Porcelain & Marble Co.'s mines, and would be glad to take as much more. The de-mand created for mica in the electrical trades makes a good market for even the broken fragments from the large sheets, and the industry of supplying the demand for mica promises to be one of the most important of Custer county, for the grade of mica produced here is just as good as that produced in Canada or in any other of the states of the union. The London and Dakota Mining and Smeiting company is the name of a new corporation which has been organized to work and develop Custer county mines. The efficers of the company are as follows:

and shipped from Custer county mines about 100,000 pounds of mica every month, all of it being taken by one firm, which has a contract to purchase the product of the Porcelain & Marble Co.'s mines, and would be glad to take as much more. work and develop Custer county mines. The officers of the company are as follows:
Str James Francis Whitley of London, pres-ident: Thomas Delicate, Custer City, vice president; E. L. Grantham, Custer City, secretary: Lord C. P. T. Colmey, London, treasurer. The gentlemen who are the principal stockholders in the company have had experts examining the mines for sev-eral weeks, and it was upon their report that the property was purchased and the company organized. The property consists of two full claims on the north fork of French creek, eight miles northwest from Custer City, and was formerly the property of J. D. and Thomas Carroli, who parted with it for a large consideration. The property has attracted attention for a large consideration. The property has attracted attention for a large consideration. The property has attracted attention for a large consideration. The property has attracted attention for a large consideration. The property has attracted attention for a large consideration for a l with it for a large consideration. The property has attracted attention for a long Boott, Massachusetts, Tremont and Suffolk time on account of the rich ore which it has at times produced, some of it going as high as \$2,000 to the ton gold. The vein, vertical, is not a large one, but what there is of it is said to be very rich. The south on Saturday is to visit the Massanew company will at once put a large force of miners at work to thoroughly develop the property, and when this work has suffciently advanced will probably erect a smelting plant, as the ore is a smelting proposition.

Falsebottom Proves Rich.

DEADWOOD, S. D., April 5 .- (Special.)-The Falsebottom, or Garden City district. is proving, after years of waiting, to be of the richest and most productive in the Black Hills, and development work now in progress on the various properties in the district proves that it is even richer prospectors. One of the companies, in fact the principal company operating in the dia-trict, which has done the most to develop-its resources, has been the Penobecot, which has already expended in the neighborhood of \$1,000,000 in the purchase of ground and the ercetion of plants there. Since its forty-tow et cruahing cyanide plant wells monthly cleanup, and its gold bricks have plant 160 tons of one a day, has for the past month been making shipments of thirty-five tons of smelting ore a day the Realization, one of the misse of the company, and has averaged in value şöi a ton, although occasional bunches of the company, and has averaged in value şöi a ton, although occasional bunches of the company, and has averaged in value şoi a ton, although occasional bunches of the the Black Hills, and development work now in progress on the various properties SUPPLEME COURT PROCEEDINGS
bas already expended in the neighborhood of \$1,000,000 in the purchase of ground and the erection of plants there. Since its forty-ton wet crushing cyanide plant went into commission last Pebruary, the Penobscot ecompany has not missed a sent-monthly cleanup, and its gold bricks have been of an average value of \$15,000 each. The company, besides treating at its own plant 150 tons of ore a day, has for the past month been making shipments of the concellation of the contract regulares extrinsic evidence is a question of fact. "As a general rule the right to vote pleaged shares of stock remains in the pleaged shares of stock remains in the base of the restment plants. This smelting ore was discovered several weeks ago in the Realization, one of the mines of the compony, and has averaged in value \$55 a ton, although occasional bunches of the mount authorized by the articles of the orgoniton, and without consideration foreds. This cre is too rich to treat by cyanidation, and only the lower grades are being treated at the company's plant at Mailland. The Garden City district produces the richest cyaniding ores of any district produces the richest cyaniding ores of As soon as railroad communication can be

had with the outside world, the shipmonts from the Penobacot will be more than doubled, for it is said that the rich shoot is one of the 'argest contained in any of the company's numerous properties.

Morning Glory De .. eloping.

