

REQUIREMENTS FOR GUARD

Will Get No Funds from National Government During Current Year.

HIGH WATER HELPS IRRIGATIONISTS

World Crowd Visits Undertaking Rooms to View the Body of Nienke, the Executed Murderer.

(From a Staff Correspondent.)

LINCOLN, March 14.—(Special.)—Adjutant General Culver has received a statement as to the amount of appropriation that will be made to the several states because of the enactment of the new law in regard to the National Guard.

The statement shows that the Nebraska National Guard has an aggregate strength of 1,711 and under the new law the estimated profit to the state will be \$35,327. The total amount from all sources for the year, including army equipments and money, will be \$82,517.40.

Among the things that the state will have to do to fulfill these requirements are these: It will have to have an annual encampment of the National Guard of not less than five consecutive days the year preceding the allotment; each company must have at least twenty-four drills during the year and each member must be able to pass a rigid inspection under the direction of the secretary of war, which will not only include the manual of arms, foot movements, requirements of drill regulations, the firing regulations as provided under the system of small arms firing regulations, but administration, including the ability of each commanding officer of each company to make out complete reports as required in the regular army for administration work to keep all books, records, letters, receipts and reports up to date, a proper index and copies; each member must make the necessary record in target practice; each member must also show the proper ability to care for and account for all quartermaster stores.

Adjutant General Culver will make strong efforts to place the National Guard in a position to get the allotment next year and is now laying plans for the carrying out of his ideas. This year his office, though the work and responsibility connected therewith has largely increased, has asked only a small sum of money from the legislature in excess of that appropriated by the last legislature.

Mickey Enjoys Trip

Governor John H. Mickey returned to Lincoln this morning after having attended the banquet in Chicago given in honor of the Methodist governors by the Chicago Methodist Social Union.

It was a remarkable meeting," he said, "and I am glad that I attended it. I believe that every person in attendance at that banquet, and there were about 700, was strengthened and encouraged and helped. I am sure that I was."

Governor and Mrs. Mickey were highly entertained and the governor speaks in praise of those who were on the entertainment committee. He enjoyed a pleasant visit with Miss McCormick of the McCormick Harvesting company and with Dr. Nance, a brother of Nebraska's former governor.

Water for Irrigation. The high water has at least made the irrigation water available to the farmers.

BEATRICE OUT FOR REFORM Omaha Men Do Missionary Work in Behalf of Equal Taxation.

RAILROADS SHRINKING IN GAGE COUNTY Meeting Held at Which Leading Citizens Attend and Participate in Sentiment Favors Taxation of Terminals.

BEATRICE, Neb., March 14.—(Special Telegram.)—F. D. Weed and W. F. Johnson of Omaha were here today in the interest of equal taxation between the assessment of railroad properties in cities and villages of Nebraska on the same basis as other property.

Mr. Weed made a number of representative business men at the Paddock hotel parlors today and addressed them on the matter of equality in taxation between the small property owners and the railroads.

The meeting adjourned until this evening, when the matter was discussed before Senator L. M. Farnham. It was decided to advocate the passage of legislation favoring a more equitable adjustment of the tax burden.

F. D. Weed and W. F. Johnson returned Saturday night from Beatrice, where they went to investigate the amount of taxes paid by the railroads to that city as compared with the taxes paid on other property.

"We found," said Mr. Weed, "that the total assessment of Gage county for 1932 was \$2,294,173. The total assessment for all railroad property in Gage county was \$723,567, showing they own 31.5 per cent of all property in the county. But it was found that while the total amount raised in the county amounted to \$392,748.32, the railroads paid only \$72,850, or 18.5 per cent of the taxes, that being \$552.16 less than their fair share.

THE VALUE OF CHARCOAL

Few People Know How Useful It Is in Preserving Health and Beauty. Nearly everybody knows that charcoal is the safest and most efficient disinfectant and purifier in nature.

Charcoal is a remedy that the more you take of it the better; it is not a drug at all, but simply absorbs the germs and impurities always present in the stomach and intestines and carries them out of the system.

Charcoal effectively cleans and improves the complexion, it whitens the teeth and further acts as a natural and eminently safe cathartic.

It absorbs the injurious gases which collect in the stomach and bowels; it cleanses the mouth and throat from the poison of tartar.

BEATRICE, Neb., March 14.—(Special.)—George F. Hallock, the bridegroom who so lately bore the name of George F. Taylor, man whom he thought was disturbing his home, was arraigned before County Judge Taylor and entered a plea of guilty of assault and battery.
