Pruncs for the People A Frenchman planted a prune tree out
a Catifornia in 1870. it was the only prune tree in the state. All the prunes used in the United States at that ume came
from France. But now as a renult of the from France. But now as a renult of the
prune tree that M. Pellar planted California prune tree that M. Pellar planted California
every year ships enormous quantities of prunes -not only to France, but to all European countrice.
The growth of the prune Industry in Cal-
Ifornis all came from Pellar's single Hornis all came from Pellar's single trec. spectes of parple plum, throve on the Paeffic coast, and that the hot, dry weather of the country brought out lis full saceliarine qualities. Ths first orchard wak
planted in the Santa Clara valley, just planted in the Santa Clara valley, just
south of San Frencisco, a region which is south of San Frencisco, a region which is
now the prune center of the state. It was only ten acres in extent, and began to yield in 187 s . In four years the trees produced $\$ 14,000$ worth of frult.
The size of the prune crop in Calltornia is ao enormous that hee mosi cyincal would be surprised. In 1901 the state produced $150,000,000$ pounds of prunes, and the total crop of the year just pasased exceeded that of the preceding year by several thounand tons. If put into ten-ton
freight ears the Callfornia prune crop of 1902 would nill a trala reaching from Chlcago to Buffato.
The American prune has tound its way Into the European markets for the reason taste than the frutt ralsed there. The Califortila prune, for instance, is dried wholly out of doors, for the long period of absolutely srainless weather which prevails milts the drying trays to remaln out of doors day and night. The French and wther kinds of European prunes are dried in kilns for fear of exposure to rains, and the artificlal heat fails to bring out all the rich sugar products of the pulp.
