DEPARTMEN'S RETAIN OFFICES IN OMAHA

Beneent Passenger Agent Buchanan, Not Mentioned in Circulars Pertaining to New Arrangement, Goes to Chiengo.

General Manager Bidwell of the Fremont, Eikhorn & Minsouri Valley railroad has isstied turther details concerning the operation of the line under the new regime the annual report of the company, issued as the Nabraska and Wyoming division of today. the Chicago & Northwestern railway, which change takes place next Sunday, March 1. Mr. Bidwell's latest announcement reads: The rupth that the subdivisions of the Fremont, Ehrhorn & Missouri Valley rall-road are to be changed is erroneous. The property will be operated substantially as heretofore. The three operating divisions, with headquarters and superintendents at Fremont, Norfolk and Chadron, respectively, will continue as "districts" of the Nebraska and Wyoming division of the Chicago & Northwestero railway, instead of "divisions" of the Fremont, Elkhorn & Missouri Valley railroad. The managing, degartments will all retain the same headquarters in Omaha as heretofore.

Camathage of trackage at various points between Philadelphia and Pittsburg. The traffic carried over the system during the year aggregated nearly 270,000,000 tons, an increase of 26,000,000 tons over the Nebraska and Wyoming division of the Chicago & The net earnings of all lines east and west of Pittsburg for the year were \$5.762,592, an increase of \$2,716,100 compared with 1901.

The traffic carried over the system during the year aggregated nearly 270,000,000 tons, an increase of 26,000,000 tons over the very sear. The net earnings of all lines east and west of Pittsburg for the year were \$5.762,592, an increase of \$2,716,100 compared with 1901.

The traffic carried over the system during the year aggregated nearly 270,000,000 tons, an increase of 26,000,000 tons over the year aggregated nearly 270,000,000 tons, an increase of \$2,000,000 tons over the year aggregated nearly 270,000,000 tons, an increase of \$2,000,000 tons over the year aggregated nearly 270,000,000 tons, an increase of \$2,000,000 tons over the year aggregated nearly 270,000,000 tons, an increase of \$2,000,000 tons over the year aggregated nearly 270,000,000 tons, an increase of \$2,000,000 tons over the year aggregated nearly 270,000,000 tons, an increase of \$2,000,000 tons, an increase of \$2,000,000 tons over the year aggregated nearly 270,000,000 tons, an increase of \$2,000,000 tons over the year

Compliment to Old Management. So none of the present employes of the operating department here or over the line will be sacrificed as a result of the absorption. Operation of the road will continue just as before. This is a compliment to the managerial tactics and policy pursued by Mr. Bidwell in the past, and a further commendation comes in the latest civcular from Chicago, which states that: All traffic between stations and to and from stations on the Nebraska and Wyomind division of the Chicago & Northwestern railway will be waybilled according to the rules and regulations, tariffs and circulars issued prior to March 1, 1903, by the Fremont, Elkhorn & Missouri Valley railroad, until said rules and regulations, tariffs and circulars are canceled by the Chicago & Northwestern railway.

This circular is issued by Maryin Hugh-

RATE PROBE SINKS DEEP

Railroad Officials Called to Explain Recent Freight Advances.

COURT DECISION DUBBED IMPRACTICABLE

Delaware, Lackawanna & Western Vice President Harshly Criticises Verdict in Case Involving Transportation Charges.

WASHINGTON, Feb. 27.-The investigation into the recent advances of freight rates on grain, packing bouse products iron and other commodities was concluded

vice President Caldwell of the Delaware. Lackawanna & Western, Comptroller Buckley and General Traffic Manager Wight of the Baltimore & Ohio, Freight Traffic Manager Powell of the Southern, General Freight Agent Knight of the Wabash, Traffic Manager Guthrie of the New York Central, George F. Brownell of the Eric and W. Janvierr, counsel for the Lehigh Valley were witnesses. In general they contended that the increases were based on commercial and traffic conditions, present and prospective, but admitted that the earnings of their systems were ample.

In reply to questions by Assistant Secretary Decker of the commission, Mr. Buckley said the Baltimore & Ohio was contemplating an advance of salaries to men getting \$200 a month or more. The increase in salaries of men getting \$200 and under which went into effect on January 1, would make the cost of labor at the end of the present fiscal year \$3,000,000 higher than for last year. The extent of the increase now in contemplation was not settled, but he did not believe the net expenses of the road would be greater than before, because of increased traffic competition.

When he was asked about coal expenses Mr. Buckley said both he and the general Mr. Buckley said both he and the general superintendent believed coal prices, which have been steadily increasing, would go worked over in the employer's shop. No higher.

Mr. Wight agreed that the cessation of the rebate practice had saved the railroads tween \$40,000 and \$50,000 a year, and the Recent Advances in Applying the Threemuch money, but declined to make any workingman won't have to mind the maestimate of the amount. Mr. Caldwell reviewed the attitude of

raffic managers and contended that the CANARY THAT CAN WHISTLE railroads were the real basis of commercial prosperity and without them the Indian still would be roaming the land. The railthe investment on the basis of service given and not according to what so-and-so says. "Is what the courts and legislators have

Gelatine Prints.

Instead of transferring the result of the work done by the camera to paper for multiplication, the photographer may want to make a lantern slide that can be exhibited by a lecturer. He will then pursue a different method. He can make a print on transparent gelatine from each of the three plates, and then dye them properly. If they are mounted, one in front of another, their cost the users \$37,500,000 each year, and the effects may be combined in a single slide. -Two or three methods of preparing such films have been devised, but that with whose development Sanger Shepherd (of in the next two or three years and the England) is identified is just now regarded supply was in excess of the demand.

Another Method. It was also found that if these films, inegram.)-Mrs. Mary Walter, a resident of Rockport. Mo., 76 years of age, was run stead of being mounted together in a landown by a street car at Ninth and Fredertern slide, were laid down over a sheet of lek avenue and fatally injured at noon towhite paper and made to stick thereto, picture as good as, or better than, that obtained with halftone blocks and a lithographic press would be secured. Of course the surface would not be absolutely level and the process was a troublesome one, but the picture itself would be an excellent one Solons gray Looked one at another and turned away. hues is secured.

the most satisfactory. It was long ago discovered that if a certain chromium salt was added to gelatine, and a film of the latter was exposed to the action of light under an ordinary photographic negative, this effect would be produced: Under the clearest and most transparent parts of the negative the gelatine would be hardened so as to be practically insoluble, while those parts that lay under the dense portions of the negative would be almost unaffected. The intermediate shades would act according to their density. If, afterward, the surface of the film were thoroughly washed, the protected parts would partially dissolve, while those acted upon most strongly by the light would stand up higher than the rest of the surface. In other words, there would be a colorless image in relief, the thickest portions corresponding to what were the shadows in the orginal subject, while the thinnest ones would correspond to the high lights. Staining would now give transparencies in a single color, and the amount of stain absorbed would be governed by the depth of the gelatine at any particular point. To three films, one corresponding to each of the negatives, might thus be imparted the proper colors.

One more advance has now been made

Dies as His Mother Feared.

Edward Goode, of Kokomo, Ind., promisd his mother he would not work on a railroad during her lifetime, she declaring that he would be killed before a month if he did. The mother died three weeks ago and the son, baving kept his promise, so cured a place on the railroad, which had been his ambition. The prediction of the mother was fulfilled. He was killed in the Vandalia yards at Terre Haute on Monday of last week, and the body was brought to Kokomo and buried beside the newly made grave of his mother.

LABOR AND INDUSTRY.

The Baltimore & Ohio railway will be made a four-track road from Pittsburg to Chicago.

Trade unions in New York increased 20 per cent in membership during the last six months.

The average depreciation of the thirteen cable stocks because of Marconi's success is 3 per cent. In ten years the boilermakers and iron shipbuilders' union has grown from 450 to 23,000 members. The cost of the various improvements contemplated by the Pennsylvania railway will be \$50,000,000.

obtained situations last year for 24,00 men and 13,000 women. The applicants numbered 27,779 men and 13,134 women. illinois ranks first among the strees in the manufacture of agricultural imple-ments, bicycles, cars, glucose and distilled iliquois, and in slaughtering and meat pack-

The great shoe manufacturing towns are Lynn, Haverhill and Brockton, Mass., and the great hat producing towns are Bethel and Danbury, Conn., and Orange, N. J. There was recently held in Germany a competitive exhibition of the work of journeymen shoemakers. In the United States the cutter is the only skilled workman in the shoe industry.

cycle factories has been turned into other channels. The sales of wheels are not one-twentieth as large as in 1898, and the membership of the league has declined in the same proportion.

There were twenty bicycle stores in Chi-

We are very proud of the fact that docturs so generally indorse Ayer's Cherry Pectoral. There are two reasons for this: First, we send the formulato any physician upon request; I A ELLA and, second, "That's all right. Reep on giving it to him.

We make no extravagant claims. We raise no false hopes. Ayer's

sees for himself that the medicine is all we claim for it.

Cherry Pectoral Sixty years of experience make us believe that this is the

best medicine in the world for colds, coughs, croup, bronchitis, and all other throat and lung troubles. And the doctors agree with us. Three sizes : 25c., 56c., \$1.00. 95C. AVER CO., Lowell, Hone.
