

AFFAIRS AT SOUTH OMAHA

Building Ordinance Will Be Enforced by Order of the Mayor.

CITY ENGINEER TO ACT AS INSPECTOR

Undertakers and Livermen Petition Council to Open Better Road to Laurel Hill Cemetery.

From this time on the building inspector's department of the city will be looked after carefully and the provisions of the ordinance are to be enforced.

Only recently City Engineer Beal had occasion to go to the cemetery plant for some information about a new building being erected.

Want Better Road. A petition was presented to the city council some months ago signed by the undertakers and livermen of the city asking the authorities to open Jackson street from Railroad avenue to the northeast corner of Laurel Hill cemetery.

At the time the petition was presented it was referred to the city and alley committee. Chairman Welsh of the committee visited Union Pacific headquarters a number of times in an attempt to have the railroad permit the city to use a portion of its right of way in order that a better road could be secured to the cemetery.

On the part of the city the officials proposed to fence the portion of the right of way and keep it in repair.

One excuse after another was given until yesterday, when the announcement was made that the Union Pacific would neither loan nor rent any portion of its right of way. Now the council will cast about for other means of securing a good road to the cemetery.

The crossing at Jackson street may be ordered opened. If such is the case the Union Pacific will be compelled to furnish the necessary funds.

DEMAND EXCEEDS SUPPLY

Dun Explains Chief Feature of Strength in Business Outlook.

SHIPMENTS WAIT ON SPRING THAW

Railroads Still Unable to Handle Commitments Offered and Merchants Consequently Look Anxiously for Lake Navigation.

NEW YORK, Feb. 12.—R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say: Disproportion between supply and demand is still a factor of strength in many commodities.

Wages have advanced in response to the demands of organized labor. The relief of the traffic congestion is still confined to a few favored districts and shippers cannot depend on prompt deliveries until lake navigation opens.

Earnings continue to show splendid gains over former years. January exports thus far exceeding 1902 by 9.4 per cent and 1901 by 15.7 per cent.

Staples All Flourish. Orders for spring shipments are heavy in all staple lines.

Sound conditions still continue to prevail in the iron and steel industry, with few developments of note.

Export business has increased in New England and the West, with good orders for April delivery of calfskin shoes.

Little change occurred in meats, but mild weather in this vicinity has brought a heavy movement of eggs that the price fell 50 cents for the week.

Failures for this week numbered 230 in the United States, against 210 in 1902 and 29 in 1901.

Cannot Get Enough Labor. Bradstreet Says Employers All Over Country Want More Workmen.

NEW YORK, Feb. 12.—Bradstreet's tomorrow will say: Distributive trade and productive industry are both showing a steady advance.

Perhaps the most notable feature in the entire situation is the fact that present high prices of raw cotton are not being met by a corresponding increase in consumption.

The dry goods trade the country over sends excellent reports.

Wheat, including flour, exports for the week aggregated 2,564,439 bushels, against 2,396,316 last week.

Corn exports aggregated 1,530,170 bushels, against 1,468,101 last week.

Business failures in the United States for the week ending with February 11 numbered 230.

Indianaapolis, Feb. 12.—The Indianapolis Tournament association tonight announced its plans for the coming season.

Monte Carlo, Feb. 12.—The results of the third round of the international tennis tournament were as follows: Marcey beat Giffith.

TWENTY BIRDS AND NO MISS

Hindmarsh Carries Off Honors in Preliminary to All-Nebraska-Omaha Event.

TO ADOPT FINSEN METHOD

Health Commissioner to Equip Emergency Hospital with Red Shades.

THIS TO PREVENT PITTING IN SMALLPOX

Dr. Ralph Thinks Omaha is First City in the United States to Take Advantage of Finsen Discovery.

Patients in the Omaha emergency hospital soon are to be protected absolutely from pitting or scarring by smallpox by the use of one of the recent discoveries in photography—the use of light in medical practice.

So far as the health commissioner knows, Omaha will be the first city in the United States to equip its pesthouse in this manner.

Expense Will Be Small. The expense will be light, all that is necessary being a quantity of red cloth to be hung over the doors and windows and over the lamps.

Dr. Ralph plans to have the arrangements completed next week.

An article in the current number of McClure's Magazine, called "The Surgery of Light" and written by Cleveland Moffett, set Dr. Ralph to wondering why the Finsen method could not be introduced into the local emergency hospital.

Dr. Pictou's Experience. He stumbled across the truth one day while reading a pamphlet published in 1832 by Dr. Pictou in New Orleans.

Cleveland Moffett describes the progress of the experiments: "No attempt was made at explanation, but the mere fact was sufficient for Finsen, who in a flash of insight seized upon a truth that had lain here for years, undiscovered without scarring simply because, being in the dark cells, they were protected against the irritating actinic rays, the same blue rays that disturbed the earthworms.

Result of an Experiment. The result of an experiment was a triumph for Finsen and was summed up like this by Dr. Stander: "The period of suppuration, the most dangerous and most painful stage of smallpox, did not appear; there was no elevation of temperature and no edema. The patients entered the stage of convalescence immediately after the period of vaccination, which seemed a little prolonged. The hideous scars were avoided."

Odd Fellows Temple Company Falls. CINCINNATI, Feb. 12.—The Odd Fellows Temple company of Cincinnati has failed to pay the cost of the temple valued at \$250,000, on which the Central Trust company of Cincinnati has a mortgage.

To Be Buried at Home. NEW YORK, Feb. 12.—The collar Ajax, which arrived here today from San Juan de Puerto Rico, by the steamer Boston, was the nine sailors of the battleship Massachusetts who were killed in an explosion of a 12-inch gun turret on that vessel. The bodies were brought here for interment.
