The inability of grain dealers to secure sufficient cars from the railroad companies was the principal question of interest discussed, but the discussion was purely informal and no action was taken by the meeting. Several of the members, how-ever, were emphatic in their assertions that the railroads were to highe to a great extent for the car famine and that the grain men, who were valuable patrons of the railroads, should receive greater consideration than they did. Some of the nembers who took part in the discussion claimed that the railroads discriminated in favor of the coal dealers, as against the grain dealers when it came to the question of cars.

Representatives of several of the leading railroads were present and denied the alleged discrimination. They explained that the shortage of cars was due to the extraordinary conditions resulting from the strike of the coal miners.

The bylaws were amended so as to make the dues payable quarterly in advance instead of monthly, thus saying postage and bookkeeping on the part of the secretary

The admission of fifty-five new members by the governing committee during the last year was confirmed. A special rate had been granted by the railroads for the meeting, and this led to more of less confusion, as a number of members attending had failed to segure the necessary certificates. Straightening this matter out occupied quite a portion of the meeting.