The Morning Glory Mining company is developing a group of claims at the head of Palsebottom creek which contains fiftyfour acres. The present work of the company consists of a tunnel which is being driven to intercept a strong vein which shows on the top of the hill in the sur-face workings along the course of this, vein is ome very good ore has been found, so that it is believed when the tunned stilkes the vein, which will be at a depth of several hundred feet, ore of a good commercial grade will be struck. The general forms-tion of the property is perphyry, which is crossed by several strong phonolite dykes Several well defined veins on adjoining properties are shown to have a direction toward the Morning Glory ground, so it is reasonable to believe that the hopes of its owners will be realised when the present pany consists of a tunnel which is being

ment for only a few days. Officials of the say their factories will shut down altogether during the coming week.

holder may maintain a sult in equity to try the validity of an election of officers and directors of a private corporation and deweek.

the validity of an election of officers and directors of a private corporation and de-termine whether persons claiming to be such are entitled to act in that capacity. 7. In any event the court in ay inquire into the validity of the election and pass upon the title to corporate offices when necessary to do complete justice in a suit of which it mas jurisdiction on other grounds. 8. Where a corporation has a fixed cap-ital stock divided into a definite number of shares a majority of all the shares is necessary to a valid election in the ab-sence of some rule to the contrary. 9. It is not necessary that a stockholder shail have paid for his stock in full to en-able him to vote all his shares at an elec-tion.

Canadian Pacifics showed no develop

Canadian Pacifics showed no develop-ment of interest. The announcement of the reduction in from prices in the United States caused heavy selling of iron shares on Friday and Baturday, the quotations ioning what they had gained earlier in the week through several advances in prices of iron here. Most iron shares at the close of the week were moderately lower. Coal shares advanced strongly upon heav er sales of coal to Beigium and good anoual reports by several of the large companies. Money rates have been moderating since the monthly settlement and foreign ex-change rates also are tending to become evider. The unprecedented pressure on the Reichebank for this reason seems to be outweighed by the expectation that the bank of England will reduce its rate this week.

Dry Goods Market. MANCHESTER, April 5.-The unsettled

MANCHESTER, April 5.—The unsettled situation regarding cotton kept the cloth market here last week on the borders of stagastion. The general demand during most part of the week was of an unim-portant character and the turn over was portant character most of the turn of the turn over the seller the the thirt is antisfactory, encouraging the belief that there will be an increase of trade when prices become settled. There were some are shirtings were unsalenble. The chira trade was limited, though there were many ow offers. Some minor outlets have taken requirements. The buyers generally are the supplies necessary for the season's which are requisite to keep up their as-which are requisite to keep up their as of interest, the demand continuing to be of a retail character.

SAYS RELIGION STANDS APART

Dr. Harper Claims Ethical Learnings Are Above and Beyond Art and Philosophy.

LOUISVILLE, Ky., April 5 .- The golden jubilee of the Young Men's Christian association of Louisville was celebrated today. The chief speaker was William R. Harper, president of the University of Chicago, who spoke on the relation of religion to the higher life. In the course of his speech Mr. Harper anid:

his speech Mr. Harper said: The higher life is always associated with the individual. It manifests itself in many different forms, yet, all are closely related. The fullest vindication of this higher life stands out in the long list of men who have become famous in art, in science and in philosophy. Then there is ethical pur-pose, or shall we say, moral effort. We are striving toward the pure and beautiful and good or are failing away toward that which is ignorance and evil and darkness. The line between the higher and the lower life is not the same for any two men. My question is this: What has religion to do with this higher life? In my use of the word "religion" I use it in the broau-est sense. I am not referring to the church. The church is of a variable character. But indigion is eternal.

The children is of a variable children is determat. Poetry and art may brighten life, but they can never bring the one thing needful. The fact is that religion is of itself and for itself and it cannot be confounded with art or philosephy.

something of the use of money.

Attorney General Crow will go to ferson City tomorrow to prepare for reconvening of the Cole county grand

57.30, with prime neaves setting from 57.20, with prime heavies setting from 57.20% down. For the week receipts have been very light, as there is a decrease of about 10,000 head as compared with last week and of about 9,000 as compared with the corresponding week of last year. Prices have fluctuated back and forth to quite an extent, but packers have been pearish all the week and as a result the tendency has been downward. As compared with the close of last week, however, the decline only amounts to 4c. Representative sales:
