their meals will be in a bad way Sunday. The gas company has notified its patrons that on the day from the hours of 7:30 in the morning until 9:30 in the evening all gas will be shut off from the mains. This is made necessary by changing the connections from the old to the new plant, which is now completed.

The change, however, will be made unless the weather is favorable.

Many families in this city depend entirely on the gas stove for culinary purposes and consequently they will have to do with cold meals that day and if they want hot water to make coffee with or for other purposes they will be compelled to call upon their neighbors who may be fortunate enough to have cook stoves. Many families also depend entirely upon gas for illumination and it is safe to say that there will be a toll house of the one burned Monday Saturday. But few of the churches in this city are lighted by electricity, most of them depending on gas, but the gas company is taking steps to prevent inconvenience to the Sunday evening church going by stringing temporary electric wires to those churches which are lighted by gas.

Manager Fritchman of the gas company said yesterday: "This changing of the connections is absolutely necessary with the completion of our new plant. While we realize that the shutting off of the gas will inconvenience many of our patrons we will do the work as rapidly as a large force of men can do it. We selected Sunday for changing the connections, believing that this day the repair business would be interfered with as little as possible. It may be that the work of changing the connections will be completed earlier than expected and it is also possible that it may take longer. We would like to impress upon everybody the importance of having all stop cocks turned off in order to prevent accidents when the gas is turned on again."

RAILROAD RATES TOO HIGH

(Continued from First Page.)

state Commerce commission has demanded a financial showing by the corporations. He contends that the increased rates exceed the increased expenses and are attended by a degree of prosperity unparalleled in the history of the country. The commission is stating in its report for 1902 that the increased cost of transportation then amounted to only 3.84 per cent as compared with previous years, but as adding that "the significance of these facts is that the directors of railroads during the year 1902 have available to themselves of high net earnings, made permanent improvements on railway and rolling stock and have charged these improvements to operating expenses." He quotes from the Iowa commission report for 1902 showing that the Milwaukee company had paid one year to operating expenses \$1,500,000 for renewal of ties and rails; and the Burlington, Rock Island and Northwestern had made similar charges. The report also shows that the Milwaukee company had paid one year to operating expenses \$1,500,000 for renewal of ties and rails; and the Burlington, Rock Island and Northwestern had made similar charges.

SUPREME COURT CLOSES FOR THE TERM

Will Review Important Criminal Law Question—Des Moines Fire Losses

Last Year—Michigan Banquet for Iowa.

(From a Staff Correspondent.)
DES MOINES, Feb. 12.—(Special.)—The supreme court closed its January term this morning and a large batch of decisions and rulings was made of record. The most important matter handled was the decision in the telephone case involving the right to use the streets and alleys of cities without a franchise. The case was that of Chamberlain against the Iowa Telephone company, appealed from Judge Prouty of the Polk county court, who held against the company, in a long opinion, decides that the telephone company is right. The suit was to oust the company from the streets of Des Moines because it had no franchise, the old franchise having been allowed to lapse, but the company answered by pointing to a general law of the state which gives telegraph and telephone companies the right to occupy "all public highways" of the state. The court holds that this language relates to streets and alleys as well as rural roads, and if this was not clear when the present legislation was enacted that in giving city council power to regulate telephone and telegraph companies, and not the power to exclude or admit them. The court therefore reaches the conclusion that the company has a right to occupy the streets without any permit or franchise from the city. This decision affects every city in the state and renders it unnecessary that franchises should be asked for or obtained. Telephone companies may go into any city in the state without asking the consent of anyone.
